INDUSTRIAL CENSUS	5
FACTORIES AND OTHER LARGE INDUSTRIES	6—50
BREWERIES	51
COTTON MILLS	52—72
JUTE MILLS	73—75
PAPER MILLS	76—77
WOOLLEN MILLS	78—79
MINERAL PRODUCTION	80—85
COAL MINES	86—91
JOINT-STOCK COMPANIES	92—117
PATENTS and DESIGNS	118
FOREIGN TRADE and SHIPPING	119—154
WRECKS	155
MERCHANDISE MARKS	156
POST OFFICE	157—190
TELEGRAPHS	191—193
RAILWAYS	194—202
IRRIGATION	203—217
INDEX	218—220

	Table No.	Page
Summary Table	1. Summary of Principal Tables	1—4
Industrial Census	2. Statement showing the main results of the Industrial Census in India taken in 1911 ..	5
	3. Abstract Statement of Industries in India and the Labour employed in them, from 1908 to 1912—	
	Number of Factories (owned by Government and Local Bodies) whether under the Indian Factories Act or not	6
	Number of Factories owned by State Durbars	7
	Number of Factories owned by Government, Local Bodies, and State Durbars ..	8
	4. Number of Industries in each province in India, from 1908 to 1912—	
	Number of Factories (owned and worked by Companies or Individuals)—	
	(I) Worked by Mechanical power	10—13
	(II) Not worked by Mechanical power	16—21
	Number of Industries in Native States and Foreign Territory, from 1908 to 1912—	
	Number of Factories (owned and worked by Companies or Individuals)—	
	(1) Worked by Mechanical power	14—17
	(2) Not Worked by Mechanical power..	22—25
	5. Number of Persons employed in the Industries in each province in India, from 1908 to 1912—	
	Number of Factories (owned and worked by Companies or Individuals)—	
	(I) Worked by Mechanical power	26—29
	(II) Not worked by Mechanical power	34—37
	Number of Persons employed in the Industries in Native States and Foreign Territory, from 1908 to 1912—	
	Number of Factories (owned and worked by Companies or Individuals)—	
	(1) Worked by Mechanical power	30—33
Factories and other Large Industries	(2) Not worked by Mechanical power	38—41
	6. Number of Factories in British India Inspected, average daily Number of Operatives employed, the manner in which Factories were worked, and the Holidays given in them, from 1908 to 1912	42
	6-A. Number of Factories in each Province inspected, average daily Number of Operatives employed, the manner in which Factories were worked, and the Holidays given in them, from 1908 to 1912	43—47
	Burma	43
	Assam	43
	Bengal	44
	Bihar and Orissa	44
	United Provinces of Agra and Oudh	44
	Ajmer-Merwara	45
	Punjab	45
	North-West Frontier Province	46
	Bombay	46
	Central Provinces and Berar	47
	Madras	47
	7. Number of Accidents in Factories, from 1908 to 1912	48
	8. Number of Persons Convicted in respect of Offences against the Factories Act (XI of 1891), from 1908 to 1912	49
	8-A. Number of Persons convicted in respect of Offences against the New Factories Act (XII of 1911) during 1912	50
Breweries	9. Statement of the Progress of the Brewing Industry, from 1877 to 1913; and detailed Statement of the Production of Beer and the number of persons employed in each brewery in 1911, 1912 and 1913	51

	Table No.	Page
Cotton mills	10. Abstract Statement of the Progress of the Cotton Spinning and Weaving Industry in India, from 1878-79 to 1913-14	
	(1) British India	52
	(2) Native States and Foreign Territory	53
	(3) Total, India	54
	11. Detailed Statement of Cotton Mills in India in 1913-14	55—57
	12. Abstract Statement of the Quantity of Yarn Produced in the Cotton Mills in India, from 1895-96 to 1913-14	58
	13. Abstract Statement of the Quantity of Woven Goods Produced in the Cotton Mills in India, from 1896-97 to 1913-14	58
	14. Detailed Statement of the Quantity and Counts of Yarn Produced in the Cotton Mills in India, from 1909-10 to 1913-14	59—65
	15. Detailed Statement of the Quantity and Descriptions of Woven Goods Produced in the Cotton Mills in India, from 1909-10 to 1913-14	66—71
	16. Gross Amount of Excise Duty realised under the Cotton Duties Act, II of 1896, from 1895-96 to 1913-14	72
Jute Mills	17. Abstract Statement of Jute Mills, from 1879-80 to 1913-14	73
	18. Detailed Statement of Jute Mills in 1913-14	74—75
Paper Mills	19. Abstract Statement of Paper Mills in India, from 1899 to 1913	76
	20. Detailed Statement of Paper Mills in 1913	77
Woollen Mills	21. Abstract Statement of Woollen Mills in India, from 1899 to 1913	78
	22. Detailed Statement of Woollen Mills in 1913	79
Mineral Production	23 Abstract Statement of the Quantity and Value of Salt, Coal, Gold, Petroleum and other Minerals Produced in India, from 1890 to 1913	80—81
	24. Quantity and Value of Gold Produced, from 1904 to 1913	82
	25. Quantity and Value of Petroleum Produced, from 1904 to 1913	82
	26. Quantity of Kerosine consumed in India (excluding Burma) from 1900-01 to 1913-14	82
	27. Quantity and Value of other Minerals Produced, from 1904 to 1913	83—85
Coal Mines	28. Production of Coal in each Province and State of India from 1878 to 1913	86
	29. Average value of Coal extracted from the Mines in India from 1901 to 1913	87
	30. Average Prices of Indian and Welsh Coal at Chief Ports from 1901 to 1914	87
	31. Average Number of Persons employed daily in the Coal Mining Industries in India from 1901 to 1913	88
	32. Quantity and Value of Foreign Coal imported into British India from 1891to 1913	88
	33. Quantity of Indian Coal exported from British India from 1891 to 1913	89
	34. Quantity of available supply of Coal in India from 1891 to 1913	89
	35. Quantity of Coal carried by Rail and River from and to different Trade Blocks of India during 1913	90
	36. Quantity of Coal exported by Sea from Bengal and Foreign Countries to the other Provinces during 1913	90
	37. Quantity of available supply of Coal in each Province in 1913	91
	38. Quantity of Coal and Wood consumed on Indian Railways from 1890 to 1913-14	91
	39 Average value of Coal at the Pit's Mouth in certain Principal Countries of the World from 1901 to 1912	91
Joint Stock Companies	40. Number of Companies at work in British India, and in the Mysore State and their authorised and paid-up Capital, at the end of each year from 1889-90 to 1913-14	92
	41. Number of Companies, and the Amount of paid-up Capital, in each Province, and in the Mysore State at the end of each year from 1904-05 to 1913-14	92
	42. Number, Description, and Capital of Companies at work in each Province and in the Mysore State at the end of 1913-14	94—101
	43. Number and Paid-up Capital of each Class of Companies in existence at the end of each year from 1889-90 to 1913-14	102—103
	44. Number, Description, and Capital of new Companies Registered in 1913-14	104—107
	45. Number, Description, and Capital of Companies which ceased to work in 1913-14	108—111
	46. Number, Description, and Capital (in Sterling) of Companies working exclusively in India in 1913	112—117

	Table No.	Page
Patents and Designs	47 Proceedings under the Inventions and Designs Act, from 1904 to 1913	118
	48. Abstract Statement of the Trade of British India, distinguishing Imports and Exports, Merchandise and Treasure, from 1834-35 to 1913-14	119
	49. Abstract Statement of the Trade of each Province, distinguishing Imports and Exports, Merchandise and Treasure, from 1834-35 to 1913-14	120—121
	Imports and Exports of Merchandise	
	50. Value of Merchandise Imported into British India from each Foreign Country, from 1875-76 to 1913-14	122—123
	51. Value of Merchandise Imported into each Province from each Foreign Country, from 1904-05 to 1913-14	124
	52. Value of Merchandise Exported from British India to each Foreign Country, from 1875-76 to 1913-14	125—126
	53. Value of Merchandise Exported from each Province, from 1904-05 to 1913-14	127
	54. Quantity of Articles of Merchandise Imported into British India, from 1904-05 to 1913-14 ..	128
	55. Value of „ „ „ „ „ „ „ „	129
	56. Quantity of Articles of Merchandise Exported from British India, from 1904-05 to 1913-14 ..	130
	57. Value of „ „ „ „ „ „ „ ..	131
	58. Value of Articles of Merchandise Imported into each Province, from 1904-05 to 1913-14 ..	132—134
	59. Value of Articles of Merchandise Exported from each Province, from 1904-05 to 1913-14 ..	135—136
	Trade with the United Kingdom (Merchandise only)	
	60. Value of Principal Articles Imported into British India from the United Kingdom, from 1875-76 to 1913-14	137—139
Foreign Trade and Shipping	61. Value of Principal Articles Exported from British India to the United Kingdom, from 1875-76 to 1913-14	140—142
	Trade of the Principal Ports	
	62. Value of the Trade of each of the Principal Ports in British India, from 1904-05 to 1913-14 ..	143
	Monthly Trade	
	63. Value of Imports and Exports in each Province in each month, from 1909-10 to 1913-14 ..	144—145
	Imports and Exports of Treasure	
	64. Abstract Statement of the Value of Gold and Silver Imported into and Exported from British India, from 1834-35 to 1913-14	146
	65. Value of Gold and Silver Imported into British India from each Foreign Country, from 1904-05 to 1913-14	147
	66. Value of Gold and Silver Exported from British India to each Foreign Country, from 1904-05 to 1913-14	148
	Shipping	
	67. Number and Tonnage of Steam and Sailing Vessels (distinguishing Native Craft) that Entered and Cleared for the Foreign Trade at Ports in each Province and in British India, from 1904-05 to 1913-14	149—150
	68. Number and Tonnage of Steam and Sailing Vessels of each Nationality that Entered from Foreign Countries at Ports in British India, from 1904-05 to 1913-14	151
	69. Number and Tonnage of Steam and Sailing Vessels of each Nationality that Cleared to Foreign Countries at Ports in British India, from 1904-05 to 1913-14	152
	70. Number and Tonnage of Steam and Sailing Vessels Entered and Cleared with Cargo at each of the Principal Ports in British India, from 1904-05 to 1913-14	153—154
Wrecks	71. Number and Tonnage of British and British Indian Vessels and Native Craft totally Lost in Indian Waters, from 1888 to 1913	155
Merchandise Marks	72 Detentions under the Indian Merchandise Marks Act, from 1893-94 to 1913-14 ..	156
Post Office	73. Abstract Statement of Progress, from 1870-71 to 1913-14	157
	74. Gross Revenue, Cost of Management, and net Revenue, from 1870-71 to 1913-14 ..	158—159
	75. Number of Post Offices open at the close of each year, and the Distance over which Mails were conveyed, from 1870-71 to 1913-14	160

	Table No.	Page
Post Office	75 A. Number of Post Offices open at the close of each year, and the Distance over which Mails were conveyed, in each Circle, from 1904-05 to 1913-14	161—162
	76. Expenditure on Account of Central Control, from 1870-71 to 1913-14	163
	77. Cost of the Railway Mail Service, from 1880-81 to 1913-14	163
	78. Revenue and Expenditure in each Circle, from 1870-71 to 1913-14	164—165
	79. Revenue and Expenditure under each Head to the end of 1913-14, for—	
	Burma	166
	Eastern Bengal and Assam	166
	Bengal	167
	United Provinces of Agra and Oudh	167
	Rajputana	168
	Central India (to end of 1894-95)	168
	Central Circle	168
	Punjab and North-West Frontier Province	168
	Sind	169
	Bombay	169
	Central Provinces	170
	Madras	170
	80. Number of Letters, Newspapers, Parcels, and Packets, received for delivery from 1870-71 to 1913-84	172—173
	81. Number of Paid, Unpaid, Registered, Insured, Value-Payable, and Service privileged Letters, Post Cards, and Reply Post Cards, received for delivery in each Circle, from 1870-71 to 1913-14	172—173
	82. Number of Newspapers received for delivery in each Circle, from 1870-71 to 1913-14	174
	83. Number of Paid, Unpaid, Insured, and Value-Payable Parcels received for delivery in each Circle, from 1870-71 to 1913-14	174
	84. Number of Unregistered, Registered, and Value-Payable Packets received for delivery in each Circle, from 1870-71 to 1913-14	175
	85. Number of Postage Stamps of each Denomination sold by the Postal Department, and the Value realised, from 1870-71 to 1913-14	176—177
	86. Number of Articles received and disposed of by the Dead Letter Offices, from 1904-05 to 1913-14	178—179
	87. Number of Money Order Offices open, Number and Value of Money Orders issued and paid, and Revenue therefrom, from 1870-71 to 1913-14	180—181
	88. Number and Value of Money Orders issued in each Circle, from 1870-71 to 1913-14	182—185
	89. Number and Value of Money Orders paid in each Circle, from 1870-71 to 1913-14	186—189
	90. Commission on Money Orders received in each Circle, from 1870-71 to 1913-14	190
Telegraphs	91. Capital Revenue, and Expenditure of the Telegraph Department, from 1850-51 to 1913-14	191
	92. Number of Signal Offices open, Length of Telegraph Line and Wire, Number and Value of Messages, and Revenue and Charge per mile, from 1851-52 to 1913-14	192—193
Railways	93. Financial Result of the Working of the State Railways in each Official Year from 1908-09 to 1913-14	194
	94. General Results of working of each Railway System during 1913-14	195
	95. Revenue Accounts of the Railways, in respect of which Government is financially responsible, at the end of each Official Year up to 1913-14	196
	96. Gross earnings from each Class of Traffic from 1909 to 1913-14	196
	97. Mileage, Capital Outlay, Earnings, Working expenses and Traffic of all Railways from 1853 to 1913-14	198—199
	98. Mileage of Railway Line open for Traffic from 1894-95 to 1913-14	200
	99. Total number of Rolling stock at close of each Year from 1911 to 1913-14	200
	100. Statement showing Train Mileage for the five years ending 1913-14	201
	101. Statement showing Railway staff from 1904 to 1913-14	201
	102. Statement of accidents of all Descriptions, to Persons which have occurred during the five Years ending 1913-14	202
Irrigation	103. Principal results of Irrigation and Navigation Works in British India in 1912-13	203

	Table No.	Page
Irrigation	104. Mileage of Canals in operation and the area irrigated to the end of 1912-13	204—205
	105. Financial results of Irrigation and Navigation Works to the end of 1912-13, for—	
	A. Major Works	206—208
	B. Minor Works	209—210
	C. Total Major and Minor Works	211
	106. Mileage of Canals in operation and the area irrigated in each Province, from 1908-09 to 1912-13	212—215
	107. Details of Irrigation and Navigation in each Province, from 1908-09 to 1912-13	216—217

SEVENTH ABSTRACT OF COMMERCIAL STATISTICS

REPORT

To

THE SECRETARY TO THE GOVERNMENT OF INDIA,

COMMERCE AND INDUSTRY DEPARTMENT.

SIR,

I have the honour to submit the Seventh Abstract of Commercial Statistics which comprises generally Parts I, II, and III of the Statistics of British India as last published. The volume, it may be noted, on account of the changes that have been made is in reality the first of a new series. The question of the reduction from foolscap to octavo size is under consideration. The statistics refer, with some exceptions, to the period ending the 31st March 1914, and deal with industries, mills, mines, joint stock companies, foreign trade and shipping, post office, telegraphs, railways and irrigation. The tables have in many cases been reconstructed, but continuity of record has been preserved almost entirely. The tables relating to railways which have been entirely recast show in greater detail the more important statistics relating to principal railways. Two charts and an index have been added for easy reference. The changes necessary in connection with the reconstruction of this work and also the pressure of more urgent work connected with the war, have somewhat delayed the publication of this volume.

SUMMARY TABLE

Summary Table 1 pages 1—4 gives the salient features of each section of the Commercial Statistics included in this volume.

INDUSTRIAL CENSUS

(FOR TABLE SEE PAGE 5)

A new table (Table 2) has been added to show the main results of the Industrial Census taken at the time of Population Census of 1911. A caveat, however, should be added regarding the possibility of obtaining an industrial census from a population census. Experience has proved that one cannot hope for an industrial census from a population census, especially in India, for several reasons as explained in Appendix K of the "Report on the Enquiry into the Rise of Prices in India." The chief reasons are: (1) change of means of livelihood with the season; for instance, the same man at one time may be a field-worker, at another an earth-digger, and again a porter, saltpetre worker, paddy husker, *palki*-bearer, firewood-collector, etc., so that the head under which he will appear in the occupation table depends on the date fixed for the enumeration. (2) Combination of occupations; a worker frequently combines several occupation wholly unconnected with one another, so that at the census he is unable to say which is his chief means of support. (3) Mixed occupations; for instance, money-lending and grain dealing are in many parts merely different aspects of the same business. (4) Confusion of thought between a man's caste which connotes his traditional occupation, and the means of livelihood by which he actually subsists; for instance, a man of the barber caste will often call himself a barber, even when his income is derived from agriculture or some other employment. It may be noted that this difficulty of classification according to occupation from a population census is not confined to India alone. In the United States and in Germany, it has been held that a population census cannot be expected to give the requisite information regarding occupation, and that a comprehensive industrial survey obtained by detailed investigation and spread over a considerable time is to be preferred. In the report of the census of England and Wales for 1891 it is said "A census * * does not supply data which are suitable for minute classification or admit of profitable examination in detail. The most that it is reasonable to expect from data so collected is that they shall give the means of drawing such a picture of the occupational distribution of the people as shall be fairly true in its main lines, though little value can be attached to the detailed features. It is not wise to demand from a material a result for the production of which it is unsuited."

FACTORIES AND OTHER LARGE INDUSTRIES

(FOR TABLES SEE PAGES 6 to 50.)

Factory laws

The conditions of factory labour until 1st July 1912 were regulated by the Indian Factories Act XV of 1881, as amended by Act XI of 1891. The chief provisions of the amended Act were Local Governments were empowered to appoint inspectors of factories, and certifying surgeons to certify as to the age of children. A mid-day stoppage of work was prescribed in all factories, except those worked on an approved system of shifts, and Sunday labour was prohibited, subject to certain exceptions. The hours for employment for women and children were fixed with intervals of rest; and provision was made for the fencing of machinery and for the promulgation of rules as to water supply, ventilation, the prevention of over-crowding, etc.

The decision to undertake further legislation was arrived at after comprehensive enquiries. An important factor in the case was the increasing use of electric light in the Bombay mills, which radically changed the conditions prevailing when the Act of 1891 was passed and had abolished the security that operatives would not be employed for more than 12 hours a day on the average. The question of the hours of employment in textile factories was brought into prominence by the period of prosperity that the cotton industry began to enjoy in the cold weather of 1904-05, a large number of operatives being regularly employed for 15 hours a day or even longer. Owing to complaints regarding the long hours worked in many mills, the Government of India in 1906 appointed a small Committee to conduct a preliminary inquiry into the conditions of labour in textile factories. The conclusions arrived at by this Committee formed the basis of an investigation, extending to all factories in India, by a representative Commission. The recommendations of the Committee and of the Commission having been considered by the Government of India and the Local Governments, a Bill was introduced in July 1908 to amend and consolidate the law relating to factories, and was finally passed into law as Act XII of 1911. The new Act which came into force on 1st July 1912, defined the term "factory" as any premises wherein, or within the precincts of which, steam, water or other mechanical power or electrical power is used in aid of any process for, or incidental to, making, altering, repairing, ornamenting, finishing or otherwise adapting for use, for transport or for sale any article or part of an article. The term does not apply to (*a*) any mine subject to the operation of the Indian Mines Act, or (*b*) any electrical generating or transforming station, or (*c*) any indigo factory, or (*d*) any factory situated on and used solely for the purposes of a tea or coffee plantation, or (*e*) any factory wherein on no day in the year are more than forty-nine persons simultaneously employed: provided that the Local Government may apply all or any of the provisions of this Act to any factory or class of factories wherein any specified number of persons, not being less than twenty, are on any day simultaneously employed. The Act limited the hours within which children and women may be employed, and further restricted the employment of women by night except in certain cases. It also contains a number of new provisions for securing the health and safety of the operatives, making inspection more effective, and securing generally the better administration of the Act.

Definitions of the term factory.

Tables Nos. 3, 4 and 5 deal not only with factories, as defined above, which come within the scope of the Indian Factories Act, but also include all concerns which do not come within the scope of the Act but which employ an average daily number of 50 persons or more. Tables Nos. 6, 6-A, 7, 8 and 8-A, deal only with factories coming within the scope of the Act. Industrial concerns owned by Government, State Durbars and local bodies are dealt with in table No. 3. Those owned by companies or individuals are dealt with in tables Nos. 4 and 5, factories worked by mechanical or electrical power and those not so worked being shown separately in these tables.

Number of concerns.

The total number of factories and industrial concerns of all classes dealt with in these tables was 3,867 in 1912 as against 3,427 in 1911. From the reports on the working of the Indian Factories Act it appears that in 1912 there were within the scope of the Act 102 factories, belonging to the State and to local bodies, such as municipalities and port trusts, as against 96 in 1911. Among these there were 20 printing presses, 15 railway workshops, 13 canal and engineering workshops, and a considerable number of military arsenals and factories. In addition to these 102 factories, there were 33 more concerns which did not come within the operation of the Indian Factories Act. The total number of factories owned by Government and local bodies in British India thus comes to 135 in 1912 as against 119 in 1911, the important of these being shown in margin. These figures do not include factories situated in Native States and owned by State Durbars. So far as reports have been received, the total number of factories owned by State Durbars was 17.

	1911.	1912.
Printing presses	19	25
Railway workshops	23	15
Engineering workshops	9	13
Municipal workshops	7	8
Arsenals	9	7
Arms and ammunition	6	6
Waterworks	5	7

Of the factories owned by compaines or individuals, those worked by mechanical or electrical power numbered 3,220 in 1912 as against 2,856 in 1911; the more important of these are stated in the margin. These represent about 81 per cent of the total number of factories worked by mechanical or electrical power in all India (including those in Native States so far as reported). The factories created by the cotton industry exist principally in Bombay and those relating to the jute industry in Bengal; while rice mills and saw mills are naturally mostly in Burma. Of the other factories there are none largely assigned to any particular industry. Besides these, there were 495 concerns not worked by mechanical or electrical power, including 39 stone factories, 29 silk filatures, 19 lac factories, 18 tanneries, 17 printing presses and 14 jute presses.

	1911.	1912.
Cotton gins and presses	1,368	1,539
Rice mills	220	327
Cotton mills	259	268
Jute presses	115	120
Saw mills	104	129
Railway workshops	62	65
Jute mills	60	65
Iron and brass foundries	86	48
Flour mills	40	41

Persons employed.

The daily average number of persons employed in all the factories in India, whether worked by mechanical or electrical power or not so worked, and whether owned by Government or local bodies or by companies or individuals, was 1,058,141in 1912, against 978,923 in 1911 and 1,014,241 in 1910. Of these the number employed in factories under the Act was 869,643 as against 791,944 in 1911 and 792,511 in 1910, as shown in the margin. Of this total 320,087 (being 37 per cent) were employed in factories in Bengal, and 259,845 (being 30 per cent) in Bombay, these two provinces employing nearly two-thirds of the factory labour of India.

		1911.	1912.
Adults	Males	620,227	685,822
	Females	115,090	130,025
Children	Males	39,450	44,132
	Females	8,177	9,664

There were 4,508 accidents, causing death or bodily injury to operatives, reported in 1912, as against 4,222 in 1911. Of these 122 were attended with fatal results, 54 occurring in Bengal and 30 in Bombay. Bengal also had the largest number of serious accidents, namely, 512, against 85 in Bombay, 150 in Burma, 108 in the United Provinces, and 61 in the Punjab. Much the largest number of minor accidents—1,476 out of a total of 3,367—occurred in Bombay, where cotton mills and presses predominate. Accidents.

There were 104 convictions in respect of offences against the Factories Acts in 1912 (82 against the old Act of 1891 and 22 against the new Act of 1911). Of these 36 were for the employment of persons in contravention of the Acts, 17 for neglect to keep the prescribed register of children, 16 for neglect to fence machinery, etc., and 9 for neglect of ventilation and cleanliness. Convictions.

BREWERIES

(For Tables see page 51)

According to the statistics of 1913 there are 21 breweries in operation in British India. Fourteen are private property and seven are owned by six joint-stock companies with an authorised capital of R26,71,000, of which R23,03,660 was paid up at the end of 1913-14. Eight of the breweries are located at stations in the Himalayas from Murree to Darjeeling. The largest brewery is the one at Bangalore; the Kasauli, Murree, Rawalpindi, Solon, Poona, and Mandalay breweries standing next in the order shown.

Production was largest in 1902, since when it has tended to decline, while imports of foreign beer have increased proportionately; in the year 1907, the process was reversed, internal production having advanced slightly and imports decreased. Since then there has been a steady decrease in the production, while the imports, after declining up to 1911 (with a small set-back in 1910), recovered appreciably in 1912 and rose higher in 1913. The total quantity brewed in British India in 1913 was 3,655,000 gallons and that imported from foreign countries 4,634,000 gallons, as against 3,849,000 and 4,521,000 gallons in the preceding year.

COTTON MILLS

(For Tables see pages 52 to 72)

The Indian cotton industry dates as far back as 1851, when the first mill was started, but complete statistics were not reported until 1879-80. The following statement shows quinquennial averages from that year to 1908-09 and annual figures for 1909-10, 1910-11, 1911-12, 1912-13, and 1913-14, and the figures in brackets represent the variations for each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100: (Sterling capital has been converted into rupees at the average rate of exchange of the period)

	Number of mills at work	Authorised Capital (in lakhs of R.) as far as reported	Number (in thousands) of		
			Persons employed	Looms	Spindles
1879-80 to 1883-84 . .	63 (100)	657·6 (100)	51·0 (100)	14·5 (100)	1610·6 (100)
1884-85 to 1888-89 . .	93 (148)	887·9 (135)	75·7 (148)	18·2 (126)	2296·8 (143)
1889-90 to 1893-94 . .	127 (202)	1161·7 (177)	116·1 (228)	25·3 (175)	3263·8 (203)
1894-95 to 1898-99 . .	156 (248)	1419·5 (216)	150·0 (294)	36·6 (253)	4046·1 (251)
1899-1900 to 1903-04 .	195 (310)	1687·9 (257)	171·6 (336)	42·0 (290)	5009·9 (310)
1904-05 to 1908-09 . .	218 (346)	1878·7 (286)	216·4 (424)	60·0 (414)	5549·1 (345)
1909-10 . . .	245 (389)	2115·0 (322)	232·3 (455)	80·1 (571)	6142·5 (381)
1910-11 . . .	254 (403)	2236·5 (340)	220·8 (453)	84·6 (600)	6346·7 (394)
1911-12 . . .	258 (409)	2291·0 (348)	236·8 (464)	87·6 (604)	6427·2 (399)
1912-13 . . .	266 (422)	2328·3 (354)	258·5 (507)	91·6 (629)	6495·0 (403)
1913-14 . . .	264 (419)	2245·7 (341)	260·8 (511)	96·7 (667)	6620·6 (411)

It will be seen that the number of persons employed and of looms and spindles in operation have increased to a larger extent than the amount of authorised capital, which, however, has not been reported from many private mills.

At the end of 1913-14 there were in India 264 cotton mills, containing 96,688 looms and 6,620,576 spindles. Of this number, 105 were exclusively spinning mills; 24 were exclusively weaving mills; and in 135 both spinning and weaving were carried on. They employed a daily average number of 260,847 persons: 189,598 men, 44,848 women, and 26,401 children. Six new mills with 52 looms and 56,959 spindles were started in the year. Number of mills.

The authorised capital of the mills, as far as this information has been furnished, is R22,45,67,160, including the sterling capital of £636,274; of the rupee capital, R18,60,75,146 is paid up and of the sterling capital £572,274 is paid up. There are, further, rupee debentures to the value of R2,49,78,525 issued by 41 companies. Fifteen mills also out of the 41 worked by private proprietors have not reported the capital employed by them, and for these about 18 millions of rupees would seem to be a fair estimate. The aggregate Capital.

of the authorised capital and debentures is thus nearly 269·03 millions of rupees, and of this 212·7millions of rupees or £14·2 millions is paid up.

The mills are located as follows :—

	Number	Authorised Capital (₹)
Bombay, Island	85	8,20,49,700
„ Ahmedabad	60	2,72,41,750
„ elsewhere	29	2,24,70,900
Bengal, almost all near Calcutta	14	1,33,00,000 / £200,000

The Bombay Presidency possesses 66 per cent of the mills, 70 per cent of the spindles, and 77 per cent of the looms.

Production of yarn.

The total production of yarn in the mills in British India, as far as reported, and the figures of exports, are as follows (lbs.) :

	Nos. 1 to 25	Above No. 25	Wastes	Total Production	Total Exports
Average 1896-97 to 1900-01	423,906,898	20,082,852	..	443,989,750	198,002,463
„ 1901-02 to 1905-06	537,379,018	39,935,969	..	577,314,987	270,818,888
„ 1906-07 to 1910-11	555,373,854	53,392,346	160,175	608,926,375	228,318,890
1911-12	531,662,851	58,474,610	704,206	590,841,667	161,129,123
1912-13	589,093,564	60,828,059	660,955	650,582,578	214,879,789
1913-14	582,666,736	61,507,343	678,598	644,852,677	206,790,417

In the last decade the annual outturn of yarn has exceeded 555,000,000 lbs. in every year. In 1900-01 famine in India and the collapse of the Chinese markets restricted production. In the following year there was a rapid recovery, but the years 1902-03 to 1904-05 were marked by stagnation. In 1905-06 the production, stimulated by the cheapening of raw material and generally favourable conditions in the Chinese market, reached the maximum of 655 million lbs. Since then there has been a shrinkage, but it will be noticed that the production exceeded 600,000,000 lbs. in each of the three successive years 1906-07 to 1908-09. Owing to an unprecedented rise in the price of raw cotton there was a decrease of nearly $36\frac{1}{2}$ million lbs. in the production of yarn in 1909-10 and a further decrease in 1910-11. There was a recovery in 1911-12 and in 1913-14 the output again reached the figure of 645 million lbs.

The spinning of yarn is in a large degree centred in Bombay, the mills of that province producing nearly 78 per cent of the quantity produced in British India. The United Provinces of Agra and Oudh and Madras produced about 7 per cent each, while Bengal and the Central Provinces produced 5·4 and 5·9 per cent, respectively. Elsewhere the production is as yet very limited.

There was a continued increase in the production of yarn of counts higher than No. 25, till 1908-09, but in 1909-10 the production decreased from 58 million to 50 million lbs. In 1910-11 it improved slightly, rising further in 1911-12 to 58 million lbs. and in 1912-13 and 1913-14 to 61 million lbs., which represents about 9 per cent of the whole production. In Bengal, the United Provinces, and the Punjab the mills spin hardly any yarn above No. 25, yarn of that count and lower numbers representing 96, 98, and 92 per cent respectively of the whole production. In Bombay, however, the spinning of the higher counts (above 25) is nearly 11 per cent of the whole, in Madras it is nearly 9·8 per cent, and in the Central Provinces 4 per cent. Using Egyptian and other imported cotton, the Bombay mills are now spinning in appreciable quantity yarns of No. 40 and upwards. In 1909-10 the production in British India of the finer yarns—Nos. 31 to 40—decreased to 15·5 million lbs. from 20 million lbs. in 1908-09, but since then there has been a steady improvement, the output in 1913-14 having been 18·97 million lbs.

It is interesting to note that the imports of yarn from the United Kingdom and other places are about 6 per cent of the total production in British India. The figures are (*lbs.*) :

	Nos. 1 to 25	Above No. 25	Total Imports
Average 1896-97 to 1900-01	5,654,194	38,315,540	43,969,734
„ 1901-02 to 1905-06	3,571,768	29,095,637	32,667,405
„ 1906-07 to 1910-11	2,608,278	31,574,481	34,182,759
1911-12	1,549,448	35,452,712	37,002,160
1912-13	4,147,598	40,163,550	44,311,148
1913-14	2,150,213	35,202,454	37,352,667

The production of woven goods in the mills in British India, as far as reported, has been as follows (*lbs.*) : Production of woven goods.

	Grey	Other kinds	Total
Average 1896-97 to 1900-01	80,557,484	11,295,465	91,852,949
„ 1901-02 to 1905-06 . . .	109,884,271	25,009,554	134,893,825
„ 1906-07 to 1910-11 . . .	154,123,927	40,007,307	194,131,234
1911-12	192,977,167	59,149,040	252,126,207
1912-13	196,130,071	71,532,912	267,662,983
1913-14	188,450,593	67,955,409	256,406,002

The weaving mills were less affected than the spinning mills by the high price of raw cotton in 1903-04, for there was a considerable advance in the price of cloth, both the home and the foreign demand being good, and in the following year these high prices were still realised when the prices of raw cotton had fallen to normal levels; in consequence the production increased by about 12½ per cent in 1903-04, and by 15·8 per cent in 1904-05. In the two following years the rate of increase was less rapid. The annual increase since 1907-08 has ranged between 2 and 16·9 per cent, the total outturn in 1913-14 reaching 256 million lbs.

Weaving is concentrated in the Bombay mills to an even greater degree than spinning, the mills of that province producing about 85 per cent of the whole quantity woven in British India. The United Provinces produce about 4·2 per cent, the Central Provinces nearly 5·2 per cent, and Madras about 3·6 per cent. The goods woven are mainly grey and bleached piece-goods, these representing nearly 73 per cent of the whole production.

The most important kinds of grey and bleached piece-goods woven in the mills are specified below (in lbs.) :

	Average 1901-02 to 1905-06	Average 1906-07 to 1910-11	1911-12	1912-13	1913-14
Shirtings and longcloths	38,611,145	50,679,465	69,447,175	65,358,088	63,250,051
Dhutis . . .	25,448,365	43,950,296	53,439,511	57,025,695	55,850,403
T. cloths, domestics, and sheetings.	19,376,545	24,817,341	27,156,397	28,079,482	25,224,287
Chadars . . .	13,628,457	15,678,079	21,781,029	24,221,406	22,347,938

The proportion of woven goods other than grey and bleached piece-goods was highest in Madras, where in 1912-13 it was about 66 per cent. In the Central Provinces the proportion was about 23 per cent and in Bombay 27 per cent.

Figures of imports are not readily comparable with figures of production, because the former are recorded in yards and the latter up to the year 1906 have been recorded in lbs. with the exception of grey and bleached piece-goods : the figures of grey and bleached piece-goods are as follows (in millions of yards) :

	Imported	Produced	Percentage of production to importation
Average 1896-97 to 1900-01	1654·21	319·55	19·3
„ 1901-02 to 1905-06	1741·6	457·38	26·3
„ 1906-07 to 1910-11	1749·45	676·19	39·2
1911-12	1848·46	837·72	45·3
1912-13	2303·88	855·71	35·1
1913-14	2327·53	816·66	35·0

The yardage of coloured piece-goods from April 1906 was (in millions of yards) :

	Imported	Produced	Percentage of production to importation
Average 1906-07 to 1910-11	519·20	152·71	29·4
1911-12	589·43	241·24	40·9
1912-13	682·21	295·41	43·3
1913-14	831·77	277·08	33·3

To the figures given above for mills in British India may be added the production in Berar prior to the 1st October 1903 and in the Native States, which is stated below (in lbs.). The States are Mysore, Indore,

Baroda, Nandgaon, Bhavnagar, Hyderabad, Wadhwan, Travancore (Quilon), Kishengarh, Gwalior (Ujjain), and Kolhapur. The production of one mill in Pondicherry has been reported from April 1909 :

	Yarn			Grey and woven goods		
	Nos. 1 to 25	Above No. 25	Total	Bleached	Other kinds	Total
Average 1896-97 to 1900-01 .	8,700,997	321,672	9,022,669	2,576,912	114,698	2,691,610
„ 1901-02 to 1905-06 .	19,106,940	916,344	20,023,284	5,366,540	319,098	5,685,678
„ 1906-07 to 1910-11 .	26,399,815	2,091,697	28,491,513	9,158,485	1,054,757	10,213,243
1911-12 . . .	31,536,766	2,651,766	34,188,532	11,923,976	2,594,073	14,518,049
1912-13 . . .	34,791,119	3,099,205	37,890,324	14,981,320	2,826,699	17,808,019
1913 14 . . .	34,021,296	3,902,878	37,924,174	14,312,856	3,669,692	17,982,548

JUTE MILLS

(For Tables see pages 73 to 75)

The record of the jute industry, as disclosed by these tables, may well be said to be one of uninterrupted progress. The following statement shews quinquennial averages from the earliest year for which complete information is available with actuals for the last four years; and the figures in brackets represent the variations for each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100. It will be seen that the number of looms and spindles in operation have increased to a very much larger extent than either the number of mills at work or the amount of capital employed.

	Number of mills at work	Authorised Capital (in lakhs of ₹)	Number (in thousands) of Persons employed	Looms	Spindles
1879-80 to 1883-84 .	21 (100)	270·7 (100)	38·8 (100)	5·5 (100)	83 (100)
1884-85 to 1888-89 .	24 (114)	341·6 (126)	52·7 (136)	7 (127)	138·4 (157)
1889-90 to 1893-94 .	26 (124)	402·6 (149)	64·3 (166)	8·3 (151)	172·6 (196)
1894-95 to 1898-99 .	31 (148)	522·1 (193)	86·7 (223)	11·7 (213)	244·8 (278)
1899-1900 to 1903-04 .	36 (171)	680 (251)	114·2 (294)	16·2 (295)	334·6 (380)
1904-05 to 1908-09 .	46 (219)	960 (355)	165 (425)	24·8 (451)	510·5 (580)
1909-10 . . .	60 (286)	1,151 (425)	204·1 (526)	31·4 (571)	645·9 (734)
1910-11 . . .	58 (276)	1,150 (425)	216·4 (558)	33·1 (602)	682·5 (776)
1911-12 . . .	59 (281)	1,193 (441)	201·3 (519)	32·9 (598)	677·5 (770)
1912-13 . . .	61 (290)	1,196·5 (442)	204 (525)	34 (618)	708·7 (805)
1913-14 . . .	64 (305)	1,309·21(483)	216·3 (557)	36 (654)	744·3 (846)

The production of the mills has increased to a still greater extent. The following figures shew the exports of jute manufactures and the declared values for the quinquennial periods. The combined value of gunny bags and gunny cloth exported by sea in 1913-14 is over twenty-two times as great as the average value of the exports in the period 1879-80 to 1883-84.

	Jute manufactures		
	Gunny bags in millions of number	Gunny cloths in millions of yards	Value in lakhs of ₹
1879-80 to 1883-84	54·9 (100)	4·4 (100)	124·9 (100)
1884-85 to 1888-89	77 (140)	15·4 (350)	162·9 (130)
1889-90 to 1893-94	111·5 (203)	41 (932)	289·3 (232)
1894-95 to 1898-99	171·2 (312)	182 (4,136)	518 (415)
1899-1900 to 1903-04.	206·5 (376)	427·2 (9,709)	826·5 (662)
1904-05 to 1908-09	257·8 (469)	698 (15,864)	1,442·7 (1,154)
1909-10	364·4 (664)	940·1 (21,366)	1,709·6 (1,369)
1910-11	360·9 (657)	955·3 (21,711)	1,699·4 (1.361)
1911-12	289·9 (528)	871·5 (19,807)	1,600·8 (1,282)
1912-13	311·7 (568)	1,021·8 (23,223)	2,287·1 (1,831)
1913-14	368·8 (672)	1,061·2 (24,118)	2,827·3 (2,264)

Up to the last quinquennium the exports of raw jute were marked by increases from year to year though the improvement was not so rapid as in the case of manufactures. A slight decrease in the exports occurred in 1909-10 as compared with the figures for the preceding quinquennial period and a further decline in 1910-11, but a marked recovery was made in 1911-12 which was accentuated in 1912-13 :—

	Jute, raw, in millions of cwt.
1879-80 to 1883-84	7·5 (100)
1884-85 to 1888-89	8·9 (119)
1889-90 to 1893-94	10 (133)
1894-95 to 1898-99	12·3 (164)
1899-1900 to 1903-04	12·7 (169)
1904-05 to 1908-09	15·09 (201)
1909-10	14·6 (195)
1910-11	12·7 (169)
1911-12	16·2 (216)
1912-13	17·5 (233)
1913-14	15·4 (205)

The price of raw jute reached its highest point in 1906-07, the rate being R65 per bale; in 1907-08 it dropped to R42 per bale, and the fall was accentuated in 1908-09 and 1909-10, the price having declined to 36·4 and R31 per bale respectively. In 1910-11, the price rose again to R41-8-0, to Rs. 51-4-0 in 1911-12, to R54-12-0 in 1912-13, and further to R76-12-0 in 1913-14. The following are the quinquennial average prices per bale (400 pounds) of ordinary jute calculated from the prices current published by the Bengal Chamber of Commerce :—

	Price of jute ordinary, per bale of 400 lbs. R a. p.
1879-80 to 1883-84	23 8 0 (100)
1884-85 to 1888-89	23 3 2 (99)
1889-90 to 1893-94	32 6 5 (138)
1894-95 to 1898-99	30 12 0 (131)
1899-1900 to 1903-04	32 1 7 (137)
1904-05 to 1908-09	44 13 6 (191)
1909-10	31 0 0 (132)
1910-11	41 8 0 (177)
1911-12	51 4 0 (218)
1912-13	54 12 0 (233)
1913-14	76 12 0 (327)

The average prices of gunny cloth have been as follows :—

	Price of Hessian cloth 10 ½oz. 40″ per 100 yds. R a. p.
1879-80 to 1883-84	10 7 11 (100)
1884-85 to 1888-89	8 0 7 (77)
1889-90 to 1893-94	10 6 6 (99)
1894-95 to 1898-99	9 11 8 (93)
1899-1900 to 1903-04	10 2 10 (97)
1904-05 to 1908-09	11 14 1 (112)
1909-10	9 3 6 (88)
1910-11	9 5 6 (89)
1911-12	11 14 0 (113)
1912-13	16 6 0 (156)
1913-14	17 0 0 (162)

PAPER MILLS

[For Tables see pages 76 and 77]

The number of paper mills in India in 1913 was nine, three in Bengal, four in the Bombay Presidency, one in the United Provinces, and one in the Gwalior State. The estimated authorised capital of these mills was about R54 lakhs. The value of the output reported rose to R81·5 lakhs in 1910, the highest on record, but fell in 1912 to 77 lakhs, rising again to R80 lakhs in 1913. Two of the mills, however, did not work in the year under review.

The competition of cheap wood-pulp paper imported from Europe has checked the development of paper-making by older methods in India, and the most successful mills are those which have Government contracts for the supply of cheap foolscap, blotting paper, notepaper, and envelopes. In 1909 the value of the paper manufactured in India and that of imported paper were R79 lakhs and R100 lakhs, respectively. In 1913 the corresponding figures were R80 and R159 lakhs, the value of the imports having increased in the meantime by 59 per cent, while the internal production has increased by 1·6 per cent only.

The values of country-made and imported paper during the last five years have been as follows :

	Produced in Indian mills R	Imported R
1909	79,12,000	1,00,03,000
1910	81,52,000	1,16,06,000
1911	80,04,000	1,16,12,000
1912	77,03,000	1,35,83,000
1913	80,37,000	1,59,00,000

WOOLLEN MILLS

(For Tables see pages 78 and 79)

Of the seven woollen mills now at work in India, one is in the Mysore State, and of the remaining six, four represent a paid-up capital of R38,83,870 (£258,925), while the capital of the other two which are private mills at Calcutta and at Bombay, is not stated. Two of the mills, that at Cawnpore in the United Provinces, and that at Dhariwal in the Punjab, have between them a paid-up capital of 32 lakhs (£213,000) or 65 per cent of the whole, and produce 73 per cent of the total outturn of the Indian mills. They weave cloth for the use of the army and police, and articles of superior quality generally, using for the high class goods Australian wool either pure or mixed with Indian wool.

There was an increase during the year under review in the number of looms as well as of spindles. The year 1905 was a record year in respect of both the quantity and the value of the goods produced. In 1906 and 1907, owing to the high price of wool, there was a considerable shrinkage in production; a distinct recovery was revealed by the statistics for 1908, and a further advance in output was recorded in 1909 though the total value showed a slight decrease. The improvement has since been maintained, the statistics for 1913 surpassing all previous records. The quantity of woollen goods imported into India is very much greater than the production of the Indian mills. Piece-goods and shawls from the United Kingdom and Germany make up the bulk of the imports. The values of country-made and imported woollen goods compare as shown in the marginal table. There are in various places factories for the weaving of carpets and rugs, and of *pattu* and *páshmina*, but though these industries are in the aggregate extensive, they are individually small, and weaving is done by hand-looms.

	Produced in Indian mills	Imported
	₹	₹
1909	43,25,000	2,01,85,000
1910	47,20,000	2,92,97,000
1911	51,04,000	3,45,43,000
1912	53,83,000	3,04,42,000
1913	61,66,000	3,84,12,000

The exports of woollen goods from India consist almost entirely of carpets and rugs, of which about three-fourths go to the United Kingdom and the greater part of the remainder to the United States. The value of Indian carpets and rugs exported during the last five calendar years is stated in the margin.

	₹
1909	26,68,000
1910	24,55,000
1911	24,48,000
1912	22,62,000
1913	22,30,000

MINERAL PRODUCTION

(For Tables see pages 80 to 85)

The minerals for which figures are recorded in these tables are those comprised in Group I of the minerals dealt with in the Records of the Geological Survey of India, that is, those minerals for which approximately accurate and full returns are obtainable.

Salt.—Statistics are supplied annually by all Local Governments and Administrations. Full details of the production and consumption of salt and the administration of the salt revenue are contained in Volume II (Financial) of the Statistical Abstract.

Coal.—The figures are compiled chiefly from the statutory returns of the output furnished to the Chief Inspector of Mines in India by the Managing Agents of mines regulated by the Indian Mines Act, VIII of 1901. Figures for mines situated in Native States and for mines not coming within the operation of the Indian Mines Act are furnished by the Director, Geological Survey of India. Details regarding the coal mining industry in India are given separately in the next section relating to Coal Mines.

Gold.—The figures are supplied by the Director, Geological Survey of India. About 94 per cent of the total output of gold in 1913 was derived from the Kolar gold field in Mysore, the quantity won being 559,198 ounces, valued at ₹3,22,52,903. During the last decade the production of this mine reached its highest point in 1905 when 616,758 ounces were raised. In 1906 the quantity won was 565,208 ounces and this figure fell to 535,085 ounces in 1907. The figures for the later years reveal a small improvement. The Nizam's mine at Hutti in Hyderabad comes next, but at a respectable distance, to the Kolar gold field. Its output in 1913 was 20,012 ounces, valued at ₹11,58,418, or 3·3 per cent of the total output of Indian gold. This mine was opened in 1903, when 3,809 ounces of bar gold were won. The only other mines from which gold was raised in 1910 were those in the Dharwar district of Bombay and the Anantapur district of Madras. The Dharwar mines gave an output of 2,993 ounces in 1911 compared with 737 ounces in 1910 and 5,616 ounces in 1909, but no output was recorded in the year under review. The Anantapur mines gave their first output of gold during the year 1910, the amount being 2,532 ounces, valued at ₹1,51,800. The output increased steadily to 11,019 ounces, valued at ₹6,47,913, in 1913. Gold mining was carried on in the North Arcot district of Madras from 1893 till 1900, the highest yield (2,854 ounces) being obtained in the year 1898. The Kyaukpazat mine in Upper Burma was worked until 1903, when the pay chute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Myitkyina, and 216 ounces of gold were obtained in 1904; the amount steadily increased from year to year and reached 8,445 ounces in 1909, but fell to 4,994 ounces in 1912; it rose to 5,329 ounces again in 1913. The small quantity of gold produced in the Punjab, the Central Provinces, and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way. The average earnings of the workers are very small, and the gold thus won is used locally for making jewellery.

Petroleum.—Figures of production are supplied by the Director, Geological Survey of India. Petroleum is found in India in two distinct areas—one on the east, which includes Assam, Burma, and the islands off the Arakan coast. This belt extends to the productive oil fields of Sumatra, Java, and Borneo. The other area is on the west, and includes the Punjab and Baluchistan, the same belt of oil-bearing rocks being continued beyond the borders of British India to Persia. Of these two the eastern area is by far the most important, and the most successful oil fields are found in the Irrawaddy valley. Yenangyaung is the oldest and most developed of these fields. Native wells have been at work here for over 100 years, and in 1886, prior to the annexation of Upper Burma, the output is estimated to have averaged over 2 million gallons a year. Drilling was begun in 1887. The output of the field rose to 10 million gallons in 1894, and to 40 million gallons in 1902. Since then progress has been more rapid and the output reached in 1913 a little over 200 million gallons, surpassing all previous records. The Yenangyat field yielded a very small supply of petroleum before 1891, in which year drilling was started by the Burma Oil Company. For some years progress was slow, but in 1903 the production reached 22 million gallons. Since then the output has

decreased and was about 5½ million gallons in 1913. Singu now holds the second place among the oil fields of India. Petroleum was struck at the end of 1901, and in 1903, 5 million gallons were obtained. In 1907 and 1908 the production of this field was 43 million gallons, and after a fall to 31½ million gallons in 1910 it rose from 50½ million gallons in 1911 to 63½ million gallons in 1913. Several of the islands off the Arakan coast are known to contain oil deposits, but their value is uncertain. About 14,000 gallons were obtained from the Eastern Barongo Island near Akyab, and a little over 29,000 gallons from Ramri Island in the Kyaukpyu district during 1913. Oil was struck at Minbu in 1910, the production for that year being 18,320 gallons, which increased in 1912 to a little under 4 million gallons but fell in 1913 to a little over 3 million gallons. The existence of oil in Assam has been known for many years and an oil spring was struck near Makum in 1867. Nothing more, however, was done until 1883, and from that year up till 1902 progress was slow. Since that year the annual production has been between 2½ and 4½ million gallons.

On the west, oil springs have been known for many years to exist in the Rawalpindi and other districts in the Punjab. The total output of the province in 1911 was 1,400 gallons and this figure fell to 950 gallons in 1912, showing a little rise in 1913 to 1,200 gallons. In Baluchistan, geological conditions are adverse, and though some small oil springs have been discovered, attempts to develop them have not hitherto been successful.

The consumption of kerosene in India (excluding Burma) is rapidly increasing and has risen from about 79 million gallons in 1900-01 to 174 million gallons in 1913-14. The enormous increase in the output of the Burma oil fields has reversed the position held by foreign and Indian oil in the market. In 1908-09, however, the proportion of foreign oil consumed was a little higher than that of Burma oil as a result of a contraction in her shipments concurrently with a large increase in imports from foreign countries, but from 1909-10 Burma oil has regained its position.

Chromite.—The exploitation of the chromite deposits in Baluchistan, which were discovered by the Geological Survey of India in 1901, was begun in 1903. In 1906 the output amounted to 4,375 tons, which rose in 1907 to 7,274 tons, valued at R1,45,485, the highest on record, but fell to 2,890 tons, valued at R57,740, in 1912, though the quantity rose to 3,414 tons in 1913, it was valued only at R17,433, thus showing a decrease in value as compared with previous years. At present the ore is raised entirely for export. The opening up of the Mysore chromite deposits commenced in 1907 with an initial output of 11,029 tons, valued at R2,20,580. The production in 1909 was 4,925 tons, valued at R29,550, but nothing was produced from 1910 to 1912 due to the continuance of low prices. In 1913 the production was 1,414 tons, valued at R12,326. The year under review shows for the first time in the Singhbhum district (Bihar and Orissa) an output of 848 tons of chromite, valued at R6,784.

Diamonds.—Diamonds are produced in the mines of the Vindhyan belt, which stretches through the Central Indian States of Panna, Charkhari, Ajaigarh, and Bijawar. The production in this field was 44 carats, valued at R7,133, in 1911, falling considerably in 1912 to 9 carats valued at R5,997. In 1913 it showed an increase to 79 carats, valued at R26,536. In 1909, 111 carats were obtained from Banganapalli, Madras, but the production in 1911 was insignificant, being 9 carats only. In 1913, 37 carats were obtained from Karnul district.

Graphite.—Mining for graphite continued during 1910 and 1911 in the Travancore State, where the mineral occurs under geological conditions similar to those of the richer deposits being worked in Ceylon. The production in 1911 was 3,993 tons. Owing to the difficulties of working, the mine was shut down since 1912. Some 54 tons of the mineral were obtained from the Vizagapatam mine in Madras in 1911, but no output was recorded during 1912 or 1913.

Iron-ore.—The production of the Tata Iron and Steel Co.'s mines in Maurbhanj (Orissa) appears in the statistics for the first time in 1911, the amount being 300,000 tons, valued at R3,00,000. The output rose in 1912. to 471,232 tons, valued at R4,71,232, but fell to 247,025 tons, valued at R3,46,644, in 1913. The Bengal Iron and Steel Works obtains its ores from Bengal and Chota Nagpur. Elsewhere in India, namely, in the Central Provinces, the United Provinces, Madras, Central India, Hyderabad, Mysore, Rajputana, Burma, and the Punjab, operations are carried on on a very small scale for use in the small native furnaces. The value reported for the ore raised in Orissa, Chota Nagpur, and Bengal works out to an average of R1·5 per ton. Elsewhere the reported values are higher, about R4 per ton.

Jadestone.—The substance which passes as jadestone is mainly the mineral jadeite, which occurs in an altered igneous dyke in serpentine in the Myitkyina district of Upper Burma and also in the form of boulders in a tertiary conglomerate and in alluvium. It is worked in an unadministered tract, and there are no reliable figures of production. The figures given in the tables are those of the exports by sea from Rangoon, together with the exports overland to China.

Lead and Silver.—The smelting of lead slags and lead ore at Bawdwin by the Burma Mines, Ld., resulted in a production in 1910 of 12,404 tons of lead and 44,300 ounces of silver worth R23,86,220 and R66,459, respectively, rising in 1911 to 13,259 tons of lead and 103,850 ounces of silver, valued at R27,19,064 and R1,73,633, respectively. The output in 1913 amounted to 5,858 tons of lead and 125,209 ounces of silver, valued at R10,72,674 and R2,30,071, respectively.

Magnesite.—It is worked in the Chalk Hills near Salem in the Madras Presidency. The output in 1913 was 14,086 tons, as against 15,379 tons in 1912. In the year 1913, this mineral is reported to have been worked also in Mysore with an output of 2,112 tons.

Manganese ore.—This industry commenced some twenty years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizagapatam mines. Since 1904, when the total output was 150,190 tons, the progress of the industry has been remarkable owing to the high prices prevailing. In 1905 production reached 247,427 tons ;

the following year it was more than doubled (571,495 tons), and in 1907 the figures again rose to 902,291 tons. In 1909, on account of the fall in prices the output contracted to 642,675 tons, but it almost regained its former position in 1910 when the production rose to 800,907 tons. It fell again from 670,290 tons in 1911 to 637,444 tons in 1912, showing a rise again to 815,047 tons in 1913, which is the largest on record since 1908. The ore raised in the Central Provinces is of a very high grade, ranging from 50 to 54 per cent of the metal, and in consequence of its high quality is able to pay the heavy tax of freight over 500 miles of railway, besides the shipment charges to Europe and America, for the whole of the ore is exported to be used principally in steel manufacture in the United Kingdom, Germany, and the United States.

The largest proportion of ore is raised in the Nagpur and the Balaghat districts, the Bhandara district ranking next. Mining operations are also in progress in the Chhindwara district, in the Jhabua State in Central India, in the Panch Mahals of Bombay, in the Sandur State and the Vizagapatam district in Madras, in the Mysore State and in the Gangpur State in Orissa. The fall in prices in the latter part of 1907 produced by 1909 an almost complete cessation of mining for lower grades of ore at mines far removed from railways. Owing to an excess of production over exports the stocks on the mines at the end of 1908 stood at the high total of nearly 300,000 tons. The total value of each year's production of Indian manganese ore has been arrived at by taking the export value per ton in that particular year. The whole of this was not realised in 1907, 1908, and 1909 owing to actual exports being much less than the production. The rise in the price of ore during 1910 resulted in a considerable increase in the total production, namely, from 642,675 tons, valued at R88,61,665,in 1909,to 800,907 tons,valued at R1,27,41,856,in 1910, but with a fall in price in 1911 the output also fell to 670,290 tons, valued at R97,32,028. In 1912 this falling off was more than made good by a rise in the value of the outturn, though there was a slight fall in the amount produced, namely, 637,444 tons. The amount produced in 1913 was 815,047 tons, valued at R1,81,65,516.

Mica.—The chief centres of production are the Nellore district in Madras, the Hazaribagh and Gaya districts of Bihar and Orissa, and certain States in Rajputana. Prospecting has been carried on in various districts of Madras, the Central Provinces, Upper Burma, and Assam, and in the Kishangarh State. The quantity of mica produced in 1906 (52,543 cwts) showed a very large advance on the average of the preceding five years (21,864 cwts). In 1908 it rose to 53,543 cwts, but in 1910 it fell to 22,699 cwts, rising again to 33,896 cwts in 1911, to 43,835 cwts in 1912, and to 45,741 cwts in 1913.

Monazite.—This mineral has now taken an important place in the list of minerals of economic value produced in India. At present it is worked in Travancore by the London Cosmopolitan Mining Co. The output which amounted in 1911 to 832 tons, valued at R3,60,660, rose to 1,235 tons, valued at R6,30,180, in 1913.

Rubies.—The figures in the tables represent the quantity and value of the rubies raised by the Burma Ruby Mines, Ld., in the Ruby Mines district of Upper Burma. There are no statistics available of the quantity and value of rubies raised by Indian miners in the district. Rubies are also found in the Mandalay and Myitkyina districts, but the production is on a very small scale. The large decrease in output and value in 1908 was due to a slump in the ruby market, but there was a slight recovery from 1909 to 1912. In 1913 it showed a slight decrease in output as well as in value.

Saltpetre (Nitrate of Potash).—This article, which is largely produced for export, was in former years of much greater importance than now, the diminished demand for gunpowder and for the preservation of food, with the competition of the nitrates, having operated to prevent an expansion of the exports. It is most largely produced in Bihar, whence the article is sent to Calcutta for export after refinement. The production of saltpetre was 311,453 cwts in 1912, but the amount produced in 1913 was 293,161 cwts, the production in Madras not being available.

Tin-ore.—Tin-washing is carried on in the Tenasserim Peninsula, and also in the Bawlake State of Karenni, chiefly by Chinese immigrants in an uncertain and unsystematic way. The production of tin-ore in 1911 was 1,946 cwts, rising to 3,493 cwts in 1912, but showing a slight fall to 3,412 cwts in 1913.

Wolfram.—The great activity displayed in prospecting for wolfram in Tavoy and to a lesser extent in Mergui in Burma resulted in the output of 395 tons in 1910, rising to 1,688 tons, valued at R19,16,441, in 1913.

COAL MINES

(For Tables see pages 86 to 91)

All returns of production in the case of mines under the Indian Mines Act, VIII of 1901, are sent direct by the managing agents of mines to the Chief Inspector of Mines, who forwards them to this Department. The Director, Geological Survey of India, supplements them by the returns sent to him by Local Governments and Political Agents for non-Act and Native States, mines. Information regarding imports and exports has been taken from the Seaborne and Railborne Trade Returns published by this Department. As regards consumption estimates have been made from data furnished by the Railway and Steamer Companies, the Port Trusts, mill and factory owners.

Production. Table No. 28 shows the quantity of coal produced in each province in India from 1878 to 1913. Although coal mining has been now practised in India for more than a century and although production and consumption have shown a steady increase which has been especially notable in the last decade, the development of the coal resources of the country is as yet very incomplete.

The total production in 1913 amounted to 16,208,000 tons or about 10 per cent more than was produced in the previous year, and nearly 3,440,000 tons more than that during the famous boom of 1908, when the out-

put was 12,770,000 tons. To this may be added some 324,000 tons estimated to have been taken out from the mines by miners for their own use. The total production in 1913 would thus come to some 16,532,000 tons, but for purposes of comparison the figure of 16,208,000 tons first stated must be adopted. In the year under review the coal industry suffered to a certain extent from excessive and abnormal floods, fires in some places, and want of labour which was diverted to the rice cultivation owing to early monsoon rains. There was also some shortage in railway wagons caused by the great demand for fodder transport.

The coal-fields which have been worked in recent years are classified below, with the quantity produced in 1913, according as they belong geologically to the Gondwana system of strata, chiefly composed of sandstones and shales deposited in fresh water and by rivers, or to Tertiary (or Cretaceous) beds :—

GONDWANA COAL-FIELDS—

	1913 tons	Per cent of total
Bengal and Bihar and Orissa—		
Daltonganj	85,300	·5
Giridih	807,000	5
Jherria	8,609,000	53
Rajmahal	3,600	..
Ramgarh-Bokaro	3,000	..

About 97·6 per cent of the coal supplies of India is obtained from the Gondwana coal-fields and 2·4 per cent from Tertiary beds.

The Raniganj field and the Jherria field are in the Damuda Valley and produce 86 per cent of the total output. The Raniganj field (where the first Indian coal mine was opened in 1820) held the first place as regards production up to 1905, but now stands second, its yield in 1913 having been 5,327,000 tons or 33 per cent of the year's total production. It covers an area of about 500 square miles, mostly within the district of Burdwan (Bengal), but stretching also across the boundaries into Bankura (Bengal), Manbhum and the Santhal Parganas (Bihar and Orissa). The Jherria field in Bihar and Orissa which was opened in 1893 went ahead of Raniganj in 1906 and it has succeeded in maintaining the lead since that date the output in 1913 being 8,609,000 tons (that is, 53 per cent of the total production). Of the remaining fields in Bihar and Orissa the Giridih field, a small isolated patch to the north of the Damuda Valley, produced in 1913, 807,000 tons or 5 per cent of the total. The Daltonganj field, further west in the Palamau district, was opened in 1901 ; it yielded in 1913, 85,300 tons. The quantity so far obtained from the remaining three fields has been limited. As regards the Rajmahal coal-field, work had been discontinued since the opening of the Railway to Raniganj, but was resumed in 1897. Its output in 1913 was 3,600 tons. In the Ramgarh-Bokaro field, lying immediately to the west of Jherria in the Damuda Valley, mining was begun in 1908, and its yield in 1910 was 2,200 tons, rising to 5,300 tons in 1912 but decreasing to about 3,000 tons in the year under review. The Sambalpur field was opened for the first time in 1909 and its production rose from 800 tons in 1910 to 42,800 tons in 1913. These seven coal-fields accounted for 92 per cent of the coal raised in India in 1913. Owing to the wide extent of these fields, the fair quality of coal which they contain, and their comparative nearness to the sea-coasts, this proportion is not likely to decrease in the near future.

Outside Bengal, and Bihar and Orissa, the most important mine is the Singareni. Work was begun at Singareni near Yellunda in the Nizam's Dominions in 1887, and progerss has been more rapid than in any other place outside Bengal and Bihar and Orissa, the average annual production during the last ten years having been some 469,000 tons. Its output in 1913 was 552,000 tons. The Ballarpur mine in the Chanda district was opened in 1904 to take the place of the Warora colliery which was closed down in 1906, and the work of extracting coal began seroiusly in 1908. The output that year was 45,000 tons ; in 1911 it rose to 96,600 tons, falling to 79,700 tons in 1913. The Umaria mine in the Rewah State in Central India was started in 1884. Its progress was steady up to the year 1903, when the maximum production of 193,300 tons was reached ; since then there has been a retrogression and the output in 1913 was 149,000 tons. In the Central Provinces the Mohpani and Pench Valley fields lie respectively at the northern and southern fringes of the Satpura range. The former is situated in the Narsingpur district in the south of the Nerbudda alluvial valley. The old mine was opened in 1860 and was abandoned in 1902 after all the available coal—some 460,000 tons in the aggregate—had been raised from it. The new Mohpani mine has been worked by the Great Indian Peninsula Railway Company since 1904, and its output was in 1913, 64,900 tons. The Pench Valley field in the Chhindwara district was opened in 1905 ; its yield rose from 1,100 tons in 1905 to 90,700 tons in 1912, but decreased slightly to 89,800 tons in 1913.

Next with reference to Tertiary or cretaceous coal-beds. The most important of these are in north-east Assam, where the Makum coal-fields have been worked since 1882, and coals obtained have a remarkably low percentage of ash and a high calorific value. The output was 270,900 tons in 1913. Next in rank of importance come the Khost mines on the Sind-Pishin Railway in Baluchistan and the Salt Range mines of the Punjab, both have been worked now for twenty-seven years, but their production in 1913 was only 45,600 tons and 51,000 tons respectively. The coal produced at Palana in the Bikaner State is really a dark brown lignite, and its production during recent years has been restricted in consequence of special precautions necessary to prevent underground fires. Its production in 1913 was 18,800 tons in comparison with, 8,200 tons in the previous year.

Prices.

The value of the coal produced in India is reported annually by mine-owners. It represents the actual or estimated wholesale price of coal at the pit's mouth. The average value, as thus defined, of all the coal produced in each province in India in each of the last thirteen years is given in Table No.29. In 1913 the average value was Rs. 3-8, the same as in the years 1907 and 1909. The lowest value, namely, Rs. 2-8 per ton, was that of 1905 and the highest (Rs. 3-15) that in the boom of 1908, when demand kept ahead of supply.

	Average declared value per ton	Average value at the pit's mouth per ton
	Rs. A. P.	Rs. A. P.
1909	9 0 0	3 8 0
1910	8 11 0	3 1 0
1911	8 7 0	2 15 0
1912	10 1 0	3 6 0
1913	9 13 0	3 8 0

The marginal table compares the average value at pit's mouth of Indian coal with the declared export value per ton in each of the last five years. The declared export value is nearly three times the value at the pit's mouth. The total estimated value of the output in 1913 was Rs. 570 lakhs as against Rs. 496 lakhs in 1912.

With the above average value may be compared the values at the pit's mouth of coal in foreign countries as shown in the margin (the figures represent the average of the five years ending 1912). In comparing the average value of the coal raised in different countries, it must be remembered that this value is affected by many circumstances, such as the quality of the coal, its accessibility, the machinery in use, nearness to the surface, etc., besides the differences in the cost of labour and transport. In India, the coal now being worked is near the surface, and labour may be said to be cheap. Indian coal, therefore, has a lower value at the pit's mouth than the coal of any other country. After India, the value is lowest in the United States and in South Africa. Of the principal coal-producing countries in Europe, the United Kingdom has the lowest average value at the pit's mouth ; and South Africa has the lowest average value of all places in the British Empire except India.

	Rs. A. P.
France	9 6 11
Germany	7 12 4
United Kingdom	6 5 8
Japan	5 12 11
Australia	5 9 11
United States of America	4 6 8
South Africa	4 4 0
India	3 5 10

The cost per ton of production in India varies considerably in the different coal-fields. The variation in the Raniganj field is from Re. 1-14 to Rs. 2-8 and in the Jherria field from Re. 1-8 to Rs. 2. In the Giridih field the cost per ton is stated to be about Rs. 2-4 per ton. In the fields of Central India and the Central Provinces the rate varies from Rs. 2-8 to Rs. 5-10 per ton, whilst in the Punjab very much higher rates prevail.

The comparative average prices per ton of Bengal coal at Calcutta and of Indian and Welsh coal at Bombay and Karachi since 1901 are shown in Table 30. The figures are taken in the case of Bombay from the *Bombay Market Report* and in the case of Calcutta and Karachi from the *Prices Current* of the respective Chambers of Commerce. In 1913 there was a general rise in prices of both Indian and Welsh coal at all three ports mentioned above. In 1914 prices (average for the twelve months ending December) of Indian coal rose further at Calcutta, but those at Bombay and Karachi for both Indian and Welsh coal fell.

Freights.

	From Raniganj	From Jherria
	Rs. A. P.	Rs. A. P.
To Calcutta	2 4 0	3 2 0
„ Cawnpore	6 4 0	5 15 0
„ Jubbulpore	6 15 0	5 11 0
„ Delhi	8 5 0	7 15 0
„ Lahore	10 1 0	9 13 0
„ Bombay	11 4 0	11 4 0
„ Karachi	12 14 0	12 10 0

In order to get an idea of the comparative prices of Bengal coal in the principal centres of industry in India, the freight has to be added to the f.o.r. prices. The marginal table shows the freight per ton of coal for full wagon loads at owner's risk (owners to load and unload) from the Raniganj and Jherria fields in 1913.

To Bombay	about	6 11 0
„ Karachi	„	6 11 0
„ Madras	„	4 15 0
„ Rangoon	„	4 10 0

The average freight per ton of coal by sea from Calcutta during 1913 was as stated in the margin. The rates were on the whole lower than in 1912.

Labour

Table No. 31 shows the total number of men, women, and children employed in coal mines in India during each of the last thirteen years. This number represents the " average daily attendance " throughout the year and is obtained by dividing the total number of attendances by the number of working days in each year. Coal-

mining employs more labour than any other mining industry and will probably continue to do so for many years. In 1913, 144,966 persons were employed and were distributed among the various provinces as follows :—

	Men	Women	Children	TOTAL	Per cent of total
Bihar and Orissa	52,321	33,279	1,852	87,452	60·3
Bengal	25,106	12,966	489	38,561	26·6
Hyderabad	7,817	2,211	..	10,028	7
Central Provinces	2,067	573	44	2,684	1·9
Assam	1,973	458	47	2,478	1·7
Central India	1,253	340	..	1,593	1·1
Baluchistan	1,071	..	16	1,087	·7
Punjab	873	..	19	892	·6
Rajputana (Bikaner)	161	24	..	185	·1
North-West Frontier Province	6	..	..	6	..
TOTAL	92,648	49,851	2,467	144,966	100

The great proportion of those employed are the aboriginal Dravidians from the mountainous country of Chota Nagpur and the Central Provinces, but a large number of other castes are employed, particularly in the outlying fields. The majority of the workmen follow the vocation of agriculture as well as mining, and return to their homes during the periods of sowing and reaping, the result being that, at such times, the output of many of the mines is greatly restricted.

The output of India in 1913 per person employed is compared in the marginal statement with the results of the immediately preceding five years. The Indian miner is still to some extent a miner by caprice, and, as stated above, in a year of agricultural prosperity the scarcity of labour becomes acute. Epidemics of cholera and other diseases are not infrequent and cause a shortage of labour. As the workings get deeper the need of a mining population, which specialises in mining, will become greater. The use of electricity on the coal-fields is extending—though capable of yet further utilization, particularly for haulage and pumping—and the employment of mechanical coal cutting appliances will be necessary where the seams are narrow and remote from the surface. The use of machinery, particularly during the last ten years, is rapidly extending. At the larger collieries modern plants of good design are now the rule rather than the exception. At the smaller mines, however, there is much need of improvement.

	Above and below ground Tons	Below ground only Tons
1908	98·8	153·5
1909	99	153
1910	103·8	158·6
1911	109·5	166·7
1912	110·9	170·4
1913	111·8	172·2

Imports.

The quantities of foreign coal imported into India from the principal countries during the last twenty-three years are given in table 32. For the first ten years quinquennial averages have been given. The figures represent private merchandise only and do not include Government stores, the imports of which amounted to 212,900 tons in 1913 as against 50,900 tons in 1912 and 21,400 tons in 1911. The greatest quantity imported in any one year of the series was some 820,000 tons, valued at Rs. 1,47,00,000 in the year 1894. The statistics for succeeding years are marked by considerable fluctuations. The year 1910 showed a considerable fall from 490,000 tons in 1909 to 316,000 tons—a contraction of 174,000 tons or 35·6 per cent. The arrivals in 1912 were on a scale unknown since 1895, the total amounting to 561,000 tons—an increase of 242,000 tons or 76 per cent over the preceding year ; this is attributed to the fact that high coasting freights and the congestion on Indian Railways drove coal users, more particularly in the west of India, to find fuel supplies abroad. In 1913 the imports increased further by 84,000 tons or 15 per cent to 645,000 tons, the largest on record since 1895. Bombay has naturally been the largest importer, and Sind the second. The United Kingdom has always supplied by far the greatest part of the imported coal. On the average of the twenty-three years of the series, Australia holds the second place and Japan the third with respective shares of 25,000 tons and 20,000 tons respectively. The imports from Natal was insignificant until 1907. Natal, however, has now gone ahead of both Australia and Japan. Imports from other countries during the year 1913 aggregated 175,000 tons, of which Holland contributed 51,000 tons, Portuguese East Africa 78,000 tons, and the Transvaal 31,000 tons. The countries that contributed to the increase were the United Kingdom, Natal, Portuguese East Africa, and Transvaal. The United Kingdom sent to India 185,000 tons in place of 145,000 tons in the previous year. The arrivals from Japan were the same as last year, namely, 97,200 tons. Imports from Natal amounted to 136,700 tons in 1913 and were the heaviest recorded. Natal's share in 1912 was 96,000 tons and in 1911 some 15,000 tons. The imports from Australia, which in 1912 amounted to 92,000 tons, declined to 51,000 tons in 1913.

Exports.

The total quantity of Indian coal exported from India during the last twenty-three years and the share taken by each of the principal importing countries are shown in table 33. As in the case of statistics of imports, quinquennial averages only are given for the first ten years. Bunker coal is not included in this statement which relates only to coal shipped as private merchandise to foreign ports. The exports rose in proportion to the expansion in production up to the year 1906 ; since then there was a progessive decline in the ratio up to 1909. This decline was arrested in 1910 but there was again a contraction—though a small one—in the following three years. On the average of the seven years 1900 to 1906 the exports were 8 per cent of the total production of Indian coal, as against 6 per cent on the average of the succeeding seven years 1907 to 1913. In 1913 the ratio was 4·7 per cent. Almost all the coal shipped as private merchandise from India is sent from Calcutta. Ceylon and Straits Settlements are the two principal markets for Indian coal, and of the total quantity shipped in 1913, 56·1 per cent was declared for Ceylon, and 26 per cent for the Straits. Sumatra takes more coal from India than formerly and is now India's third-best customer (13·5 per cent). From 1902 to 1906 the total exports abroad increased rapidly till they reached 1,003,000 tons in 1906. In 1907 there was a decrease to 658,000 tons, which was ascribed to increased industrial activity in India itself ; and the shipments in subsequent years were marked by fluctuations until 1910, when there was a sharp rise to 988,000 tons, the increase being one of 424,000 tons, or 75 per cent but in 1913 the shipments fell to 759,000 tons. On the whole the exports from 1907 have not shown that expansion which might have been anticipated owing to the uncertain quality of the coal exported, high freights, and the primitive methods of shipment at the Calcutta docks, resulting in heavy depreciation of coal.

Distribution and consumption.

In table 34 is shown the total available supply of coal in India, which is arrived at by adding imports to the total production and subtracting exports therefrom ; in 1913 the figure stood at 16,094,000 tons as compared with 14,368,000 tons in 1912 and 11,797,000 tons five years ago.

Tables 35 and 36 give the distribution of coal produced in the country and coal imported from abroad, and of the agencies by which it is distributed. Calcutta uses Bengal and Bihar and Orissa coal exclusively. The province of Bihar and Orissa is self-supporting. Bombay city derives its supplies by sea from Bengal and from foreign countries in the proportion of 5 to 3, partly for its own consumption and partly for diffusion throughout the Bombay Presidency, which also receives considerable quantities by rail from Bengal, Bihar and Orissa and Hyderabad. Sind and Madras import most of their coal by sea from Bengal, but the latter province also draws part of its supply from Bihar and Orissa and Hyderabad. Assam, the United Provinces, the Punjab, the Central Provinces, Rajputana, and Central India import the bulk of the coal they require by rail and river from Bihar and Orissa and Bengal. Most of the coal consumed in Mysore comes mainly from the Bengal and Bihar and Orissa mines. Burma gets its supply almost wholly from Bengal and Bihar and Orissa.

The supply available in the cities of Calcutta and Bombay and in each province is given in table 37. The quantity available in Calcutta in the year under review was 2½ million tons, while that in the city of Bombay was only a little over a million tons.

	Tons	Per cent of total
Railways (including railway workshops) (*a*)	5,001,000	31·1
Port Trusts	161,000	1·0
Bunker coal	1,083,000	6·7
Inland Steamers	605,000	3·8
Jute Mills	769,000	4·8
Cotton Mills	1,171,000	7·3
Iron and brass foundries	760,000	4·7
Tea gardens	145,000	0·9
Brick and tile manufacture	1,135,000	7·0
Consumption at collieries and wastage	1,621,000	10·1
Other forms of industrial and domestic consumption	3,643,000	22·6
TOTAL	16,094,000	100

The statement in the margin gives an estimate of the coal consumed during 1913 in the various industries, etc., but the figures can only be regarded as approximate, and in the case of some of the heads they represent a very rough estimate. Nearly a third of the total quantity of coal produced in India is consumed by railways (including railway workshops).

Consumption on Railways.—Table 38 shows the total quantity of Indian and foreign coal and of wood consumed on all the railways in India in each of the last twenty-four years. At the beginning of this period the total consumption of coal was about 858,000 tons, of which foreign coal constituted nearly one-fourth. Ten years later the total consumption was 1⅔ million tons, and Indian coal represented nearly 95 per cent, thus marking a rapid and vigorous displacement of foreign coal. In 1913-14 the total consumption was about 5 million tons and Indian coal represented 94 per cent. The railway consumption of Indian coal averaged 33 per cent of the total quantity of coal produced in India in the ten years ending 1899, 30 per cent in the ten years ending 1909, 32 per cent in 1910, 33 per cent in 1911, 31 per cent in 1912, and 29 per cent in the year ending 31st March 1914. The consumption of wood as fuel on railways has not decreased to such an extent as might have been expected during this period, still the decrease has been fairly progressive, and in 1913-14 the quantity used was 106,000 tons as compared with 326,000 tons in 1890. This amount may be regarded as equivalent to 42,500 tons of coal, reckoning 2½ tons of wood as equal to 1 ton of coal. Wood is still used largely on the Madras and Southern Mahratta, the Burma, the North Western, and the South Indian Railways. The consumption of coal in relation to the total mileage of Indian railways is compared with that of certain foreign countries in the marginal statement.

	Total mileage of railways	Total consumption of coal in tons	Consumption of coal per mile in tons
India (*a*)	34,656	5,001,061	144
United Kingdom (*b*)	23,441	12,636,173	539
Russia in Europe (*d*)	34,700	5,348,000(*c*)	154
Japan(*b*)	5,987	1,553,398	259

(*a*) Figures are for the official year 1913-14
(*b*) Statistics are for 1912, later figures not being available
(*c*) Excluding coke
(*d*) Statistics of Russia are for 1908, later figures not being available

*Bunker coal.**—The shipments of bunker coal from Calcutta are far in excess of those of any other port. They increased steadily up to 1908 but in 1909 there was a set back, the figures being 888,500 tons as against 1,058,300 tons in the preceding year. In 1910 the shipments amounted to 904,700 tons, but in 1911 they fell to 883,000 tons, rising again to 964,000 tons in 1912, and to 982,514 tons in 1913. For the other ports exact figures have not been recorded. Indian coal is consumed on steamers of almost all the lines that touch at Indian ports. In some cases it is mixed with Welsh coal, but more often it is used unmixed.

Inland steamers.—The total reported figure comes to about 555,000 tons a year ; but there are many smaller companies and steamers in Bengal, Assam, and Burma, as well as in other parts of India, whose consumption it has not been possible to ascertain.

Cotton mills.—In the case of cotton mills, only 61 out of 262 mills have sent in reports. In the case of mills which have furnished no returns, estimates have been made on the basis of the number of looms and spindles at work.

Tea gardens.—On many tea estates wood is the only or chief fuel employed.

Brick and Tile manufacture.—It is probable that from 7 to 10 per cent of the total amount of raisings is used in the brick and tile industry, but no complete statistics of this industry are available.

Other forms of industrial and domestic consumption.—There are no means at present of framing an accurate estimate of how the balance of 3·6 million tons is consumed. Cotton presses and jute presses no doubt account for a considerable proportion. Excluding indigo factories and premises used solely for the purposes of tea and coffee plantations, there are, in addition many other factories worked by steam and a considerable number of other concerns too small to be included in the factories return. Many of those use fuel other than coal, wholly or in part, but it may be assumed that the greater portion of the balance of 3·6 million tons of coal must be debited to industrial consumption and only a small part to domestic consumption.

Table 39, gives comparative statistics of the average value of coal, in the coal mining industry in the different parts of the British Empire and in the principal foreign countries for a series of years. Annual figures for the past three years with quinquennial averages for earlier years have been shown in this table. **British Empire and Foreign countries.**

JOINT-STOCK COMPANIES

[FOR TABLES SEE PAGES 92 to 117]

Tables Nos. 40 to 45 relate exclusively to joint-stock companies registered in British India under the Indian Companies Act, VI of 1882†, and in the Mysore State under the Mysore Companies Regulation, III of 1895. They do not include the numerous and large companies which, while carrying on business in India, are registered in other countries and have their capital in money other than Indian. Such companies of this latter class, as work in India, are shewn in table No. 46. All the companies registered in India have a rupee capital with the exception of the Hongkong and Shanghai Banking Corporation which was registered in Calcutta in 1869 with a capital in Hongkong dollars of which the rupee equivalent is stated. During the year 1912-13 two new Acts—the Indian Life Assurance Companies Act, VI of 1912, and the Indian Provident Insurance Societies Act, V of 1912—came into operation. The minimum deposit of R25,000, prescribed by the former Act and the control over Provident Societies provided for by the latter Act, have had to a certain extent the effect of checking the growth of unsound companies.

The total number of companies, which have been registered in India under the law from the time it was passed, amounts to 6,888. Of these, 2,744 were working at the end of 1913-14, most of the others having been either wound up or otherwise discontinued or never having commenced business, so that about 60 per cent of the companies started have been failures. The companies that have ceased to work include a number of speculative gold-mining companies formed in Bengal some years ago and a considerable number of "provident" associations and some insurance companies formed in the last few years in several provinces. Some companies have also been taken off the Indian register, to be reconstructed as companies under the English law with their head offices in London. **Number of Companies.**

During the year 356 new companies with an authorised, subscribed, and paid-up capital of R66,91,52,990, R96,93,679, and R76,93,528 respectively were registered, and 163 companies with an authorised, subscribed, and paid-up capital of R9,43,20,835, R4,66,98,118 and R2,30,03,942 respectively ceased to work. The "paid-up capital" includes vendors' and other shares issued otherwise thao for cash, but considered as paid-up.

In 1913-14 there was a net increase of 192 in the number of companies, of R59,46,02,243 in the authorised capital and of R4,46,04,419 in the paid-up capital. The authorised capital of 70 companies was increased by R2,23,24,188, the subscribed capital of 614 companies by R9,38,66,500 and the paid-up capital of 788 companies by R6,17,31,226. The authorised capital of 7 companies was reduced by R23,54,100, the

* Bunker coal is not included in the figures of export
† Repealed by Act VII of 1913 which will come into force on 1st April 1914

subscribed capital of 94 companies by R36,26,673, and the paid-up capital of 98 companies by R19,17,894, as shewn under :

	Capital (R), increase			Capital (R), decrease			
	Number of Cos.	Authorised	Subscribed	Paid-up	Number of Cos.	Authorised	Subscribed	Paid-up

At the close of 1913-14 the companies at work had a paid-up capital of R76,56,18,274; this was more by R4,46,04,419 than that of the preceding year. There has been an increase of 90 per cent in the paid-up capital in the last ten years.

About 76 per cent of the capital invested in joint-stock enterprise is concentrated in companies registered in Bengal and Bombay. Bengal has R28,70,09,118 being 37·4 per cent and Bombay R29,53 08,206 being 38·6 per cent of the whole. Thereafter but a long way behind comes Madras with a capital of R5,24,14,740 being about 7 per cent of the whole.

Nearly two-fifths—about R29,00,00,000—of the aggregate capital is invested in mills and presses, chiefly for working or pressing cotton, jute, wool, and silk. This capital has increased 50·6 per cent in the last ten years. A great number of the mills and presses are registered in Bombay, that presidency representing about 48 per cent of this sum, most of it invested in cotton mills and presses. Mills and presses (mainly jute) registered in Bengal represent about two-thirds of the capital invested in mills and presses in Bombay.

Trading companies account for nearly R19,17,00,000, of which over a third (R7,06,44,582 or 37 per cent) is invested in railways and tramways. The companies for the working of these lines are mainly the creation of the last seventeen years.

In tea, coffee, and other plantations, R4,60,00,000 are invested, of which nearly 86 per cent is held in Bengal, most of the tea companies being registered in Calcutta. The capital invested in tea (over R4,09,00,000) increased by 19 per cent in the last decade. This rupee capital is about one-fifth of the sterling capital invested in this industry.

Banking, loan, and insurance companies account for R8,38,00,000, of which 36·5 per cent is in companies registered in Bengal and 24 per cent in Madras. The capital of banking and loan companies has increased by nearly 93 per cent in the last ten years. It includes R2,31,33,000, being the capital of the eighteen joint-stock banks and R2,43,75,000 for the Hongkong and Shanghai Bank which are included in the tables relating to Banks in Vol. II dealing with Financial Statistics.

The capital of mining and quarrying companies is R11,90,00,000, of which 50 per cent is invested in companies registered in Bengal, most of it representing capital invested in coal mines. The capital invested in coal companies has nearly tripled in the decade.

The average capital of each company is highest in Bombay, where it amounts to R4,81,742, the average of Burma and Bengal being R4,66,472 and R2,94,974 respectively. The average of the 425 companies registered in Madras is only R1,23,330, the reason being found in the extremely large application of the Companies Act

to the business of small money lenders, for no less than 236 out of the 552 " banking and loan " companies in all India are registered in Madras with a paid-up capital of R1,99,16,651.

It should be noted that the capital stated above represents share capital only, while several companies have issued debentures, the total value of which at the close of the half-year ending December 1914 amounted to R10,18,60,381, of which R5,73,00,000 belongs to Bengal, R3,95,00,000 to Bombay, and R28,16,000 to Madras. The value of cotton mill debentures was R2,49,78,525 and £99,000, of jute mill debentures R3,18,15,500 and £375,848 and of paper mill debentures R20,07,700.

There were 210 companies limited by guarantee at the close of the year 1912-13. Of these 12 ceased to work and 12 new companies were registered during the year 1913-14, giving a net total of 210 companies at work on the 31st March 1914.

The fees realised during 1913-14 were R1,10,795 and the expenditure was R3,942.

Foreign Companies.

Table No. 46 shews the number, description, and capital of companies which are registered elsewhere than in India, but which carry on work in India, mostly with sterling capital. The list has been made complete, as far as practicable, and the total number of such companies is 579 and the paid-up capital amounts to £200,473,059 besides £58,620,145 as debentures. The Railways represent £49,150,491 paid-up capital and £43,430,951 debentures. Of the rest, the sterling share capital invested in the tea industry is £14,780,431, in jute mills £2,453,894, in cotton mills £744,164, and in rice mills £2,211,475. The gold fields in Southern India are mostly worked by companies formed in the United Kingdom, the paid-up sterling capital being £2,565,080.

PATENTS AND DESIGNS

[For Tables see page 118]

The laws for granting exclusive privileges to inventors and for protecting patterns and designs were amended and consolidated by the passing of the Inventions and Designs Act, V of 1888. This Act has since been repealed by the Indian Patents and Designs Act, II of 1911, which came into force on the 1st January 1912, but certain applications made under the repealed Act of 1888 which were pending at the close of 1911 were disposed of in 1912. The year 1912 is therefore one of transition during which two methods of procedure were in force, so that the figures and details from that year are not strictly comparable with those of previous years. The statistics presented in this table summarise the working of the law for the last ten years.

Patents.

The inventions for the use of which exclusive privileges have been sought or acquired during recent years relate in the main, so far as the subjects are enumerated, to bicycles and similar vehicles, the manufacture of tea, railway material, lamps and burners, the treatment of metals, electrical contrivances, spinning and weaving machines, water-lifts and pumps, sugarcane and other mills, chemical appliances and preparations, improvement in building and building materials and in flying machines and talking machines. But the subject of about half of the applications is not specified in the reports on the administration of the law.

Of the 705 applications for leave to file specifications presented in 1913, 533 were accepted, and 172 were pending. Of the applications 197 were made by residents in India, of whom 65 were Indians and 132 other residents. The remaining 508 came from outside India.

The total number of applications under the Act of 1888 and the Act of 1911 has been 13,062, and as the result 9,478 specifications were brought on the register up to the end of 1913. The number of patents in force at the end of 1913 was 3,611.

Designs.

The number of applications for registering copyright in designs during the year shows a considerable increase—there were 741 in 1913 as compared with 343 in 1912. Of the 741 applications made, 713 were registered, 41 of them being from residents in India. The number of applications since the Act of 1888 came into force now stands at 2,062.

The income from fees received during the year aggregated R72,159 ; of this amount the sum of R43,700 represented continuance fees, by payment of which existing privileges are kept in force.

FOREIGN TRADE AND SHIPPING

[For Tables see pages 119 to 154.]

These tables, which include imports and exports on account of the Government, exhibit, for various periods extending in many cases back to 1834-35, the progress of the foreign sea-borne trade of India generally, and of each province separately, in the principal articles of trade, and with the principal foreign countries, also the progress of shipping. They thus supplement the annual accounts of the foreign trade which exhibit the progress of the trade for only five years.

The following statement shows the rate of increase in the imports and exports (including re-exports) from 1885-86 given in Table No. 48, the trade of the last ten years 1904-05 to 1913-14 being taken as 100 :—

	Imports			Exports, including re-exports		
	Merchandise	Treasure	Total	Merchandise	Treasure	Total
1885-86 to 1894-95 .	50	37	47	51	36	50
1895-96 to 1904-05 .	61	56	60	62	108	64
1905-06 . .	83	76	81	83	170	87
1906-07 . .	86	107	91	91	63	90
1907-08 . .	101	101	101	91	60	90
1908-09 . .	95	55	85	79	69	78
1909-10 . .	90	90	90	96	70	95
1910-11 . .	98	95	98	108	78	106
1911-12 . .	106	128	111	117	114	117
1912-13 . .	123	148	129	126	117	126
1913-14 . .	141	104	132	128	78	126

A full report of the trade of each year will be found in the *Review of the Trade of India* which has been published annually for forty years.

The statement below shows the details of the total sea-borne trade, both private and government, during the last five years ending 1913-14 :

	1909-10	1910-11	1911-12	1912-13	1913-14
	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)
Imports of Merchandise	122,65,13	133,70,57	144,05,54	166,62,97	191,30,80
„ Treasure	37,52,35	39,77,36	53,47,09	61,83,17	43,43,96
TOTAL IMPORTS .	160,17,48	173,47,93	197,52,63	228,46,14	234,74,76
Exports of Merchandise	187,96,82	209,96,16	227,98,98	246,21,83	249,00,75
„ Treasure	6,39,90	7,12,69	10,37,39	10,63,18	7,08,29
TOTAL EXPORTS .	194,36,72	217,08,85	238,36,37	256,85,01	256,09,04
TOTAL SEA-BORNE TRADE	354,54,20	390,56,78	435,89,00	485,31,15	490,83,80
Net Imports of Treasure	31,12,45	32,64,67	43,09,70	51,19,99	36,35,67
Net Exports of Merchandise	65,31,69	76,25,59	83,93,44	79,58,86	57,69,95
Excess of Exports	34,19,24	43,60,92	40,83,74	28,38,87	21,34,28

During the year 1913-14, the seasonal conditions of India were, on the whole, favourable and the prosperity of the world's trade inspite of some adverse circumstances reacted on the Indian trade. The imports of merchandise rose by Rs. 24·68 crores to Rs. 191·31 crores, while the total exports including re-exports rose by Rs. 2·79 crores to Rs. 249·01 crores.

The ratio of increase is shown below by taking the figures for 1913-14 = 100 :

	1911-12	1912-13	1913-14
Exports	91·6	98·9	100
Imports	75·3	87·1	100
Total	84·5	93·8	100

Imports

The increase under imports in 1913-14 was chiefly due to larger shipments from the United Kingdom (Rs. 18·38 crores), from Germany (Rs. 2·37 crores), and from Belgium (Rs. 1·23 crores). Bengal shares the largest increase of Rs. 10·7 crores, and Bombay and Sind come next with Rs. 8·38 crores.

The principal articles showing marked variations are shown in the table below :

		Quantity (000 omitted)		Value (000 omitted)		Increase or Decrease per cent compared with 1912-13	
		1912-13	1913-14	1912-13	1913-14	Quantity	Value
				Rs.	Rs.		
Arms, Ammunition, and Military Stores		—	—	58,42	88,03	—	+50·7

Ports

The trade of the principal ports of India is detailed in table No. 62. Bombay shows the largest increase of Rs. 16·1 crores, Calcutta comes next with an increase of Rs. 12·6 crores, and Madras shows an increase of about Rs. 3 crores, while Karachi and Rangoon show a decline of Rs. 5 crores and Rs. 2 crores, respectively.

Treasure

In 1912-13 the total imports of treasure advanced by Rs. 8·4 crores to Rs. 61·8 crores, which was wholly contributed by silver imported from the United Kingdom and China, gold having declined by Rs. 20 lakhs only. Under exports, on the other hand, gold increased by Rs. 3·5 crores, mostly exported to the United Kingdom, while silver showed a decline of Rs. 3·3 crores consigned to China.

In 1913-14, the total imports of treasure declined by Rs. 18·39 crores, gold declining by Rs. 13·06 crores and silver by Rs. 5·33 crores. Exports of treasure also declined by Rs. 3·55 crores, gold showing a decline of Rs. 2·39 crores and silver of Rs. 1·16 crores.

A summary table of the imports and exports of gold and silver is given below :

	1908-09	1909-10	1910-11	1911-12	1912-13	1913-14
	Rs. (000 omitted)	Rs. (000 omitted)	Rs. (000 omitted)	Rs. (000 omitted)	Rs. (000 omitted)	Rs. (000 omitted)
Imports of Gold	8,40,43	25,03,10	27,89,25	41,49,36	41,29,08	28,22,64
Exports of Gold	4,04,88	3,35,15	3,91,39	3,73,38	7,28,96	4,90,26
Net Imports of Gold .	4,35,55	21,67,95	23,97,86	37,75,98	34,00,12	23,32,38
Imports of Silver	14,34,00	12,49,25	11,88,11	11,97,72	20,54,09	15,21,32
Exports of „	2,27,15	3,04,75	3,21,30	6,64,00	3,34,22	2,18,03
Net Imports of Silver	12,06,85	9,44,50	8,66,81	5,33,72	17,19,87	13,03,29
NET IMPORTS OF TREASURE	16,42,40	31,12,45	32,64,67	43,09,70	51,19,99	36,35,67

Shipping

The numbers and tonnage of steamers and sailing vessels with cargoes and in ballast which entered from and cleared to all countries during 1913-14 were 8,617 and 17·39 million tons, as detailed below, as compared with the previous 5 years :—

		1908-09	1909-10	1910-11	1911-12	1912-13	1913-14
Entered	Vessels	4,082	4,080	4,320	4,481	4,408	4,294
	Tons (000 omitted)	6,4 7	7,275	7,596	8,355	8,728	8,624
Cleared	Vessels	3,919	3,962	4,241	4,387	4,341	4,323
	Tons (000 omitted)	6,444	7,322	7,398	8,262	8,757	8,762

In 1913-14 the number of vessels under the principal flags are British and British Indian 5,454, German 559, Austro-Hungarian 285, Japanese 191, Norwegian 80, and French 60.

WRECKS.

[FOR TABLE SEE PAGE 155]

This table exhibits the number of British, British Indian, and native vessels which were totally lost in Indian waters (from Suez to Penang), the total tonnage of vessels wrecked, and the number of lives lost, in the past twenty-five years.

The number and tonnage of each class of vessels annually lost from 1877 and the proportion which the number and tonnage bear to the total number and tonnage of vessels that cleared from Indian ports, are approximately as follows :—

	BRITISH								BRITISH INDIAN				NATIVE CRAFT			
	STEAM				SAILING				SAILING							
	Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to

58 vessels were totally lost in 1913, of which 5 were British, 44 British Indian, and 9 native craft excluding 1 foreign (Goa) craft).

The causes of exceptional loss of life in certain years are stated below—

1876. 400 pilgrims perished in the *Hydari*, bound from Calcutta to Jeddah.

1879. Continuous bad weather, and a cyclone, on the west coast of India in May.

1885. The *Speke Hall* foundered (58 lives lost) in the Gulf of Aden; and three vessels were wrecked (239 lives lost) during cyclone in the Bay of Bengal and on the east coast of Arabia.

1887. The *Sir John Lawrence* foundered (750 lives lost) at the mouth of the Hooghly in a cyclone.

1888. The *Vitarna* (800 lives lost), wrecked off the Káthiawár coast in a cyclone.

1891. Four vessels were wrecked in a cyclone in the Bay of Bengal.

1892. The *Deccan* foundered (214 lives lost) in the Indian Ocean.

1896. The *Luna* was wrecked (75 lives lost) in the Gulf of Aden.

1902. The *Camorta* was wrecked (781 lives lost) on the Burma Coast.

1905. The *Hashemi* foundered (74 lives lost) off the south Orissa coast in a cyclone.

1911. The *Fifeshire* was wrecked (24 lives lost) in the Gulf of Aden.

1912. The *Chinho* foundered (100 lives lost) in the Hlaing river near Tantabin (Burma).

1913. Two vessels (*Aungzeya* and *Mombai Salamat*) capsized, the former near Onbinzeik, Attaran river (Burma) and the latter on the Gulf of Cambay, the total number of lives lost being 83.

MERCHANDISE MARKS

[FOR TABLE SEE PAGE 156]

The Indian Merchandise Marks Act (IV of 1889) was passed in 1889, but its operation in the earlier years was restricted, especially in Calcutta, in consequence of the lack of adequate Customs machinery for the examination of goods. In 1894, with the introduction of the present tariff, the Customs staff was strengthened for the examination of goods for assessment to duty, and this increase enabled examination to be made at the same time for the purposes of the Merchandise Marks Act.

The Act was intended originally to prevent the fraudulent sale of goods bearing false trade marks or false trade descriptions (as of origin, quality, weight, or quantity). While the Act was before the Legislature a provision was added to require that all piece goods should be stamped with their length in yards. In this respect these goods are an exception, for the Act does not require that other descriptions of goods should be stamped or marked, though it requires that when goods are marked the marks must be a correct description.

The number of detentions under the Act during the twenty years ending 1913-14 has been as stated in the margin. Detention is but rarely followed by confiscation, and here have been only 98 such cases during the stated twenty years. Usually, detained goods are released with a fine, and this procedure was followed in 19,862 cases out of the 31,288 detentions ordered in the same period. In 11,304 cases the detained goods were released without the infliction of a fine.

Average of the five years ending	1898-99	1,437
" " " "	1903-04	1,304
" " " "	1908-09	1,261
" " " "	1913-14	2,256

In this period of twenty years 42 per cent of the detentions were on account of the application of false trade marks or false trade descriptions. In 38 per cent of the cases detention was ordered because the country of orign was either not stated or was falsely stated, and in 20 per cent, because the provisions of the Act for the stamping of piece goods had been infringed.

POST OFFICE

[FOR TABLES SEE PAGES 157 to 190]

Letters and other articles carried

The main business of the post office is the conveyance and delivery of letters, postcards, newspapers, parcels, and book-packets; and the total length of mail lines over which its work is carried on is 156,000 miles. Railway and steamer services now extend over 54,000 miles of this length, and the other 102,000 miles are worked by boats, mail-carts, horses, camels, and runners. The number of post offices is 19,000, of letter-boxes 49,000 (excluding those at post offices), and of village postmen 8,000. The actual number of registered articles of the letter mail and of parcels posted, added to the estimated number of unregistered articles of the letter mail given out for delivery, in 1913-14 amounted to more than 1,050 millions.

Parcel post

In 1899 the Indian Post Office joined the International Parcel Post Union; and parcels are now exchanged by post between India and almost every country in the world.

Value-payable parcels

In 1877 the post office undertook to collect from the addressee the declared value of a parcel or registered article and to transmit the money to the sender. The extent to which this system is used by traders and their customers is indicated by the fact that in 1913-14—36 years after its introduction—the number of value-payable articles carried was 9,572,000 and the value declared for realisation was ₹12,50,00,000.

Insurance of letters and parcels

In December 1898 the limit to the sum for which an article could be insured was raised for registered letters and value-payable registered letters and registered parcels to ₹2,000, and the procedure in connection with the insurance of articles was simplified, the sender of an insured article being no longer required to declare its contents. The insurance fee was at first fixed at one-half per cent, but shortly afterwards it was reduced to one-quarter per cent, and in July 1905 it was further reduced to one-eighth per cent. The gross sum for which articles were insured by the post office in 1913-14 was ₹73,00,00,000.

Money orders

In 1880 the Government of India transferred from the treasuries to the post office the business of the issue and payment of money orders, with the result that within a few months the number of orders issued was quadrupled. The value of inland money orders issued has increased from ₹4,57,09,000 in 1880-81 to ₹51,46,64,000 in 1913-14. Special arrangements have been made to adapt the money order system to remittances of revenue, rent, and miscellaneous Government dues, and in several provinces the system is largely used for these purposes. The commission on inland money orders is 4 annas for each complete sum of ₹25 with lower rates of 1, 2, and 3 annas, respectively, for any sums or remainders not exceeding ₹5, ₹10, and ₹15. Foreign money orders are also exchanged with the principal countries of the world, the maximum limit of a rupee order being ₹600 and of a sterling order £40 except in a few cases in which the maximum limit is either £10 or £20.

In 1884 the Indian Post Office undertook the sale of British postal orders. Such orders, ranging in value from 6*d.* to 21*s.*, can now be exchanged with the greater part of the British Empire and used also for inland remittances.

Savings banks*

In 1870 Government savings banks were established in connection with district treasuries. In 1882 sanction was given for the opening of savings banks at post offices, and three years later the closure of the treasury savings banks was ordered. In 1882-83 the number of depositors in the postal savings banks was 39,000 and the sum at their credit ₹27,97,000. By the end of 1913-14 the number of depositors had increased to 1,639,000 and the sum at their credit amounted to ₹23,61,14,000. The post office undertakes on behalf of depositors the purchase and sale of Government promissory notes and the transfer of such notes to the Accountant General, Post Office and Telegraphs, for custody on behalf of the purchaser.

Postal telegrams

In 1883 many post offices were made receiving offices for the transmission of inland telegrams by post to the nearest telegraph office; and telegraph work was also undertaken by the post office in a certain number of offices. The number of telegraph offices has thus been largely increased, and out of 3,400 state (non-railway) telegraph offices on the 31st March 1914, 3,000 were postal telegraph offices. In 1913-14 the number of messages transmitted by receiving offices was 69,000 and the number of messages signalled by postal telegraph offices was 9,381,000 excluding free messages.

Cart services

Many carriage and cart lines are, however, subsidised for the carriage of the mails.

* For detailed information regarding Savings Banks, see Vol. II of the Statistical Abstract—Financial

In 1884 sanction was given to a scheme of life insurance, whereby an officer of the postal service is enabled to obtain a policy for a sum not exceeding R4,000 on the security of Government. In 1888 the scheme was extended to the Telegraph Department. In February 1898 the scheme was extended generally to all Government servants, who are subject to civil rules, and a system of endowment assurances was added to the scheme. By the end of 1913-14, 31,000 lives had been insured for the aggregate sum of R4,22,24,000. Postal life insurance

In 1890 the post office undertook the payment of military pensioners in the Punjab at the post offices nearest their homes. The number of pensioners thus paid in 1913-14 was 41,000 and the aggregate sum paid to them R30,37,000. Payment of military pensioners

Letters and postcards.—With effect from the 1st October 1907, the weights of letters allowed for ½ and 1 anna were raised from ¾ to 1 tola and from 1½ to 10 tolas respectively. Embossed envelopes bearing a half anna coloured impressed stamp and sold at the face value of the stamp without any charge for the envelopes were introduced in 1873. Formerly an additional charge was made for re-direction, equal to the postage paid when the letter was posted, but the additional charge was discontinued in 1877. The introduction of the inland postcard in 1879 gave a still lower rate of postage than that given by the rate of half an anna per half tola with an envelope supplied without charge. The inland postcard has from its introduction been priced at one pice (three pies) per single card and half an anna per reply card, the price in each case covering the cost of the card as well as postage. Rates of postage, inland and foreign

Newspapers and packets.—A new system of "registering" publications as newspapers was introduced in January 1897, under which a "registered newspaper" of weight not exceeding twenty tolas is carried by the inland post for half an anna. From the 1st January 1904 the maximum weight for a registered newspaper admissible for transmission through the post for one-quarter of an anna postage was raised from 4 to 6 tolas. This weight has been further raised, since the 1st October 1908, from 6 to 8 tolas, concurrently with an increase from 20 to 40 tolas in the maximum weight admissible for half-an-anna postage.

The postage on packets other than newspapers was one anna for 10 tolas until 1877, when the rate was reduced to one anna per 10 tolas for book packets and two annas per 40 tolas for book packets and patterns. In 1878 the packet rate was lowered to half an anna per 10 tolas.

Parcels.—The present rates of postage, which came into force on the 1st October 1907, and which are applicable to all classes of parcels, are (1) in the case of parcels, not exceeding 440 tolas in weight, 2 annas for every 40 tolas or part of that weight; and (2) in the case of parcels exceeding 440 tolas in weight, R3 for a parcel not exceeding 480 tolas in weight, and 4 annas for every additional 40 tolas.

Registration fees.—From the 1st July 1901 the fee for the registration of a parcel was fixed at a uniform charge of 2 annas.

Official papers.—With effect from the 1st October 1907, the postage rates for official letters, packets, and parcels are the ordinary rates for those articles.

Foreign postage.—The rates now are—for letters, 2½ annas for the first ounce and 1½ annas for every additional ounce; for post-cards, single, 1 anna each; reply, 2 annas; for printed papers, half an anna per two ounces; for business papers entirely or partly in manuscript, 2½ annas for the first 10 ounces and half an anna for every 2 ounces additional; for samples, 1 anna for the first 4 ounces and half an anna for every 2 ounces additional. Since the 1st October 1907, the rate for letters sent from British India to the United Kingdom and almost all British possessions, as also to Egypt (including the Soudan), has been fixed at one anna for every ounce or fraction thereof.

The statement below shows the annual subsidies paid under existing contracts for the carriage of mails by steamer on the Indian coasts and rivers and for the maintenance of communication with Ceylon, the Straits, and the Persian Gulf. Mail steamer subsidies

Calcutta and Rangoon (three times a week)	Contract from the 1st February 1913	R 10,70,000
Chittagong, Arakan ports, and Rangoon (weekly)		
Chittagong, Akyab and Rangoon (weekly)		
Madras and Rangoon (weekly)

Bombay and Karachi (weekly)		
" " *viâ* the coast ports (weekly)		
Karachi and Basra *viâ* the Persian Gulf ports (fortnightly)		
Karachi and Bushire *viâ* the Persian Gulf ports (fortnightly)		
Karachi and Basra *viâ* the *principal* Persian Gulf ports (weekly)		
Tuticorin and Colombo (daily)		
Negapatam and the Straits Settlements (weekly)		
Rangoon and Penang (weekly)		
Bombay, Mombasa, Zanzibar, Beira, Delagoa Bay, and Durban (fortnightly) with calls on outward voyage every four weeks at the Seychelles, Lamu, Mozambique and Dar-es-Salaam		
Additional services between any of the ports served by the above-mentioned lines, between any of the ports on the Coromandel Coast and Rangoon		

		R
Basra-Bagdad	Contract for 10 years, from the 1st May 1904	24,000
Rangoon and Bassein Bassein and Myaungmya Prome, Thayetmyo and Minbu Thayetmyo, and Pakôkku Magwe and Sale Sale and Pakôkku Myingyan and Pakôkku Pakôkku and Kindat Kindat and Homalin Katha and Bhamo Moulmein and Kya-in Rangoon, Pyapon, Maubin, and Yandoon Moulmein and Shwegun Moulmein and Kyondo Moulmein and Natmaw Rangoon and Kyauktaw Thongwa and Kadapana Wakema and Myaungmya Kayiklal and Kyaujan Maungmya and Elme Prome and Henzada Henzada and Yandoon Yandoon and Pyapon Yandoon and Moulmeingyun Myaungmya and Moulmeingyun Wakema and Moulmeingyun Wakema and Kyonmague Moulmein and Kado	Contract with Burma Government, the annual subsidy paid from 1st January 1914 is R1,82,000 of which amount paid by the Post office	57,000
Kyaukpyu and Cheduba Kyaukpyu and Ramree Sandoway and Singaing Sandoway, Taungup and Kyaukpyu	Under contract with Burma Government for 5 years from 1st April 1910, the subsidy paid annually is	22,000
Chittagong and Cox's Bazar Cox's Bazar and Maungda	Contract with the Post Office for 5 years from 1st January 1914	7,000
Akyab and Buthidaung Akyab and Paletwa Akyab and Kyauktaw Akyab and Myaungbwe Akyab and Sakanmauira Myabon and Kyaukpyu Sandoway and Kyaukyu Sandoway and Gwa Akyab and Kyaukpyu	Under contract with Burma Government for 5 years from 1st April 1910, the subsidy which is paid by the Burma Government annually is	83,000
Calcutta and Colombo Bombay and Colombo	For Chria and Australian mail service.	
Bombay and Goa	Contract for 8 months from 1st October 1913, share of annual subsidy	34,000
Aden, Berbera and Zeyla	Contract with the Government of Somaliland Protectorate for 1 year from 1st October 1913, share of subsidy paid by the India Post Office	4,000
	TOTAL	13,01,000

For the lines of postal communication under contract with the Peninsular and Oriental Company an annual subsidy of £305,000 is paid by His Majesty's Government for the combined Eastern and Australian mail services. The Indian share of this subsidy has not yet been assessed.

TELEGRAPHS

(FOR TABLES SEE PAGES 191 TO 193)

Departmental changes

Inland tariff

Tariff between India and Europe

Tariff between India and Australia

The experimental amalgamation of posts and telegraphs in the Bombay and Central Circles in 1910 continued to work satisfactorily, and in February 1914 the Secretary of State for India finally approved of the complete fusion of the two departments from the 1st April 1914. On the 1st January 1909 a revised inland tariff was introduced and it is being continued, the rates are (1) express—one rupee for 12 words and 2 annas for each additional word and (2) ordinary—six annas for 12 words and half an anna for each additional word, the address being charged for. On the 1st August 1905 the rates for cablegrams was reduced from 2*s.* 3*d.* to R1-6 per word *viâ* Turkey and from 2*s.* 6*d* to R1-8 per word *viâ* Teheran and Suez. A system of deferred telegrams in plain language at half the usual rates for private telegrams was introduced between the United Kingdom, Germany, France, Algeria, Tunis, Portugal and the United States of America, with effect from the 1st January 1912, and was subsequently extended to practically all European administrations besides a number of administrations in the extra European régime. The rates between Australia in the one hand and certain countries in the East and Far East including India, Burma and Ceylon on the other, was reduced to a uniform rate of R1-14 per word with effect from the 1st June 1903.

Telegraph laws

Act XIII of 1885 as amended by Act XI of 1888 repealing all earlier Acts (the first being XXXIV of 1854) deals with the privileges and powers of Government in respect to telegraphs, their authority to grant licenses for the establishment of telegraphs, and the regulations under which telegraphs are to be worked. They also provide and regulate the powers of the Department to place telegraph lines and posts on public and private lands, and declare the penalties for infringements of licenses, and for all other offences connected with

telegraph lines, and with the transmission of telegrams. Rules and regulations for the acceptance, transmission, and custody of telegrams are published from time to time in the *Gazette of India* by the Governor-General in Council, and have the force of law.

The revenue and expenditure of the Department and the number of messages sent, during the last five years, are entered in the table below : Progress of revenue and expenditure and of messages

	Revenue R	Expenditure R	Surplus + or Deficit — R	NUMBER OF MESSAGES					
				INLAND			FOREIGN		
				State	Private	Total	State	Private	Total
1909-10 . .	1,21,19,219	1,21,12,784	+ 6,435	834,435	9,963,541	10,797,976	15,174	1,271,547	1,286,721
1910-11 . .	1,28,69,207	1,18,77,501	+9,91,706	989,459	10,683,675	11,673,134	16,986	1,400,108	1,417,094
1911-12 . .	1,42,74,275	1,23,24,356	+19,49,919	1,207,810	11,928,575	13,136,385	19,541	1,515,893	1,535,434
1912-13 . .	1,52,79,958	1,28,21,644	+24,58,314	1,179,353	12,663,569	13,842,922	13,144	1,593,005	1,606,149
1913-14 .	1,55,54,029	1,36,56,203	+18,97,826	1,328,413	13,609,988	14,938,401	13,593	1,644,703	1,658,296

The total receipts of the Telegraph Department amounted to R155½ lakhs and working revenue charges R136½ lakhs as against nearly R153 lakhs and over R128 lakhs, respectively. Thus the gross revenue increased by 1·8 per cent and the expenditure by 6·5 per cent. The surplus amounted to R19 lakhs as against R24½ lakhs in 1912-13. The decrease in the surplus is mainly due to the fact that in consequence of the adoption by railways of the official year for purposes of account five quarters' rent for wires and instruments was recovered from them in 1912-13. The chief items of receipts were fees on telegrams (over R116½ lakhs), claims from railways and canals (nearly R29 lakhs), rent for telephone connections (R7½ lakhs), claims from guarantors (R85,000), and royalties from telephone companies (R83,000).

Expenditure debitable to capital account incurred during the year 1913-14 was R37 lakhs, bringing this total to the end of the year to R12,17 lakhs.

The telegraph system was extended by 2,731 miles of line and 10,767 miles of wire and cable, and consisted on the 31st March 1914 of 81,593 miles of line and 321,801 miles of wire and cable, of which 99,815 miles of wire and cable were used by railways, 10,604 for canals, 21,945 for telephone exchanges and private lines and 189,407 for departmental purposes.

The total number of inland telegrams was 14,938,401, of which 1,328,413 were State telegrams and 13,609,988 private telegrams, showing an increase of 12 and 7 per cent, respectively. The revenue derived from them amounted to R12 lakhs and R76 lakhs, showing an increase of 18 and 7 per cent, respectively.

Foreign telegrams were 1,658,296 in number, realising nearly R26 lakhs, showing an increase of 3 per cent in number, but a decrease of 2 per cent in value, owing to the division of through traffic to the new Aden-Colombo-Penang cable. State foreign telegrams numbering 13,593 with a revenue of R75,000 showed an increase of 3 per cent in number but a decrease of 2 per cent in value. Private foreign telegrams on the other hand rose by 2 per cent in number but fell by 3 per cent in value.

RAILWAYS

(FOR TABLES SEE PAGES 194 TO 202)

In view of the increasing importance of the economics of railway transport in recent years, and the consequent demand for increased statistical information on Indian Railways, the tables have this year been entirely reconstructed. They are intended to show in summary form the latest available statistics relating to the working of Indian railways—mileage, capital outlay, earnings, working expenses, traffic, rolling-stock, railway staff, railway accidents, etc.

Railway construction began in India about the year 1850, and was for a number of years carried out through the agency of joint-stock companies under contract with the State. The companies were given a guarantee of 5 per cent on their capital outlay, with half the surplus profits in addition after the guaranteed interest for the half-year had been met at the rate of exchange of 22*d.* to the rupee. The companies were required to sell their railways to Government after 25 years at a rate specified. No capital expenditure beyond that involved by the grant of free land was entailed on the State, but the general revenues had to meet the amount by which the net receipts fell short of the guaranteed interest. The railways which were constructed on these terms have played an important part in the development of the country. Although British capital was attracted into India, without which these great works could hardly at that time have been constructed, yet for many years these railways imposed a considerable burden on Indian revenues as all expectations in regard to profits were not realised, owing to the heavy outlay incurred in the construction of the lines on a gauge of 5 feet 6 inches, to the alterations in the routes after work had been commenced, and to the outbreak of the mutiny in 1857. The increasing demands for guaranteed interest proved too much and the whole guarantee system was discontinued in 1869. All the old guaranteed companies have now been purchased by the Government under their contracts. Guaranteed companies

Direct State Agency

In 1870 Government began to borrow money for railway developments by direct State Agency, but expenditure was to be met by the receipts from the guaranteed railways, and no increased charge was to be thrown on the revenues. In 1879 this system ceased, and the capital outlay was limited to what the Government could borrow in India without unduly pressing the market or could spare from revenue. These restrictions would, however, have hampered the work of construction, and economic progress would have been severely checked, had not the Government in 1880-81 decided again to evoke the aid of private capital under a guarantee. The system now adopted was distinguished from the old guarantee and the State Railway system, and the lines promoted were called " State lines worked by companies " but practically the only difference between these and the old guaranteed companies was that the terms were easier for Government. From that time onwards a number of companies have assisted in the development of Indian railways. The main points of difference between the systems of 1870, 1879 and 1880 are :—Prior to 1870 railway construction was carried out by companies with private capital, the companies being given by Government a guarantee of a minimum return of 5 per cent on their capital outlay coupled with the free grant of land required. Under the system of 1870, railway developments were to be made by direct State Agency from borrowed capital, instead of seeking the aid of private capital ; the system of 1879, while upholding this policy, put certain restrictions on the extent of borrowings ; but the system of 1880 again evoked the aid of private capital, under a guarantee, although the terms were easier for Government than in the old system of guaranteed companies in vogue prior to 1870.

Assisted companies

Policy of advance

By 1883, however, the finances of the country had considerably improved. The limit of borrowing was raised from 2 crores to 3½ crores annually, of which about 3 crores were assigned to railways. Railways were to be made as required but were, as a rule, to have a good prospect of repaying their interest charge, those for famine purposes being paid for, with irrigation works, from the Famine Insurance grant. Since 1885, when the first programme under the new conditions was introduced, the annual expenditure on railways has constantly increased. In 1890 the whole available balance of the Famine Insurance grant was devoted to railway construction and in 1892 half a crore was being especially added to capital expenditure to enable companies to undertake new lines of railway and extensions with sums borrowed by Government. As the exchange continued to fall and affect seriously the finances of India, another attempt was made in 1893 to work through companies. As the guarantee involved a gold liability, a subsidy was offered instead. This took the form of a rebate or payment from the gross earnings of the main line from traffic interchanged with the company's lines, so that the total profits of the company should yield a dividend of 4 per cent. The rebate was, however, limited to 10 per cent of the gross earnings from such traffic. These conditions were not found sufficiently attractive and the terms were again revised in 1896. Companies were now offered either an absolute guarantee of 3 per cent with a share of surplus profits, or a rebate up to the full extent of the main line's net earnings in supplement of their own net earnings, the total being limited to 3½ per cent on the capital outlay. As regards railways passing through Native States, the money has in some cases been found from the revenues of the States, in others it has been lent to the States by Government, and in others again Government has guaranteed loans made to a State by a company.

Native States

Railway programme

The question how best to provide funds for a wider development of the railway system was considered and sanction was given in 1896-97 to an expenditure of nearly 30 crores spread over 3 years, but this programme could not be carried out owing to many adverse circumstances affecting the revenues of Government. Since 1896 the expenditure incurred not only by the State railways but by those guaranteed by the State has been included in the railway programme ; and in 1901 it was decided to adopt the principle of regarding the needs of open lines for rolling stock, stations, goods sheds, permanent way, etc., as a first charge upon the funds available, thereafter the completion of lines in progress, and lastly the claims of new lines, and the money was proposed to be obtained by borrowing in London and India, by appropriations from the Famine Insurance grant, and by utilisation of surplus revenues and Savings Bank deposits.

Private enterpirse

Though the amount made available for capital expenditure on Railways has been increased over a series of years, the balance available for Imperial funds for the construction of new lines has tended to diminish. Since 1909, when the Imperial funds devoted to new construction reached a low figure, increasing efforts have been made to augment the supply of funds from other sources. In June 1910 more liberal terms than those previously conceded were offered, and under these terms private enterprise had two alternative forms of assistance, namely, (1) a rebate paid by parent lines from its net earnings from traffic brought to it by the feeder railway, sufficient to make up 5 per cent on the *capital outlay*, thus limiting the liability of the main line railway, but holding out a fair prospect of a 5 per cent return, and (2) a firm guarantee from Government of 3½ per cent on capital outlay. But it has been patent that the capital raised by a company may at times be considerably more than that for the time being expended and that even under the second alternative shareholders in branch line companies were not assured of any definite return. For this reason in November 1913 revised terms were offered and they differed from those of 1910 mainly in the substitution of *paid-up capital* for *capital outlay*. Of the 10 companies floated since 1911 under these terms, 8 have taken advantage of the first alternative, the rebate term, while 2 only have availed themselves of the guarantee terms. The guarantee terms, however, offer one very distinct advantage in so far as the shares of these companies are available for the investment of trust funds. In order to encourage investments of this class one of the modifications introduced in 1913 was a clause in the terms which rendered it possible for companies to be floated partly on the rebate and partly on the guarantee terms.

District Boards

Another agency for financing feeder railways has been found in the District Boards. These local bodies have become fully alive to the advance in the general welfare of a district which is to be anticipated from the improvement of communications. Since 1884 District Boards in Madras have been empowered to lay a special Railway cess not exceeding 3 pies per rupee of land revenue, and advantage had been taken of this to collect up to 31st March 1914 a sum of Rs. 96,32,000, the greater part of this sum having been accumulated since 1903. It has recently been decided that the local Governments who may wish to do so may legislate for the

levy of a similar cess by which means, it is hoped, much encouragement may be given to the construction of local feeder railways at the cost of local funds. In 1913-14 two such lines were sanctioned for construction, and in the case of one the District Board were permitted to raise a debenture loan to supplement the funds in hand from the proceeds of the cess.

Administration and control

Up to 1905 the administration of the railways in India was controlled by the Public Works Department of the Government of India. In that year the control was transferred to an expert Railway Board, consisting of a Chairman and two members. The duties assigned to the Board were of two kinds. Its deliberative functions included the preparation of the railway programme of expenditure and the discussion of the greater questions of railway policy and finance affecting all lines. As regards such questions, the ultimate decision necessarily continued to rest with the Government of India and the Secretary of State in Council. Its administrative duties included the construction of new lines by State Agency, the carrying out of new works on open lines, the improvement generally of railway management, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines. The final authority in regard to these duties was delegated, subject to restrictions to the Railway Board. In 1907 a Committee on Indian Railway Finance and Administration was appointed by the Secretary of State for India. The Committee came to the conclusion that the system under which the Railway Board worked was not satisfactory, and suggested improvements. After consideration of their recommendations, it was decided to introduce in 1908 certain changes, the Chairman of the Board becoming President with enhanced powers, and the Board being made independent of the Commerce and Industry Department Secretariat.

Sources of statistics

The tables in this volume are compiled from the statistics given in the Report on the Administration of Railways in India issued by the Railway Board, except table No. 95 (Revenue account of the railways in respect of which Government is financially responsible) which is compiled from the Finance and Revenue Accounts of the Government of India. The Administration Reports published up to 1912 had reference to the working of each calendar year. Owing to the adoption, by the principal railway administrations, of the Government financial year (1st April to 31st March) for all accounts and statistical purposes, the Administration Reports have, with effect from 1st April 1913, been published for the financial year.

Open mileage

The number of miles of all railways open for traffic at the end of 1913-14 was 34,656 as compared with 27,727 in 1904-05, the increase in the decade being thus 6,929 miles or 25 per cent. Of this, 17,641 miles were of the standard-gauge ($5\frac{1}{2}'$), 14,389 miles of the metre-gauge ($3'\ 3\frac{3}{8}''$), and 2,626 miles of other gauges ($2\frac{1}{2}'$ and $2'$). Of the standard-gauge 15,282 miles, of the metre gauge 9,336 miles, and of other gauges 1,214 miles were owned by Government.

Capital outlay

Up to the close of the year 1913-14 the capital outlay on all railway lines open for traffic amounted to Rs. 4,95,09 lakhs as compared with Rs. 3,47,91 lakhs at the end of 1904, the increase in the decade being 42 per cent. Of this total capital outlay of Rs. 4,95,09 lakhs, the outlay on lines in which the State is financially interested (excluding premia for the purchase of companies' lines) amounted to Rs. 4,40,15 lakhs. The actual expenditure during 1913-14 on lines in which the State is financially interested amounted to Rs. 18,46 lakhs.

Results of working Earnings

The gross earnings of all Indian railways during the year 1913-14 amounted in round figures to Rs. 63,59 lakhs, compared with Rs. 61,71 lakhs in 1912-13, being an increase of Rs. 1,88 lakhs or 3 per cent. This total amount of Rs. 63,59 lakhs of gross earnings consisted of goods traffic Rs. 37,77 lakhs, coaching traffic Rs. 23,74 lakhs, electric telegraph Rs. 10 lakhs, steam boat Rs. 36 lakhs, and sundries Rs. 1,62 lakhs. The working expenses were Rs. 32,93 lakhs as against Rs. 31,18 lakhs in 1912-13. The net earnings thus amounted to Rs. 30,66 lakhs against Rs. 30,53 lakhs in 1912-13, or an increase of Rs. 13 lakhs or ·4 per cent. These net earnings yielded a return on the capital outlay (Rs. 4,95,09 lakhs) on open lines, *i.e.*, on mileage earning revenue, of 6·19 per cent, as compared with 6·48 per cent in 1912-13. The corresponding actual returns per cent for the previous five calendar years (1908 to 1912) are, 4·33, 4·81, 5·46, 5·87, and 6·77, respectively. Details of the results of working in 1913-14 of each railway system, which includes branch lines and lines under the same management, are shown in table No. 94.

Financial results of working of State railways

The financial results of the working of the State railways are shown in tables Nos. 93 and 95. Up to the end of 1898-99 the railways in respect of which Government was financially interested worked at a loss to the State, owing partly to the yearly additions of new and undeveloped lines and partly to the increased payments to certain guaranteed companies necessitated by the fall of exchange; but with the termination of the guarantee of the Great Indian Peninsular Railway and the development of traffic, the revenue has, excepting the single set back in 1908-09, a famine year in North-Western India, exceeded the expenditure. The deficit in 1908-09 was ascribed to a fall in gross receipts combined with an increase in working expenses. The net gain to the State in 1913-14 was Rs. 7,25 lakhs as against Rs. 7,21 lakhs in 1912-13. This surplus gives a net profit to Government (after paying all charges including interest) of about $1\frac{1}{2}$ per cent on the capital outlay on State railways; but, as already stated above, the net earnings of all railways yielded a return to the railways of $6\frac{1}{5}$ per cent on the total capital outlay.

Passenger traffic

The total number of passengers carried by Indian railways in 1913-14 was in round numbers 458 millions as against 417 millions in the preceding year, or an increase of 10 per cent. This total comprised 813,000 first class passengers, 3,460,000 second class, 12,371,000 intermediate class, 410,960,000 third class passengers, and 30,114,000 for trips, which the holders of season and vendors' tickets are assumed to have made on the prices paid for their tickets. The total earnings from passenger traffic amounted to Rs. 21,18 lakhs, being an increase of 8 per cent over the preceding year. The increase in the passenger traffic indicates a general development of traffic, brisk trade, an increased number of people attending *melas* and fairs, and the result of opening new lines. The total quantity of goods carried during the year 1913-14 was 82,613,000 tons, which exceeds that of the preceding year by 5 per cent; but the total earnings from goods traffic fell from

Goods traffic

Rs. 37,92 lakhs in 1912 to Rs. 37,77 lakhs in 1913-14, *i.e.*, by ·4 per cent. The decrease in earnings in spite of an increase in the tonnage carried is attributed to the fact that the long distance traffic to the ports fell off on account of reduced exports of grain to Europe owing to the failure of crops in the United Provinces and some parts of Bengal. The average rates charged per mile per passenger of each class and per ton of goods carried during the year 1913-14 are stated in the margin as compared with those ten years ago.

		1904	1913-14
		Pies	Pies
Passengers	First class	13·41	14·48
	Second class	5·69	6·60
	Intermediate class	3·09	3·14
	Third class	2·34	2·29
	Season and vendors' ticket holders	1·41	1·42
Goods (per ton)		5·39	4·64

Rolling-stock

The total number of locomotives at the end of 1913-14 numbered 7,968, of which 1,758 were employed exclusively on passenger working, 2,413 on goods working, and 3,797 on mixed working. The number of coaching stock was 22,381 and that of goods stock 170,444.

Train mileage and earnings per train mile

The total train-mileage (including miscellaneous train miles) was 156,276,000 in 1913-14 as against 152,761,000 in the preceding year. Of this, coaching train miles numbered 55,972,000 and goods train miles numbered 57,933,000. The gross earnings per train mile worked out to Rs. 4·07, the working expenses Rs. 2·11, and the net earnings per train mile Rs. 1·96.

Railway staff

The total number of servants in railway employ at the close of the year 1913-14 was 633,694 as against 589,422 in the preceding year. Of this number, 7,988 were Europeans, 10,437 Anglo-Indians, and 615,269 Indians. Of the Europeans and Anglo-Indians 15,606 were enrolled as volunteers. At the close of 1913-14 there were 10,992 children and 8,943 apprentices and workmen attending the railway schools.

Railway accidents

The total number of persons killed by railway accidents during the year 1913-14 was 2,338, as against 2,145 in the preceding year. Of this number, 268 were passengers, 480 railway servants, and 1,590 other persons. The increase in 1913-14 is attributed to the serious accidents, which occurred on the Great Indian Peninsular Railway on the 30th April 1913 and on the Ondal-Sainthia Branch of the East Indian Railway on the 28th June 1913. The total number of persons injured in 1913-14 was 2,142, of whom 815 were passengers, 845 railway servants, and 482 other persons.

IRRIGATION.

(FOR TABLES SEE PAGES 203 TO 217)

Irrigation has been resorted to in India from time immemorial as a means of supplementing the natural rainfall and of storing water for use at critical periods. In general it may be said that the security of the harvest depends on the existence of some form of irrigation in almost all parts of India, except in tracts such as Eastern Bengal, Assam or Lower Burma, where the average rainfall is not less than 70 inches in the year. As an example of the magnitude of some of the works undertaken by the Government of India may be mentioned the Chenab Canal which irrigates over 2,000,000 acres, equal to about two-fifths of the whole cultivable area of Egypt, with an ordinary discharge of 11,000 cubic feet per second or about six times that of the Thames at Teddington.

Types of irrigation works

Irrigation works are of three great types—lift, storage, and river works—which are represented by wells, tanks or reservoirs, and canals. Nearly 25 per cent of the irrigated area, or 10,000,000 acres, are irrigated from wells; the average area irrigated by tanks is about 6,000,000 acres, and over 18,000,000 acres are irrigated by canals. The wells and smaller tanks are often the property of private individuals, but the larger tanks and the canals are undertaken by the Government. The statistics given in this volume relate only to works constructed or maintained by Government.

Irrigation canals are not always suitable for navigation, and many canals have been constructed for navigation which do not irrigate a single acre. Not one navigable canal is directly remunerative and in many cases the navigation receipts do not cover the working expenses. The great rivers are navigable by steamers all the year round, and there are innumerable small rivers, tributaries, creeks and backwaters, which are fully utilized by small craft.

Classes

Financially considered, irrigation works are classed as "major" and "minor," the former being subdivided into (1) Productive and (2) Protective works. The most important irrigation works in India are those classed as "Productive works" or works the capital cost of which has been wholly or mainly provided from loan funds in the expectation that they will prove directly remunerative and that the net revenue derived from them will fully cover all charges for interest within a reasonable time after their completion. "Protective" irrigation works are those which have been sanctioned in consideration of their value in protection against famine, but without any expectation of their becoming directly remunerative. The cost of their construction has been met from the Famine Insurance grant. Capital and revenue accounts are kept for all major works, and the revenue due to them, whether directly in the form of water-rates and miscellaneous receipts or indirectly on account of enhancements of land revenue due to irrigation, is shewn in the Finance Accounts. Minor works are of three classes, namely:—(1) Works for which capital and revenue accounts are kept. All expenditure incurred in the construction and development of minor irrigation works of this class is met from the ordinary revenue. In Sind, Bombay, British Baluchistan, Ajmer-Merwara, the North-West Frontier Province, the Punjab, Bengal, and Bihar and Orissa, these works are, with few exceptions, regarded as Imperial. In the other provinces they are treated as entirely provincial. (2) Minor works for which only revenue accounts are kept, either because the works are too small or because they have not been constructed by Government, which has simply undertaken their improvement or maintenance. They are credited with a

share of the land revenue depending on their maintenance and are debited with all expenditure incurred on construction, extension, improvements, and maintenance. (3) There is a third important class of minor works, chiefly existing in the Madras Presidency, for which neither capital nor revenue accounts are kept. The Madras works include over 30,000 tanks and irrigation channels, the improvement and repair of which are executed by the Public Works Department, or in the case of smaller works, by civil officers.

Table No. 103 shows the principal results of the operations for the year 1912-13, while table No. 104 shows the mileage of canals in operation and the area irrigated. Table No. 105 the financial results of the works at the end of each year from 1893-94 to 1912-13. The chief features of these tables are given in the margin. At the end of 1912-13 the total mileage of major works was 44,077 and of minor works 4,660 as against 41,991 and 5,886, respectively, at the end of the previous year. The area irrigated during the year 1912-13 was 16,400,000 acres, of which productive major irrigation works covered 14,300,000 acres, minor irrigation works 1,750,000 acres, and protective major irrigation works 347,000 acres. The capital outlay to the end of the year 1912-13 was Rs. 65 crores, divided between the last mentioned classes in the proportion of 79, 6, and 1 per cent respectively. The net revenue realised during the same year amounted to Rs. 4,64 lakhs, namely, Rs. 4,31 lakhs from productive major irrigation works, Rs. 30 lakhs from minor irrigation works, and Rs. 4½ lakhs from protective irrigation works. In the last ten years the net revenue from irrigation and navigation works has increased by 52 per cent—from Rs. 3,04 lakhs in 1902-03 to Rs. 4,64 lakhs in 1912-13. Table No. 106 shows for each province the mileage of different main canals in operation and the area irrigated at the end of each year from 1908-09 to 1912-13. The details for 1912-13 are given in the margin. Madras and the Punjab each accounts for about 12,000 miles of productive major irrigation works with an area of 2 million and 7 million acres, respectively. The United Provinces come next with nearly 10,000 miles and an average of 2½ million acres. Bihar and Orissa and Bombay each about 3,000 miles with 930,000 acres and 1,200,000 acres, respectively. The protective major irrigation works are the largest in the United Provinces with 1,326 miles and 118,000 acres, Bombay and the Central Provinces accounting for about 560 miles each with 114,000 and 31,000 acres. Under minor irrigation works Bombay stands foremost with 2,400 miles and a million acres.

In Bengal the navigation receipts have of late years suffered from the competition of the railways. The Ganges Canal, the Lower Ganges Canal, and the Eastern Jumna Canal are the most remunerative works in the United Provinces. In the Punjab the greatest amount of net revenue is obtained on the Lower Chenab Canal, which promises developments due to recent extension. The Upper Bari Doab Canal, the Lower Jhelum Canal, the Western Jumna Canal, and the Sirhind Canal are also very remunerative. The Godavari, the Kistna, and the Cauvery Delta Systems are the most remunerative works in Madras.

Table No. 107 gives the details of irrigation and navigation in each province in each year from 1908-09 to 1912-13. The details for 1912-13 are summarised in the marginal table. Of the total irrigated area the Punjab contains 7·3 million acres, Madras nearly 4 million acres, the United Provinces 2·7 million acres Bombay 2·3 million acres, Bihar and Orissa nearly a million acres and Burma 739,000 acres. The average water rate per acre is about Rs. 10 in British Baluchistan, nearly Rs. 5 in the Punjab, about Rs. 4 in Madras, Ajmer-Merwara, the United Provinces, Burma and the North-West Frontier Province; nearly Rs. 3 in Bombay and the Central Provinces, and about Rs. 2 in Bengal and Bihar and Orissa.

I have the honour to be,

SIR,

Your most obedient Servant,

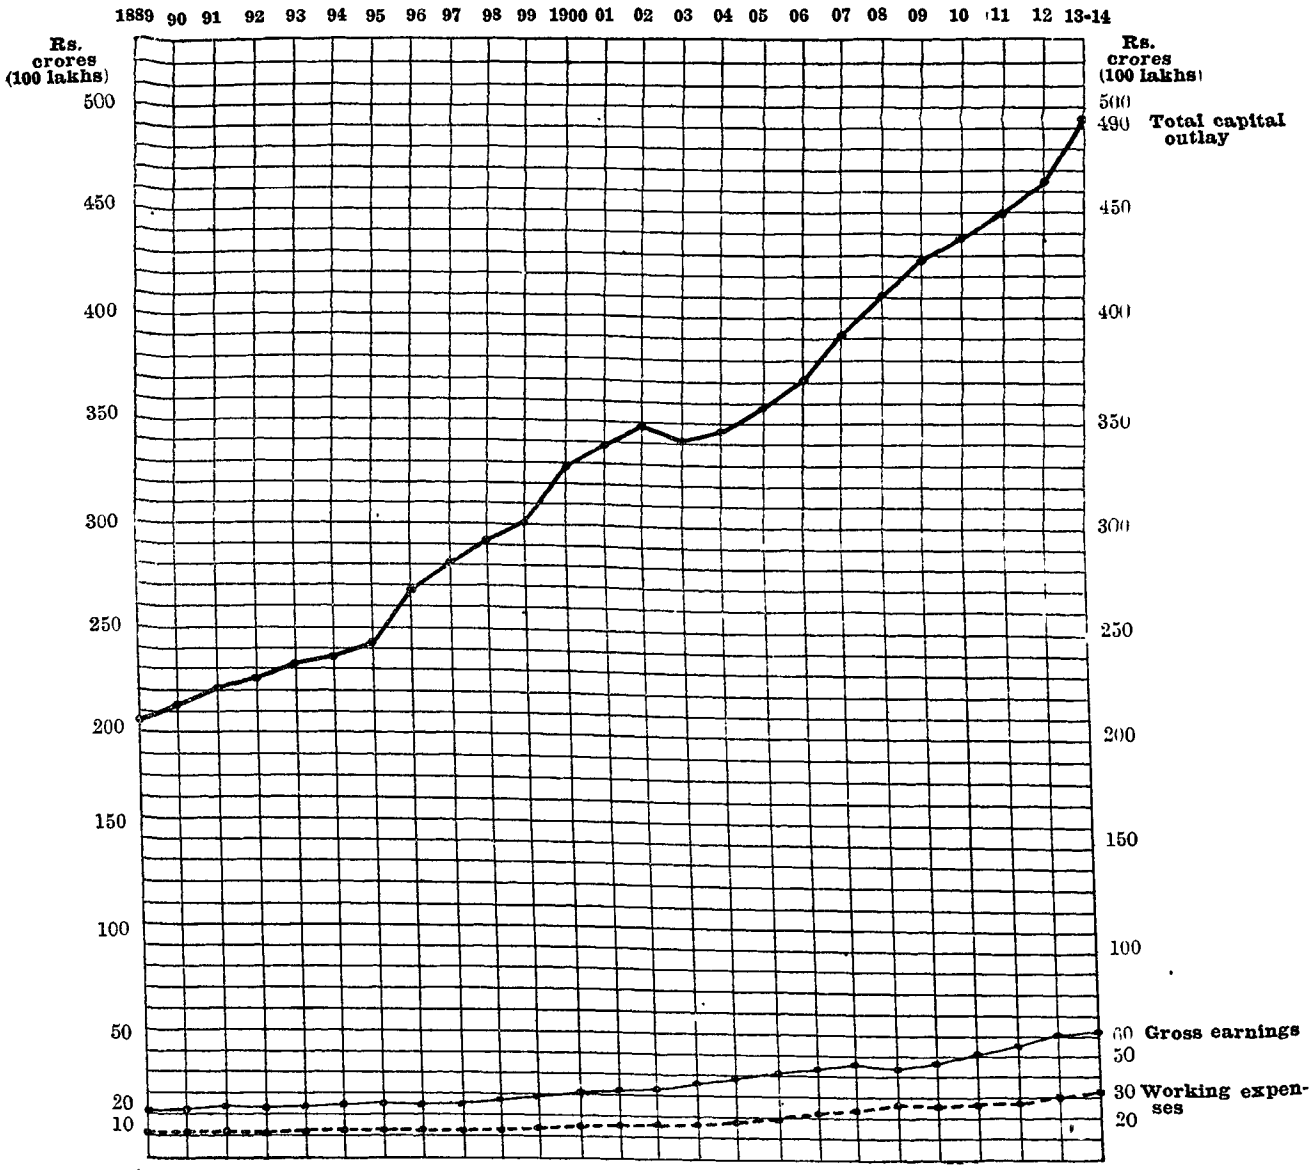
G. FINDLAY SHIRRAS,
Director of Statistics.

Department of Statistics, India
Calcutta, May 8th, 1915

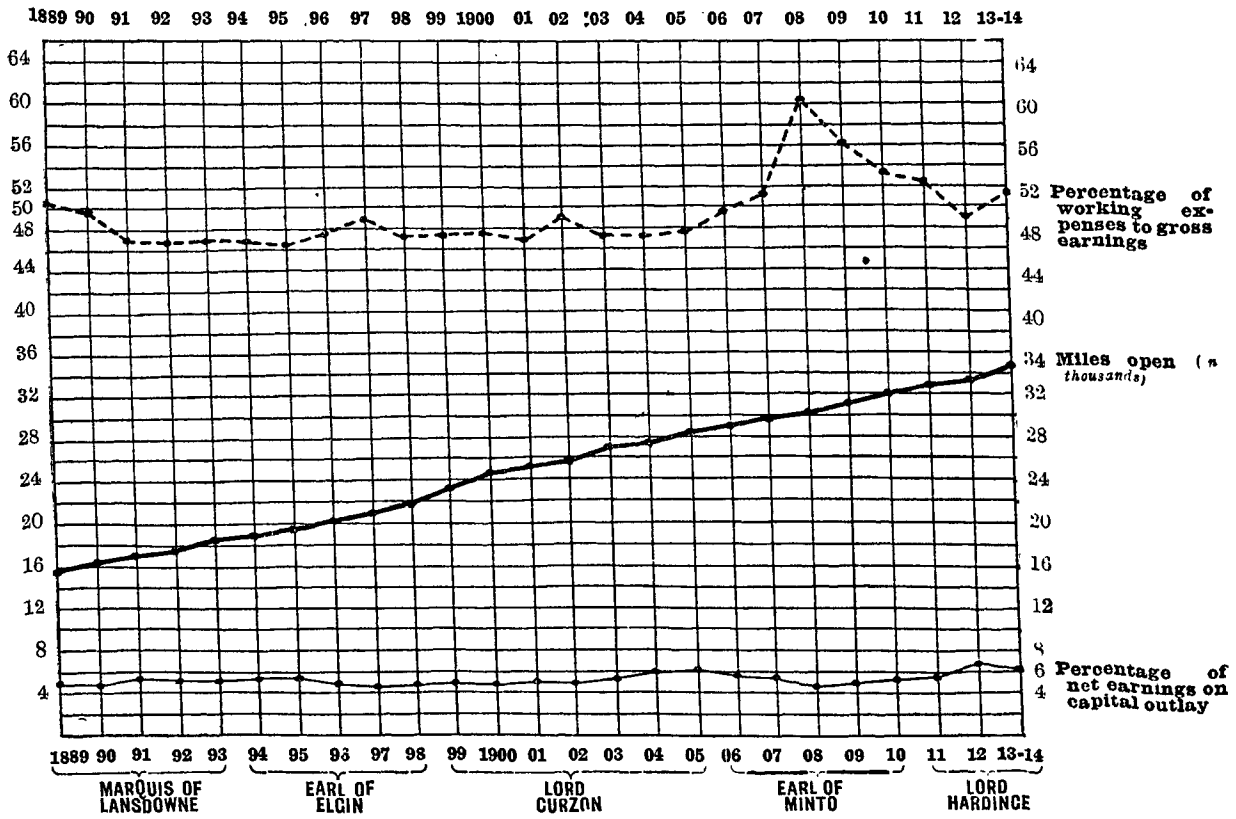
INDIAN RAILWAYS.

CAPITAL OUTLAY, GROSS EARNINGS AND WORKING EXPENSES.

(25 years—1889 to 1913-14.)



PERCENTAGE OF WORKING EXPENSES TO GROSS EARNINGS, PERCENTAGE OF NET EARNINGS ON CAPITAL OUTLAY ON LINES OPEN AND PARTLY OPEN, AND NUMBER OF MILES OPEN FOR TRAFFIC.



Note.—The "Total Capital Outlay" is that on all Indian Railways, *viz.*, (i) open, (ii) partly or wholly under construction, and (iii) on miscellaneous items; while for the purposes of the "percentages of net earnings on capital outlay" (i) open lines alone are reckoned.

INDUSTRIAL CENSUS

No. 2.—Statement showing the main results of the Industrial Census in India taken in 1911*

Description of Factory, etc.	Number of factories	NUMBER OF PERSONS EMPLOYED					Number of females employed per 100 males	Province or State, where chiefly found, with percentage of number of persons there employed to total number in India
		Direction, supervision and Clerical Work		Workmen		Total		
		Europeans and Anglo-Indians	Indians	Skilled	Unskilled			
I. Growing of Special products.	1,687	1,627	10,346	18,446	779,988	810,407	84	
Coffee plantations	482	249	1,300	1,997	54,077	57,623	79	Madras (37); Mysore (43); Coorg (19).
Indigo plantations	121	98	2,076	2,486	26,135	30,795	16	Bihar and Orissa (100).
Tea plantations	1,002	1,150	6,543	12,074	683,818	703,585	91	Assam (70); Bengal (27).
II. Mines	562	1,164	4,911	71,695	146,317	224,087	38	
Collieries	353	326	3,846	57,068	81,637	142,977	43	Bengal (26); Bihar and Orissa. (61)
Gold Mines	12	577	157	6,381	21,477	28,592	8	Mysore (88).
III. Quarries of hard rocks	53	22	289	1,218	10,744	12,273	29	
Stone and Marble Quarries	50	21	257	1,147	10,441	11,866	29	Bombay (32).
IV. Textile Industries	1,487	1,426	18,597	250,580	286,986	557,589	25	
Cotton	1,127	573	12,585	167,191	127,841	308,190	29	Bombay (62).
Jute, hemp, etc.	223	734	4,744	66,065	150,776	222,319	21	Bengal (97).
V. Leather Industries	158	105	829	5,742	6,936	13,612	9	
Tanneries	122	41	589	3,814	4,955	9,399	7	Madras (47); Bombay (17).
VI. Wood, etc., Industries	168	185	1,955	11,506	15,421	29,067	3	
Saw mills	106	120	1,535	2,869	7,966	12,490	6	Burma (79).
Timber yards	27	17	227	5,650	5,551	11,445	..	Bihar and Orissa (83).
VII. Metal Industries	372	1,243	3,886	34,115	31,801	71,045	4	
Machinery and Engineering Workshops.	93	413	1,375	12,661	8,698	23,147	2	Bengal (51); Bombay (23).
VIII. Glass and earthenware industries.	453	67	1,423	10,532	37,444	49,466	24	
Brick and tile factories	411	56	1,197	9,120	35,783	46,156	23	Bengal (48).
IX. Industries connected with Chemical products.	655	586	2,747	12,023	34,002	49,358	13	
Oil mills	208	45	978	1,959	6,763	9,745	20	Bengal 44); Madras (21).
Petroleum refineries	9	212	240	2,942	7,464	10,858	..	Burma (99).
X. Food industries	720	486	4,869	11,243	57,803	74,401	16	
Flour and rice mills	403	201	2,757	5,690	33,726	42,374	12	Burma (70).
XI. Industries of dress	90	209	663	7,263	2,054	10,189	4	
Boot and shoe factories	23	70	240	4,054	799	5,163	3	United Provinces (64); Bombay (15).
XII. Furniture industries	50	30	235	2,102	1,005	3,372	2	
Furniture factories	46	27	219	1,897	967	3,110	2	Bengal (29); Bombay (16).
XIII. Industries connected with buildings.	163	82	638	3,292	18,156	22,168	30	
Lime works and kilns	53	17	230	359	7,024	7,630	39	Bombay (51); Central Provinces and Berar (23).
Stone, marble and cement works.	57	55	214	1,445	5,891	7,605	34	Bihar and Orissa (37); United Provinces (31).
XIV. Industries connected with transport.	242	1,302	4,155	80,805	38,855	125,117	1	
Railway workshops	118	834	3,064	65,460	29,365	98,723	1	Bengal (23); Bombay (16)
XV. Production and Transmission of physical forces.	64	262	414	4,351	3,142	8,169	16	
Gas works	14	122	176	3,165	1,217	4,680	..	Bengal (73); Bombay (23).
XVI. Industries of luxury	389	641	4,837	29,865	10,161	45,504	1	
Printing presses.	341	500	4,416	27,588	9,094	41,598	1	Bengal (30); Bombay (21) Madras (16).
Total, India	7,113	9,437	60,794	554,778	1,480,815	2,105,824	38	
Factories in which Mechanical power is used.	4,569	8,369	50,597	492,576	1,252,450	1,803,992	38	
Factories in which Mechanical Power is not used.	2,544	1,068	10,197	62,202	228,365	301,832	41

(A) Represents number of persons employed in one Dock; number of operatives employed in the other is included in Saw mills

(B) Included in Sugar works

(C) Number of persons employed is also included in Sugar works.

(D) See cotton gins

No. 5.—NUMBER of PERSONS employed in DIFFERENT INDUSTRIES

FACTORIES OWNED AND WORKED

Part I—Worked by

NOTE.—Variations in the figures of Bengal and Eastern Bengal and Assam for 1904-05 and 1905-06 are due to the territorial changes in those provinces in 1905

(*a*) For earlier figures see the 13th issue of Financial and Commercial Statistics of British India and the 1st and 6th issues of Statistics of British India, Part III

(*b*) The figures for Rajputana and Central India are not Native State figures but figures of the Imperial Post Office for the Central India Circle (now abolished) and the Rajputana Circle (which has also now been merged in the Central Circle)

(*c*) Abolished from the 1st July 1894

(*d*) Abolished from the 1st July 1907 and incorporated with the Punjab and Bombay circles. Includes figures from April to June 1907

in each CIRCLE, from 1870-71 to 1913-14

NOTE.—The figures for letters, postcards, newspapers, and packets are estimated from the actual figures for 14 days of the year, but for parcels they represent the actual number posted during the year

(a) For earlier figures, see the 13th issue of Financial and Commercial Statistics of British India and the 1st and 6th issues of Statistics of British India, Part III

(b) From 1899-1900 includes registered newspapers only, other newspapers being counted as packets

(c) Includes articles given out for delivery and posted at the Railway Mail Service. Letters under the heads "Registered" and "Value-payable" include packets both ordinary and value-payable.

NOTE.—This table is compiled from the Railway Administration Report for 1913-14. Payment to the Sinking Funds on account of State Railways has been excluded from this table but included in table No. 95. The amount of annuities in purchase of railways shown here slightly differs from that included in table No. 95. Hence the surplus net revenue in this table does not tally with that given in table No. 95, which has been compiled from the Finance and Revenue Accounts of the Government of India

No. 94.—GENERAL RESULTS of WORKING of EACH RAILWAY SYSTEM during 1913-14*

Railway System*	Date of opening of line	Mileage open at the close of the year	Total capital outlay including ferries and suspense on open line	Gross earnings	Working expenses	Net earnings	Percentage of working expenses to gross earnings	Percentage of net earnings on total capital outlay.

* Excludes lines for which information regarding "capital outlay," "gross earnings," etc., is not available
† Capital outlay on lines open, *i.e.*, on mileage earning revenue
(*a*) Estimated
(*b*) The decrease is due to the revision of the capital outlay in consequence of the substitution of the actual expenditure incurred on the construction of lines purchased by the State from Guaranteed Railway Companies as shown in rupees in the accounts of these Railways at date of purchase for the total purchase price converted at £1=R10, which was erroneously taken in stating the Capital expenditure in previous Railway Administration Reports.
Note.—From 1913-14 Financial years, 1st April to 31st March, have been adopted for reasons explained in the Introductory note

AND TRAFFIC of ALL RAILWAYS, from 1853 to 1913-14

No. 99.—ROLLING STOCK at the close of each year from 1911 to 1913-14

Particulars	1911	1912-13	1913-14
1. Locomotives—			
(a) Engines employed exclusively on passenger working	1,530	1,676	1,758
(b) Engines employed exclusively on goods working	1,737	2,241	2,413
(c) Engines employed on mixed working or on both passenger working and goods working.	4,148	3,707	3,797
(d) Total number of locomotives	7,415	7,624	7,968
2. Coaching stock	21,406	21,663	22,381
3. Goods stock—			
(a) Covered wagons	93,173	98,196	107,911 *
(b) Open wagons	48,803	50,087	51,488 *
(c) Timber trucks, including bolster truck	2,817	3,356	3,460
(d) All other classes	6,957	7,690	7,585
(e) Total of goods stock	151,750	159,329	170,444

* 22,343 additional broad gauge wagons have been ordered by the Indian Railways by the end of 1915

NOTE.—From 1913-14 Financial years, 1st April to 31st March, have been adopted for reasons explained in the Introductory note

No. 100.—TRAIN MILEAGE for the five years ending 1913-14

Particulars	1909	1910	1911	1912	1913-14
Coaching train miles (in thousands)	48,191	48,598	50,833	52,093	55,972
Goods train miles (in thousands)	44,065	47,690	53,219	59,992	57,933
Mixed train miles (in thousands)	30,859	31,986	33,746	34,940	34,581
Total including miscellaneous train-miles (in thousands)	128,260	132,823	142,944	152,761	156,276
Gross earnings per train-mile ₹	3·67	3·85	3·87	4·04	4·07
Working expenses per train-mile ₹	2·06	2·04	2·02	1·98	2·11
Net earnings per train-mile ₹	1·61	1·81	1·85	2·06	1·96

NOTE.—From 1913-14 financial years, 1st April to 31st March, have been adopted for reasons explained in the Introductory note

No. 101.—RAILWAY STAFF from 1904 to 1913-14

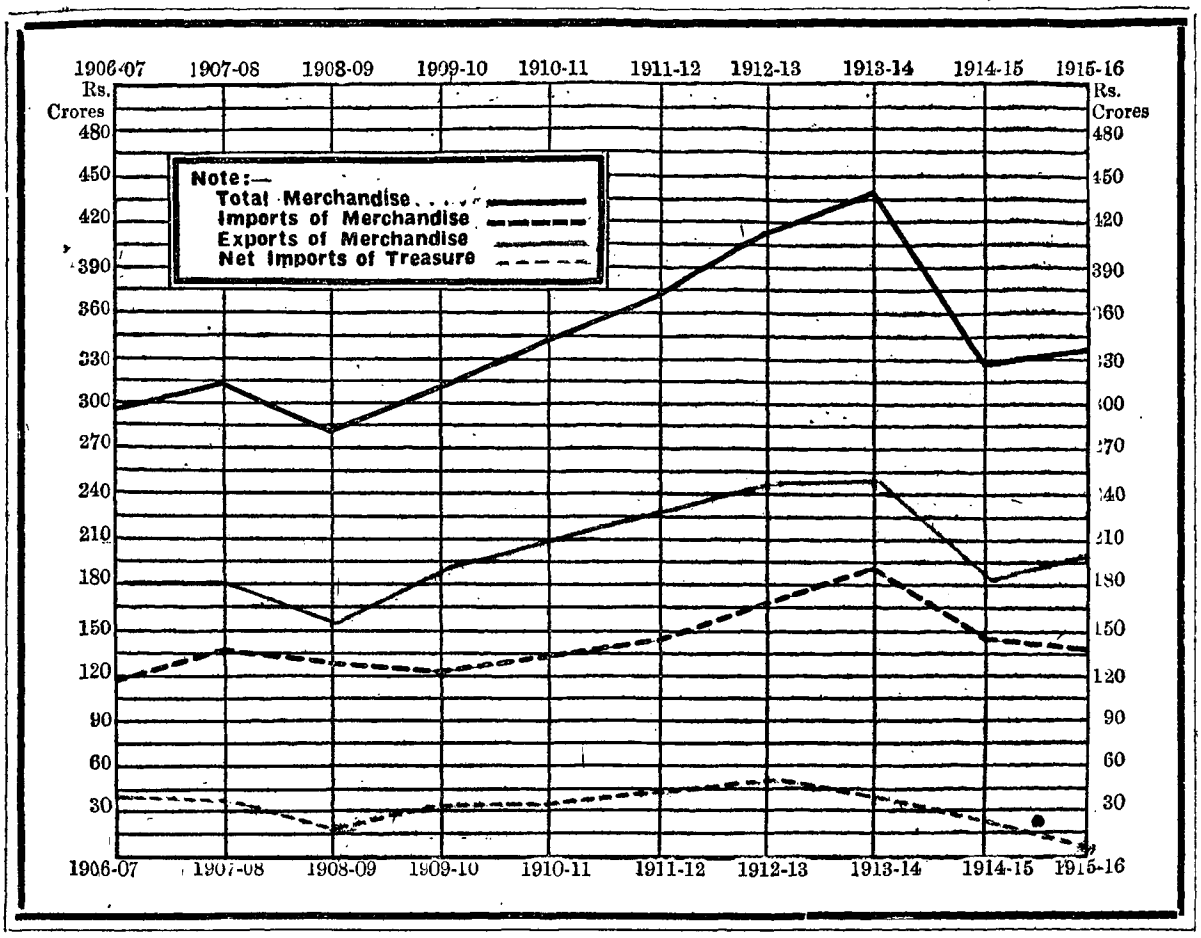
CALCUTTA : PRINTED BY SUPDT. GOVT. PRINTING, INDIA, 8, HASTINGS STREET.

I. GROWTH OF THE FOREIGN SEA-BORNE TRADE OF INDIA

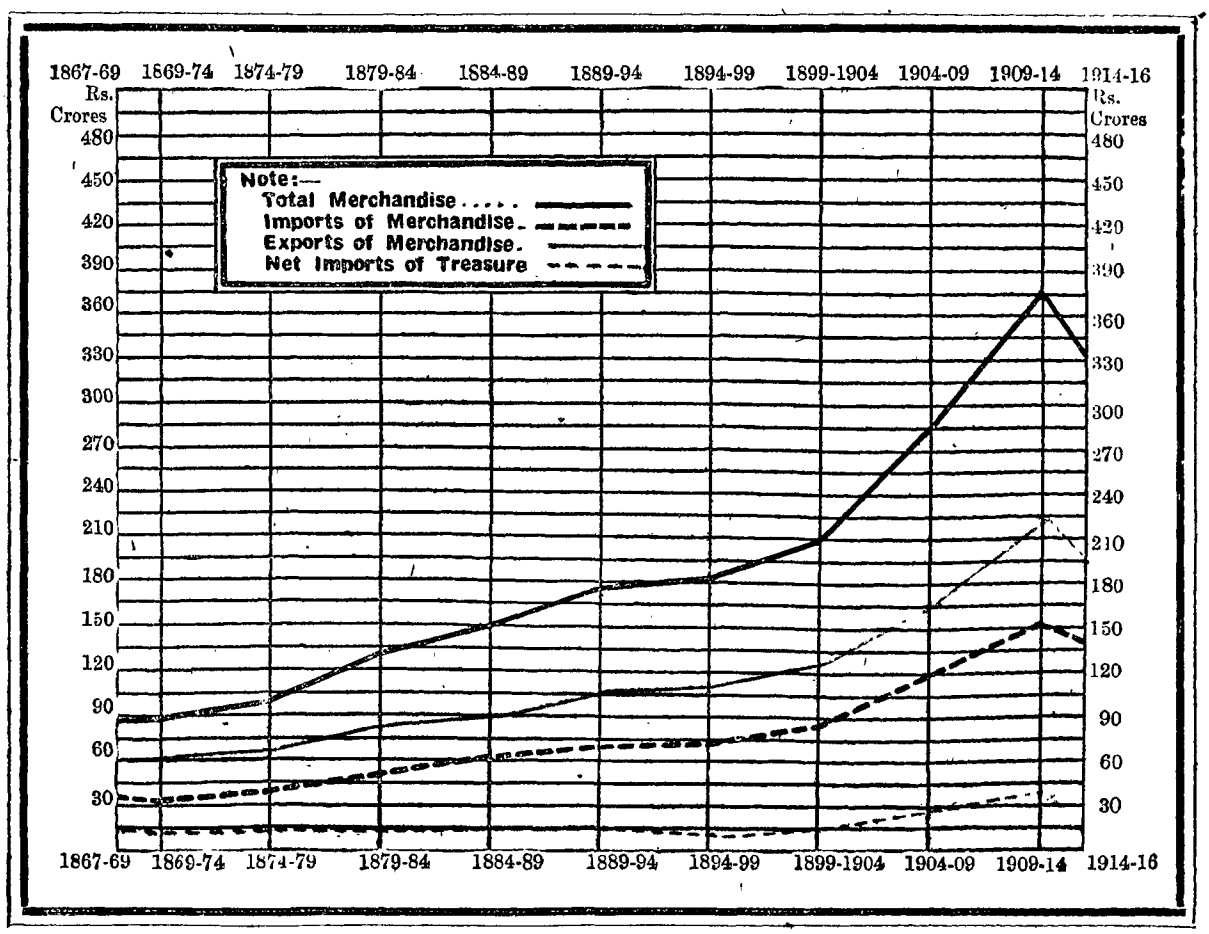
(*a*) **In a decade**

1906-07 to 1915-16



(*b*) **During Half a Century**

1867-68 to 1915-16



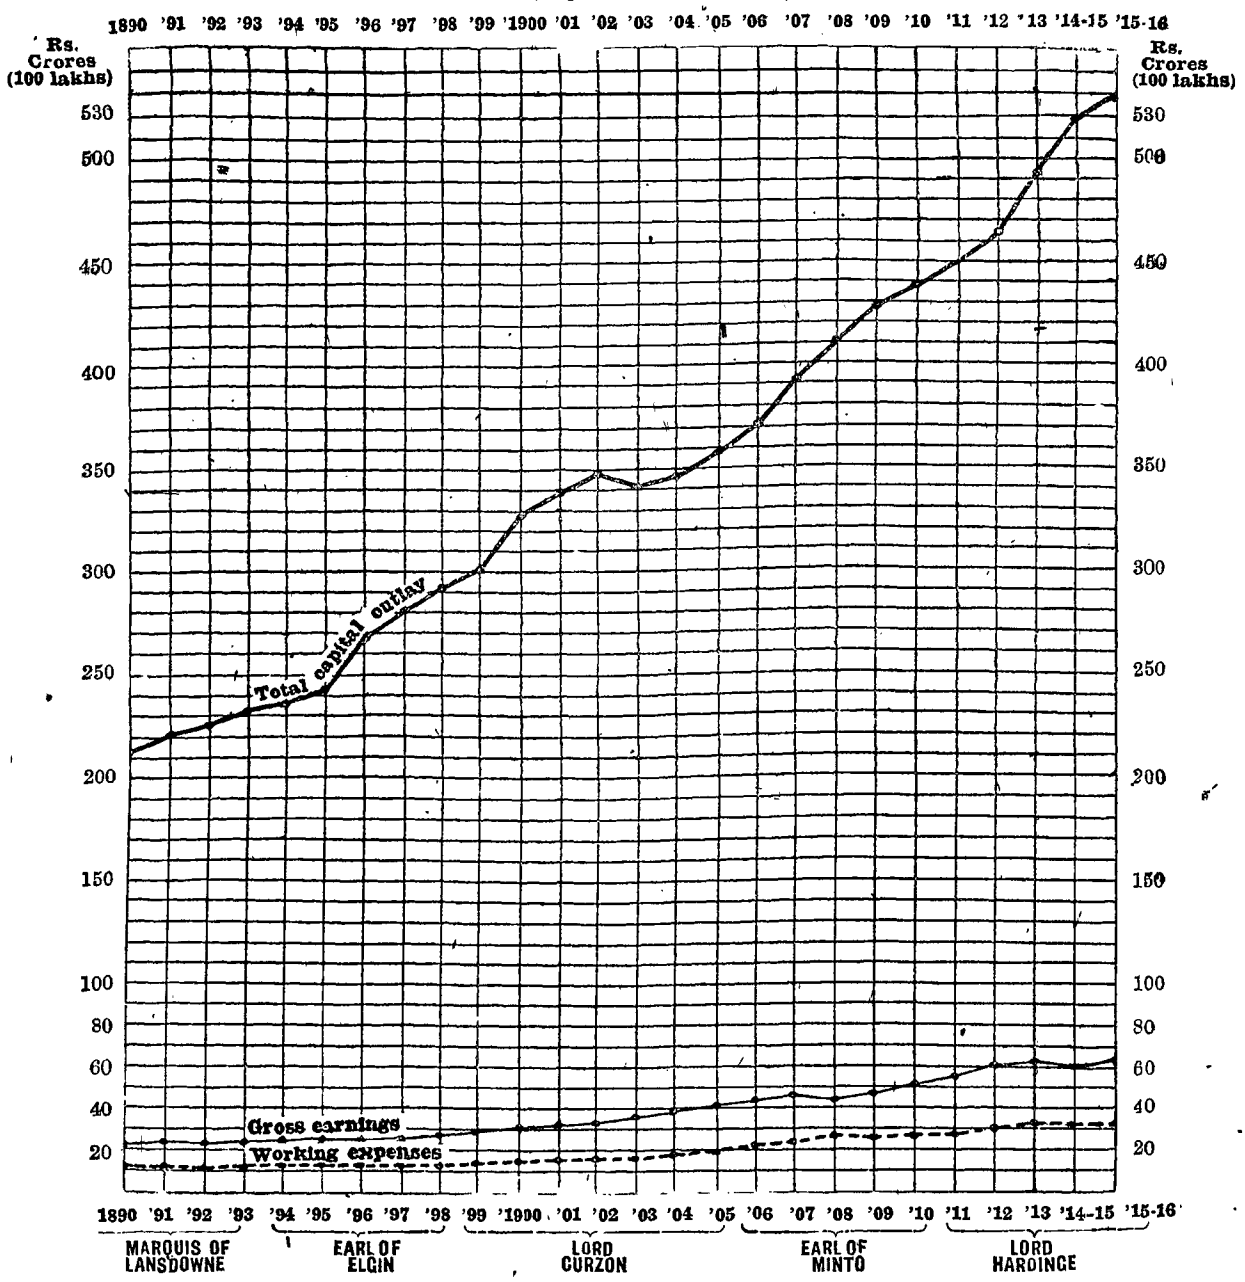
Note :—

1. **Each division of the ordinate represents 15 crores equal to Rs. 1,500 lakhs.**
2. **The curves for 1867-69 and 1914-16 represent averages for two years.**
3. **Total merchandise includes Imports and Exports, both private and Government.**
4. **Imports of merchandise are inclusive of Government stores.**
5. **Exports of merchandise are inclusive of re-exports and Government stores.**
6. **Net Imports of Treasure are the imports *minus* the exports of Gold and Silver, both private and Government,**

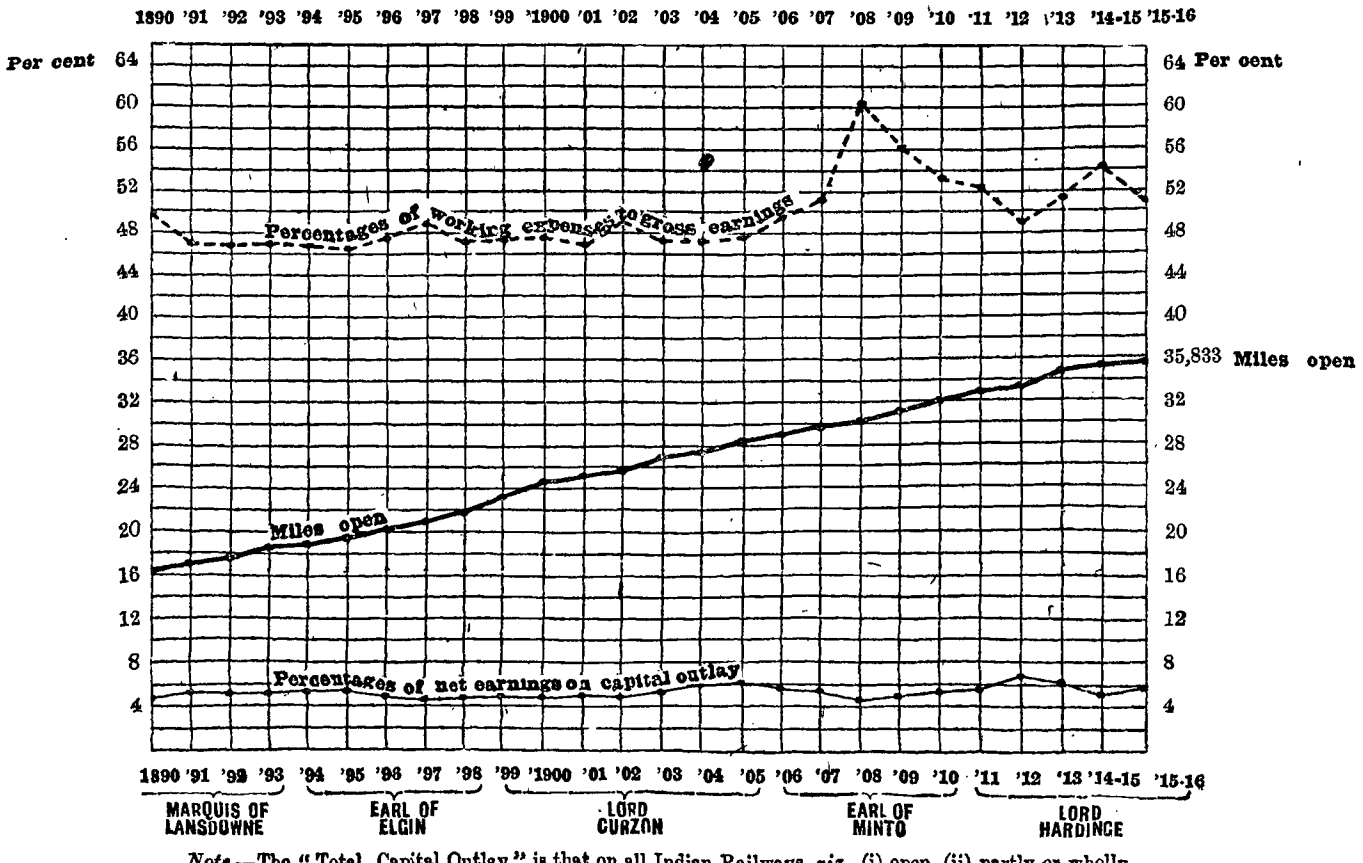
INDIAN RAILWAYS

2. CAPITAL OUTLAY, GROSS EARNINGS, AND WORKING EXPENSES

(26 years—1890 to 1915-16.)



PERCENTAGE OF WORKING EXPENSES TO GROSS EARNINGS, PERCENTAGE OF NET EARNINGS ON CAPITAL OUTLAY ON LINES OPEN AND PARTLY OPEN, AND NUMBER OF MILES OPEN FOR TRAFFIC



Note.—The "Total Capital Outlay" is that on all Indian Railways, *viz.*, (i) open, (ii) partly or wholly under construction, and (iii) on miscellaneous items; while for the purposes of the "percentages on net earnings on capital outlay" the item (i) open lines only is reckoned.

3. ANNUAL GROSS EARNINGS AND WORKING EXPENSES ON THE PRINCIPAL SYSTEMS OF RAILWAYS IN INDIA FROM 1906 TO 1915-16.

Statistics of British India*

Vol. I.—Commercial Statistics

INTRODUCTORY NOTE

The Statistical tables in this volume deal with industries, mills, mines, joint-stock companies, foreign trade and shipping, post office, telegraphs, railways, and irrigation. Special steps were taken to bring the tables more up to date and the statistics are therefore brought up to the period ending 31st March, 1916. Three charts showing (*i*) the growth of the Foreign Seaborne Trade of India, (*ii*) capital outlay, gross earnings, and working expenses of Indian Railways, and (*iii*) gross earnings and working expenses on the principal systems of Railways in India have been added, with also an index for easy reference.

SUMMARY TABLE

Table No. 1 gives the salient features of each section of the Commercial Statistics included in this volume.

INDUSTRIAL CENSUS

[For Table, see page 5]

Table No. 2 shows the main results of the Industrial Census taken at the time of the Population Census of 1911. A caveat, however, should be added regarding the possibility of obtaining an industrial census from a population census. Experience has proved that one cannot hope for an industrial census from a population census, especially in India, for several reasons as explained in Appendix K to the "Report on the Enquiry into the Rise of Prices in India." The chief reasons are: (1) change of means of livelihood with the season; for instance, the same man at one time may be a field-worker, at another an earthdigger, and again a porter, saltpetre worker, paddy husker, *palki*-bearer, firewood-collector, etc., so that the head under which he will appear in the occupation table depends on the date fixed for the enumeration. (2) Combination of occupations; a worker frequently combines several occupations wholly unconnected with one another, so that at the census he is unable to say which is his chief means of support. (3) Mixed occupations; for instance, money-lending and grain-dealing are in many parts merely different aspects of the same business. (4) Confusion of thought between a man's caste which connotes his traditional occupation, and the means of livelihood by which he actually subsists; for instance, a man of the barber caste will often call himself a barber even when his income is derived from agriculture or some other employment. It may be noted that this difficulty of classification according to occupation from a population census is not confined to India alone. In the United States and in Germany, it has been held that a population census cannot be expected to give the requisite information regarding occupation, and that a comprehensive industrial survey obtained by detailed investigation and spread over a considerable time is to be preferred. In the report of the census of England and Wales for 1891 it is said: "A census * * does not supply data which are suitable for minute classification or admit of profitable examination in detail. The most that it is reasonable to expect from data so collected is that they shall give the means of drawing such a picture of the occupational distribution of the people as shall be fairly true in its main lines, though little value can be attached to the detailed features. It is not wise to demand from a material a result for the production of which it is unsuited."

LARGE INDUSTRIAL ESTABLISHMENTS

[For Tables, see pages 6 to 52]

Factory laws

The conditions of factory labour until 1st July, 1912, were regulated by the Indian Factories Act, XV of 1881, as amended by Act XI of 1891. The chief provisions of the amended Act were: Local Governments were empowered to appoint inspectors of factories, and certifying surgeons to certify as to the age of children. A midday stoppage of work was prescribed in all factories, except those worked on an approved system of shifts, and Sunday labour was prohibited, subject to certain exceptions. The hours for employment for women and children were fixed with intervals of rest; and provision was made for the fencing of machinery and for the promulgation of rules as to water supply, ventilation, the prevention of over-crowding, etc.

The decision to undertake further legislation was arrived at after comprehensive enquiries. An important factor in the case was the increasing use of electric light in the Bombay mills, which radically changed the conditions prevailing when the Act of 1891 was passed and had abolished the security that operatives would not be employed for more than 12 hours a day on the average. The question of the hours of employment in textile factories was brought into prominence by the period of prosperity that the cotton industry began to enjoy in the cold weather of 1904-05, a large number of operatives being regularly employed for 15 hours a day or even longer. Owing to complaints regarding the long hours worked in many mills, the Government of India in 1906 appointed a small Committee to conduct a preliminary inquiry into the conditions of labour in textile factories. The con-

* The previous issue of these Statistical Volumes was published under the title of "Statistical Abstract for British India"

clusions arrived at by this Committee formed the basis of an investigation, extending to all factories in India by a representative Commission. The recommendations of the Committee and of the Commission having been considered by the Government of India and the Local Governments, a Bill was introduced in July, 1908, to amend and consolidate the law relating to factories, and was finally passed into law as Act XII of 1911. The new Act, which came into force on 1st July, 1912, defines the term "factory" as any premises wherein, or within the precincts of which, steam, water or other mechanical power or electrical power is used in aid of any process for, or incidental to, making, altering, repairing, ornamenting, finishing or otherwise adapting for use, for transport or for sale any article or part of an article. The term does not apply to (*a*) any mine subject to the operation of the Indian Mines Act, or (*b*) any electrical generating or transforming station, or (*c*) any indigo factory, or (*d*) any factory situated on and used solely for the purposes of a tea or coffee plantation, or (*e*) any factory wherein on no day in the year are more than forty-nine persons simultaneously employed: provided that the Local Government may apply all or any of the provisions of this Act to any factory or class of factories wherein any specified number of persons, not being less than twenty, are on any day simultaneously employed. The Act has limited the hours within which children and women may be employed, and has further restricted the employment of women by night except in certain cases. It also contains a number of new provisions for securing the health and safety of the operatives, making inspection more effective, and securing generally the better administration of the Act.

Definitions of the term "factory"

Tables Nos. 3, 4, 5, and 6 deal not only with factories, as defined above, which come under the operation of the Indian Factories Act, but also include concerns which do not come under the operation of the Act but which are considered to be of sufficient industrial importance, excluding mines, electrical generating stations, indigo factories, and factories situated on and used for the purposes of tea and coffee plantations. Tables Nos. 7, 7-A, 8, 9, and 9-A deal only with factories coming under the operation of the Act. Industrial concerns owned by Government, State Darbars, and local bodies are dealt with in table No. 3. Those owned by companies or individuals are dealt with in tables Nos. 4, 5, and 6, factories worked by mechanical or electrical power and those not so worked being shown separately in tables Nos. 5 and 6.

Number of concerns

The total number of factories and industrial concerns of all classes dealt with in these tables was 4,053 in 1915 as against 4,044 in 1914. From the reports on the working of the Indian Factories Act it appears that in 1915 there were within the scope of the Act 121 factories, belonging to the State and to local bodies, such as municipalities and port trusts, as against 118 in 1914. Among these there were 28 printing presses, 19 railway workshops, 16 canal and engineering workshops, and a considerable number of military arsenals and factories. In addition to these 121 factories, there were 31 more concerns which did not come within the operation of the Indian Factories Act. The total number of factories owned by Government and local bodies in British India thus comes to 152 in 1915 as against 180 in 1914, the important of these being shown in the margin. These figures do not include factories situated in Native States and owned by State Darbars. So far as reports have been received, the total number of factories owned by State Darbars was 19.

	1914	1915
Printing presses	36	34
Railway workshops	32	20
Engineering workshops	16	16
Municipal workshops	9	8
Arsenals	7	7
Arms and ammunition	8	6
Waterworks	11	8

Of the factories owned by compaines or individuals, those worked by mechanical or electrical power numbered 3,458 in 1915 as against 3,394 in 1914; the more important of these are stated in the margin. These represent about 81 per cent of the total number of factories worked by mechanical or electrical power in all India (including those in Native States so far as reported). The factories created by the cotton industry exist principally in Bombay and those relating to the jute industry in Bengal; while rice mills and saw mills are naturally mostly in Burma. Of the other factories there are none largely assigned to any particular industry. Besides these, there were 424 concerns not worked by mechanical or electrical power, including 38 stone factories, 16 silk filatures, 54 lac factories, 22 tanneries and leather works and 4 printing presses.

	1914	1915
Cotton gins and presses	1,645	1,655
Rice mills	380	440
Cotton mills	260	267
Jute presses	130	125
Saw mills	125	118
Railway workshops	75	73
Jute mills	71	72
Iron and brass foundries	57	43
Flour mills	52	42

Persons employed

The daily average number of persons employed in all the factories in India, whether worked by mechanical or electrical power or not so worked, and whether owned by Government or local bodies or by companies or individuals, was 1,135,147 in 1915, as against 1,162,905 in 1914 and 1,090,114 in 1913. Of these the number employed in factories under the Act was 1,004,106, as against 950,973 in 1914 and 936,390 in 1913 as shown in the margin. Of this total 378,235 (being 37 per cent) were employed in factories in Bengal, and 280,566 (being 27 per cent) in Bombay, these two provinces employing nearly two-thirds of the factory labour of India.

		1914	1915
Adults	Males	746,773	791,978
	Females	144,157	150,356
Children	Males	48,984	50,906
	Females	11,059	10,866

Accidents

There were 5,452 accidents, causing death or bodily injury to operatives, reported in 1915, as against 4,929 in 1914. Of these 115 were attended with fatal results, 42 occurring in Bengal and 21 in Bombay. Bengal also had the largest number of serious accidents, namely, 448, against 67 in Bombay, 121 in Burma, 91 in the United Provinces, and 21 in the Punjab. Much the largest number of minor accidents—1,682 out of a total of 4,414—occurred in Bombay, where cotton mills and presses predominate.

Convictions

There were 97 convictions in respect of offences against the Factories Act in 1915. Of these 34 were for the employment of persons in contravention of the Act, 19 for neglect to fence machinery, etc., and 7 for neglect of ventilation and cleanliness.

BREWERIES

[FOR TABLE, SEE PAGE 53]

According to the statistics of 1915, there are 18 breweries in operation in British India. Ten of the breweries are located at stations in the Himalayas from Murreé to Darjeeling. The largest brewery is the one at Bangalore; the Murree, Yellanhalli, Rawalpindi, Quetta, Kasauli, Ootacamund, Mandalay, and Naduvakarai breweries standing next in the order shown.

Production was largest in 1902, since when it has tended to decline, while imports of foreign beer have increased proportionately; in the year 1907, the process was reversed, internal production having advanced slightly and imports decreased. Since then until the outbreak of war there was a steady decrease in the production, while the imports, after declining up to 1911 (with a small set-back in 1910), recovered appreciably in 1912 and rose higher in 1913. From 1914 the imports have decreased, owing to the difficulty in obtaining freight, the absence of a large portion of the British Regular Army from India, and the shortage of light German beer. In 1915 the total quantity brewed in British India was 2,533,000 gallons and that imported from foreign countries 2,818,000 gallons, as against 3,434,000 gallons and 4,213,000 gallons, respectively in the preceding year.

COTTON MILLS

[FOR TABLES, SEE PAGES 54 TO 74]

The Indian cotton industry dates as far back as 1851, when the first mill was started, but complete statistics were not reported until 1879-80. The following statement shows quinquennial averages from that year to 1913-14 and annual figures for 1914-15 and 1915-16. The figures in brackets represent the variations for each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100: (Sterling capital has been converted into rupees at the average rate of exchange for the period)

	Number of mills at work	Authorised Capital (in lakhs of R.) as far as reported	Number (in thousands) of		
			Persons employed	Looms	Spindles
1879-80 to 1883-84	63 (100)	657·6 (100)	51·6 (100)	14·5 (100)	1610·6 (100)
1884-85 to 1888-89	93 (148)	887·9 (135)	75·7 (148)	18·2 (126)	2296·8 (143)
1889-90 to 1893-94	127 (202)	1161·7 (177)	116·1 (228)	25·3 (175)	3263·8 (203)
1894-95 to 1898-99	156 (248)	1419·5 (216)	150·0 (294)	36·6 (253)	4046·1 (251)
1899-1900 to 1903-04	195 (310)	1687·9 (257)	171·6 (336)	42·0 (290)	5000·9 (310)
1904-05 to 1908-09	218 (346)	1878·7 (286)	216·4 (424)	60·0 (414)	5549·1 (345)
1909-10 to 1913-14	257 (408)	2243·3 (341)	243·8 (474)	88·1 (608)	6406·4 (398)
1914-15	255 (405)	2220·3 (338)	260·4 (511)	103·3 (712)	6598·1 (410)
1915-16	267 (424)	2291·5 (348)	292·2 (573)	108·4 (748)	6675·7 (414)

It will be seen that the number of persons employed and of looms and spindles in operation have increased to a larger extent than the amount of authorised capital, which, however, has not been reported from many private mills.

Number of mills

At the end of 1915-16 there were in India 267 cotton mills, containing 108,417 looms and 6,675,688 spindles. Of this number, 68 were exclusively spinning mills; 29 were exclusively weaving mills; and in 170 mills both spinning and weaving were carried on. They employed a daily average number of 292,160 persons: 207,361 men, 47,015 women, 27,144 children, and 10,640 unspecified.

Capital

The authorised capital of the mills, as far as this information has been furnished, is R22,91,50,560, including the sterling capital of £516,078; of the rupee capital, R18,83,80,686 is paid-up and of the sterling capital £443,325 is paid-up. There are, further, rupee debentures to the value of R3,07,85,600 issued by 41 companies. Twenty-five mills also out of the 36 worked by private proprietors have not reported the capital employed by them, and for these about R20 crores would seem to be a fair estimate. The aggregate of the authorised capital and debentures is thus arrived at nearly R28 crores, and of this R21 crores or £14·3 millions is paid-up.

The mills are located as follows:—

	Number	Authorised capital (R)
Bombay: Island	86	8,35,41,200
„ Ahmedabad	62	2,74,76,250
„ elsewhere	27	2,12,00,000
Bengal, almost all near Calcutta	14	{1,33,00,000 / £200,000}
Madras, city	5	33,00,500
„ elsewhere	9	95,00,500
United Provinces: Cawnpore	7	1,48,00,000
„ „ Agra	5	38,00,000
„ „ Aligarh	3	17,75,000
„ „ Mirzapur	2	10,00,000
„ „ Lucknow	1	5,00,000
„ „ Moradabad	1	5,00,000
Delhi	2	7,00,000
Punjab: Lahore	1	10,00,000
„ Amritsar	1	7,00,000
„ Hissar	1	7,00,000
Central Provinces: Nagpur	1	96,87,500
„ „ elsewhere	5	53,26,034
Berar: Badnera	1	5,50,000
„ Akola	2	16,55,000
Ajmer-Merwara	2	13,40,000
Rajputana: Kishangarh	1	5,00,000
Central India: Indore	3	45,03,906
„ „ Ujjain (Gwalior)	2	20,00,000
Baroda	4	22,25,000
Bhavnagar	4	9,29,000
Wadhwan	1	5,00,000
Kolhapur	1	10,00,000
Nandgaon	1	12,00,000
Hyderabad	3	32,00,000
Mysore: Bangalore	2	22,00,000
French India: Pondicherry	4	£316,078

The Bombay Presidency possesses 66 per cent of the mills, 69 per cent of the spindles, and 78 per cent of the looms.

Production of yarn

The total production of yarn in the mills in British India, as far as reported, and the figures of exports, are as follows (lbs) :

	Nos. 1 to 25	Above No. 25	Wastes	Total Production	Total Exports
Average 1896-97 to 1900-01 .	423,906,898	20,082,852	..	443,989,750	198,002,463
„ 1901-02 to 1905-06 .	537,379,018	39,935,969	..	577,314,987	270,818,888
„ 1906-07 to 1910-11 .	555,373,854	53,392,346	160,175	608,926,375	228,318,890
1911-12 . . .	531,662,851	58,474,610	704,206	590,841,667	161,129,123
1912-13 . . .	589,093,564	60,828,059	660,955	650,582,578	214,879,789
1913-14 . . .	582,666,736	61,507,343	678,598	644,852,677	206,859,417
1914-15 . . .	557,092,101	57,389,499	475,216	614,956,816	142,447,897
1915-16 . . .	624,474,474	58,029,663	650,562	683,154,699	168,106,232

In the last quinquennium the annual outturn of yarn has exceeded 590,000,000 lbs in every year. In 1915-16 the output was 683 million lbs, as against 615 million lbs in 1914-15.

The spinning of yarn is in a large degree centred in Bombay, the mills of that province producing nearly 75 per cent of the quantity produced in British India. The United Provinces and Madras produced about 8 per cent and 7 per cent, respectively ; while Bengal and the Central Provinces produced about 5 per cent and 5·4 per cent, respectively. Elsewhere the production is as yet very limited.

There was a continued increase in the production of yarn of counts higher than No. 25, till 1908-09, when the production reached 58 million lbs. Since then it has ranged between 50 million and 61 million lbs, the production in 1915-16 amounting to 58 million lbs, which is above 8 per cent of the whole production. In the Central Provinces, Bengal, the United Provinces, and the Punjab the mills spin hardly any yarn above No. 25, yarn of that count and lower numbers representing 96, 97, 99, and 98 per cent, respectively, of the whole production. In Bombay, however, the spinning of the higher counts (above 25) is over 9 per cent of the whole, and in Madras it is over 15 per cent. Using Egyptian and other imported cotton, the Bombay mills are now spinning in appreciable quantity yarns of No. 40 and upwards. In 1909-10 the production in British India of the finer yarns—Nos. 31 to 40—decreased to 15·5 million lbs from 20 million lbs in 1908-09, but since then there has been an improvement, the output in 1915-16 being 18 million lbs.

It is interesting to note that the imports of yarn from the United Kingdom and other places are about 6 per cent of the total production in British India. The figures are (*lbs*) :

	Nos. 1 to 25	Above No. 25	Unspecified descriptions	Total Imports (including unspecified descriptions)
Average 1896-97 to 1900-01 . . .	5,654,194	38,315,540	2,317,358	46,287,092
„ 1901-02 to 1905-06. . .	3,571,768	29,095,637	2,602,569	35,269,974
„ 1906-07 to 1910-11 . .	2,608,278	31,574,481	3,680,680	37,863,439
1911-12	1,549,448	35,452,712	4,956,750	41,958,910
1912-13	4,147,598	40,163,550	5,724,062	50,035,210
1913-14	2,150,213	35,202,454	6,818,500	44,171,167
1914-15	813,222	35,864,034	6,187,084	42,864,340
1915-16	1,338,356	33,126,170	5,962,398	40,426,924

Production of woven goods

The production of woven goods in the mills in British India, as far as reported, has been as follows (*lbs*) :

	Grey and bleached piece-goods	Other kinds	Total
Average 1896-97 to 1900-01	80,557,484	11,295,465	91,852,949
„ 1901-02 to 1905-06 . . .	109,884,271	25,009,554	134,893,825
„ 1906-07 to 1910-11 . . .	154,123,927	40,007,307	194,131,234
1911-12	192,977,167	59,149,040	252,126,207
1912-13	196,130,071	71,532,912	267,662,983
1913-14	188,450,593	67,955,409	256,406,002
1914-15	198,253,599	59,926,785	258,180,384
1915-16	249,628,930	81,224,045	330,852,975

Owing to low prices of raw cotton and high prices of cloth, the production increased by about 12½ per cent in 1903-04, and by 15·8 per cent in 1904-05. In the two following years the rate of increase was less rapid. The annual increase from 1907-08 to 1914-15 ranged between 2 per cent and 17 per cent. In 1915-16 the total production reached 331 million lbs, the highest on record, the increase over the preceding year being 28 per cent.

Weaving is concentrated in the Bombay mills to an even greater degree than spinning, the mills of that province producing about 87 per cent of the whole quantity woven in British India. The United Provinces produce about 4 per cent, the Central Provinces nearly 4·2 per cent, and Madras about 3·6 per cent. The goods woven are mainly grey and bleached piece-goods, these representing nearly 76 per cent of the whole production.

The most important kinds of grey and bleached piece-goods woven in the mills are specified below (in lbs)

	Average 1901-02 to 1905-06	Average 1906-07 to 1910-11	1911-12	1912-13	1913-14	1914-15	1915-16
Shirtings and longcloth .	38,611,145	50,679,465	69,447,175	65,358,088	63,250,051	72,059,380	93,200,209
Dhutis . . .	25,448,365	43,950,296	53,439,511	57,025,695	55,850,403	53,975,512	66,625,089
T. cloths, domestics, and sheetings . . .	19,376,545	24,817,341	27,156,897	28,079,482	25,224,287	26,382,077	32,345,559
Chadars . . .	13,628,457	15,678,079	21,781,029	24,221,406	22,347,938	21,522,020	25,003,732

The proportion of woven goods other than grey and bleached piece-goods was highest in Madras, where in 1915-16 it was about 67 per cent. In the Central Provinces the proportion was about 27 per cent and in Bombay 23·6 per cent.

Comparison of piece-goods imported and produced

Figures of imports are not readily comparable with those of production, because the former are recorded in yards and the latter up to the year 1906 were recorded in lbs, with the exception of grey and bleached piece-goods : the figures of grey and bleached piece-goods are as follows (in millions of yards) :

	Imported	Produced	Percentage of production to importation
Average 1896-97 to 1900-01	1654·21	319·55	19·3
„ 1901-02 to 1905-06	1741·6	457·38	26·3
„ 1906-07 to 1910-11	1749·45	676·19	39·2
1911-12	1848·46	837·72	45·3
1912-13	2303·88	855·71	35·1
1913-14	2327·53	816 66	35·0
1914-15	1924·46	820·70	42·6
1915-16	1759·65	1024·34	58·2

The yardage of coloured piece-goods from April 1906 was (in millions of yards) :

	Imported	Produced	Percentage of production to importation
Average 1906-07 to 1910-11	519·20	152·71	29·4
1911-12	589·43	241·24	40·9
1912-13	682·21	295·41	43·3
1913-14	831·77	277·08	33·3
1914-15	494·77	241·20	48·7
1915-16	358·74	331·50	92·4

Production in Native States

To the figures given above for mills in British India, may be added the production in Berar prior to the 1st October, 1903, and in the Native States, which is stated below (in lbs). The States are Mysore, Indore, Baroda, Nandgaon, Bhavnagar, Hyderabad, Wadhwan, Travancore (Quilon), Kishengarh, Gwalior (Ujjain) and Kolhapur. The production of one mill in Pondicherry has been reported from April, 1909 :

	Yarn			Woven goods		
	Nos. 1 to 25	Above No. 25	Total	Grey and Bleached	Other kinds	Total
Average 1896-97 to 1900-01 .	8,[illegible]997	321,672	9,022,669	2,576,912	114,698	2,691,610

JUTE MILLS

[For Tables, see pages 75 to 77]

Progress of Jute mills

The record of the jute industry, as disclosed by these tables, may well be said to be one of uninterrupted progress. The following statement shows quinquennial averages from the earliest year for which complete information is available with actuals for 1914-15 and 1915-16, and the figures in brackets represent the variations for each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100. It will be seen that the number of looms and spindles in operation have increased to a very much larger extent than either the number of mills at work or the amount of capital employed.

	Number of mills at work	Authorised capital (in lakhs of ₹)	Number (in thousands) of Persons employed	Looms	Spindles
1879-80 to 1883-84 (average)	21 (100)	270·7 (100)	38·8 (100)	5·5 (100)	88 (100)
1884-85 to 1888-89 „	24 (114)	341·6 (126)	52·7 (136)	7 (127)	138·4 (157)
1889-90 to 1893-94 „	26 (124)	402·6 (149)	64·3 (166)	8·3 (151)	172·6 (196)
1894-95 to 1898-99 „	31 (148)	522·1 (193)	86·7 (223)	11·7 (213)	244·8 (278)
1899-1900 to 1903-04 „	36 (171)	680 (251)	114·2 (294)	16·2 (295)	334·6 (380)
1904-05 to 1908-09 „	46 (219)	960 (355)	165 (425)	24·8 (451)	510·5 (580)
1909-10 to 1913-14 „	60 (286)	1,200 (443)	203·4 (537)	33·5 (609)	691·8 (786)
1914-15	70 (333)	1,394·3 (515)	238·3 (614)	38·4 (698)	795·5 (904)
1915-16	70 (333)	1,336·6 (494)	254·1 (655)	39·9 (725)	812·4 (923)

Production

The production of the mills has increased to a still greater extent. The following figures show the exports of jute manufactures and the declared values for the same periods. The combined value of gunny bags and gunny cloth exported by sea in 1915-16 is over thirty times as great as the average value of the exports in the period 1879-80 to 1883-84.

	Exports of Jute manufactures: Gunny bags in millions of number	Gunny cloths in millions of yards	Value in lakhs of ₹
1879-80 to 1883-84 (average)	54·9 (100)	4·4 (100)	124·9 (100)
1884-85 to 1888-89 „	77 (140)	15·4 (350)	162·9 (130)
1889-90 to 1893-94 „	111·5 (203)	41 (932)	289·3 (232)
1894-95 to 1898-99 „	171·2 (312)	182 (4,136)	518 (415)
1899-1900 to 1903-04 „	206·5 (376)	427·2 (9,709)	826·5 (662)
1904-05 to 1908-09 „	257·8 (469)	698 (15,864)	1,442·7 (1,154)
1909-10 to 1913-14 „	339·1 (618)	970 (22,045)	2,024·8 (1,621)
1914-15	397·6 (724)	1,057·3 (24,030)	2,582 (2,067)
1915-16	794·1(1,447)	1,192·3 (27,098)	3,797·8 (3,041)

Exports

Up to the last quinquennium the exports by sea of raw jute were marked by increases from year to year, although the improvement was not so rapid as in the case of manufactures. In 1914-15 and 1915-16 there was a decrease in exports as compared with the last quinquennium.

	Jute, raw, tons.
1879-80 to 1883-84 (average)	375,000 (100)
1884-85 to 1888-89 „	445,000 (119)
1889-90 to 1893-94 „	500,000 (133)
1894-95 to 1898-99 „	615,000 (164)
1899-1900 to 1903-04 „	635,000 (169)
1904-05 to 1908-09 „	755,000 (201)
1909-10 to 1913-14 „	765,000 (204)
1914-15	505,000 (135)
1915-16	600,000 (160)

Prices

The price of raw jute reached its highest point in 1913-14, the rate being ₹76-12-0 per bale; in 1915-16 it dropped to ₹48-4-0. The following are the quinquennial average prices per bale (400 pounds) of ordinary jute and per 100 yards of gunny cloth, calculated from the prices current published by the Bengal Chamber of Commerce:—

	Price of raw jute ordinary, per bale of 400 lbs. ₹ a. p.	Price of Hessian cloth 10½ oz. 40" per 100 yds. ₹ a. p.
1879-80 to 1883-84 (average)	23 8 0 (100)	10 7 11 (100)
1884-85 to 1888-89 „	23 3 2 (99)	8 0 7 (77)
1889-90 to 1893-94 „	32 6 5 (138)	10 6 6 (99)
1894-95 to 1898-99 „	30 12 0 (131)	9 11 8 (93)
1899-1900 to 1903-04 „	32 1 7 (137)	10 2 10 (97)
1904-05 to 1908-09 „	44 13 6 (191)	11 14 1 (112)
1909-10 to 1913-14 „	51 0 10 (217)	12 12 2 (122)
1914-15	54 8 0 (232)	12 4 0 (117)
1915-16	48 4 0 (205)	20 10 0 (197)

PAPER MILLS

[FOR TABLES, SEE PAGES 78 AND 79]

The number of paper mills in India in 1915 was eleven, three in Bengal, five in the Bombay Presidency (including one under liquidation), one in the United Provinces, one in the Travancore State, and one in the Gwalior State. The estimated authorised capital of these mills (excluding the one under liquidation) was about R50 lakhs. The value of the output reported rose from R82 lakhs in 1914 to R90 lakhs in 1915. Two of the mills, however, did not work in the year under review.

The competition of cheap wood-pulp paper imported from Europe has checked the development of paper-making by older methods in India, and the most successful mills are those which have Government contracts for the supply of cheap foolscap, blotting paper, notepaper, and envelopes. In 1911 the value of the paper manufactured in India and that of imported paper were R80 lakhs and R1,16 lakhs, respectively. In 1915 the corresponding figures were R90 lakhs and R1,34 lakhs, the value of the imports having increased in the meantime by 15½ per cent, and the internal production by 12½ per cent. The values of country-made and imported paper during the last five years are given in the margin. Owing to the war and the resulting absence of competition from enemy countries, the Indian paper industry is comparatively prosperous, notwithstanding the increased cost of wood pulp and of chemicals required in the process of manufacture.

	Produced in Indian mills R	Imported R
1911	80,04,000	1,16,12,000
1912	77,06,000	1,35,83,000
1913	80,37,000	1,59,00,000
1914	82,12,000	1,42,00,00
1915	89,62,000	1,34,00,000

WOOLLEN MILLS

[FOR TABLES, SEE PAGES 80 AND 81]

Of the six woollen mills in India, one is in the Mysore State, and of the remaining five, three represent a paid-up capital of R77,50,000 (£516,667), while the capital of the other two, which are private mills at Calcutta and at Bombay, is not stated. Two of the mills, that is, the one at Cawnpore in the United Provinces, and the other at Dhariwal in the Punjab, have between them a paid-up capital of 71 lakhs (£473,333) or 92 per cent of the whole, and produce 65 per cent of the total outturn of the Indian mills. They weave cloth for the use of the army and the police, and articles of superior quality generally, using for the high class goods Australian wool either pure or mixed with Indian wool.

There was a decrease during the year under review in the number of looms as well as of spindles. In 1906 and 1907, owing to the high price of wool, there was a considerable shrinkage in production; since then there has been a steady increase, the statistics for 1915 surpassing all previous records. Up to 1914, the quantity of woollen goods imported into India was very much greater than the production of the Indian mills. In 1915, however, the order was reversed, and the production much exceeded the imports. Piece-goods and shawls, mostly from the United Kingdom, make up the bulk of the imports. The values of country-made and imported woollen goods compare as shown in the marginal table. There are in various places factories for the weaving of carpets and rugs, and of *pattu* and *páshmina*, but although these industries are in the aggregate extensive, they are individually small, and weaving is done by hand-looms.

	Produced in Indian mills R	Imported R
1911	51,04,000	3,45,43,000
1912	53,83,000	3,04,42,000
1913	61,66,000	3,84,12,000
1914	80,09,000	2,15,35,000
1915	1,23,01,000	86,05,000

The exports of woollen goods from India consist almost entirely of carpets and rugs, of which about three-fourths go to the United Kingdom and the greater part of the remainder to the United States. The value of Indian carpets and rugs exported during the last five calendar years is stated in the margin.

	R
1911	24,48,000
1912	22,62,000
1913	22,29,000
1914	18,18,000
1915	19,57,000

MINERAL PRODUCTION

[FOR TABLES, SEE PAGES 82 TO 87]

The minerals for which figures are recorded in these tables are those comprised in Group I of the mineral dealt with in the Records of the Geological Survey of India, that is, those minerals for which approximately accurate and full returns are obtainable.

Salt.—Statistics are supplied annually by all Local Governments and Administrations. Full details of the production and consumption of salt and the administration of the salt revenue are contained in Volume II (Financial) of the Statistics of British India.

Coal.—The figures are compiled chiefly from the statutory returns of the output furnished to the Chief Inspector of Mines in India by the Managing Agents of mines regulated by the Indian Mines Act, VIII of 1901. Figures for mines situated in Native States and for mines not coming within the operation of the Indian Mines Act are furnished by the Director, Geological Survey of India. Details regarding the coal mining industry in India are given separately in the next section relating to Coal Mines.

Gold.—The figures are supplied by the Director, Geological Survey of India. About 93 per cent of the total output of gold in 1915 was derived from the Kolar gold field in Mysore, the quantity won being

571,199 ounces, valued at R3,27,81,134. The production of this field reached its highest point in 1905 when 616,758 ounces were raised. The Anantapur mines in Madras come next, but at a respectable distance, to the Kolar gold field. The output in 1915 was 23,870 ounces, valued at R15,19,863, or 3·9 per cent of the total output of Indian gold. These mines gave their first output of gold during the year 1910, the amount being 2,332 ounces, valued at R1,51,800, and the output has steadily increased. Gold mining was carried on in the North Arcot district of Madras from 1893 till 1900, the highest yield (2,854 ounces) having been obtained in the year 1898. The Nizam's mines at Hutti in Hyderabad closely follow the Anantapur mines, its yield in 1915 being 17,870 ounces, valued at R10,25,076. Other gold mines of minor importance exist in Bombay and Burma. The Dharwar mines in Bombay gave an output of 2,993 ounces in 1911 as compared with 737 ounces in 1910 and 5,616 ounces in 1909, but no output has been recorded since then. The Kyaukpazat mine in Upper Burma was worked until 1903, when the pay chute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Myitkyina, and 216 ounces of gold were obtained in 1904; the amount steadily increased from year to year and reached 8,445 ounces in 1909, but fell to 3,107 ounces in 1915, the dredging operations not having been so successful as had been hoped. The small quantity of gold produced in the Punjab, the Central Provinces, and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way. The average earnings of the workers are very small, and the gold thus won is used locally for making jewellery.

Petroleum.—Figures of production are supplied by the Director, Geological Survey of India. Petroleum is found in India in two distinct areas—one on the east, which includes Assam, Burma, and the islands off the Arakan coast. This belt extends to the productive oil fields of Sumatra, Java, and Borneo. The other area is on the west, and includes the Punjab and Baluchistan, the same belt of oil-bearing rocks being continued beyond the borders of British India to Persia. Of these two the eastern area is by far the most important, and the most successful oil fields are found in the Irrawaddy valley. Yenangyaung is the oldest and most developed of these fields. Native wells have been at work here for over a century, and in 1886, prior to the annexation of Upper Burma, the output is estimated to have averaged over 2 million gallons a year. Drilling was begun in 1887. The output of the field rose to 10 million gallons in 1894, and to 40 million gallons in 1902. Since then progress has been more rapid, and the output reached a little over 200 million gallons in 1913, surpassing all previous records. In 1914, however, the output fell to about 175 million gallons, but again rose to about 199 million gallons in 1915. The Yenangyat field yielded a very small supply of petroleum before 1891, in which year drilling was started by the Burma Oil Company. For some years progress was slow, but in 1903 the production reached 22 million gallons. Since then the output has decreased, and it was a little over 4 million gallons in 1915. Singu now holds the second place among the oil fields of India. Petroleum was struck at the end of 1901, and in 1903, 5 million gallons were obtained. In 1907 and 1908 the production of this field was about 43 million gallons, and, after a fall to 31½ million gallons in 1910, it rose to 77 million gallons in 1915. Several of the islands off the Arakan coast are known to contain oil deposits, but their value is uncertain. About 12,000 gallons were obtained from the Eastern Barongo Island near Akyab, and 23,000 gallons from Ramri Island in the Kyaukpyu district during 1915. Oil was struck at Minbu in 1910, the production for that year being 18,320 gallons, which increased in 1912 to a little under 4 million gallons but fell to 2½ million gallons in 1915. The existence of oil in Assam has been known for many years, and an oil spring was struck at Digboi near Makum in 1867. Nothing more, however, was done until 1883, and from that year up till 1902 progress was slow. Since that year the annual production has been between 2½ million and 4⅔ million gallons.

On the west, oil springs have been known for many years to exist in the Rawalpindi and other districts in the Punjab. The total output of the province in 1911 was 1,400 gallons, and this figure fell to 950 gallons in 1912, showing a little rise in 1914 to 1,200 gallons. The output in 1915 amounted to 251,500 gallons. This remarkable increase was due to the discovery of a new field at Khaur, where borings were put down by the Attock Oil Company, and an output of ¼ million gallons was obtained. In Baluchistan, geological conditions are adverse, and although some small oil springs have been discovered, attempts to develop them have not hitherto been successful.

The consumption of kerosene in India (excluding Burma) is rapidly increasing and has risen from about 79 million gallons in 1900-01 to 172 million gallons in 1915-16. The enormous increase in the output of the Burma oil fields has reversed the position formerly held by foreign and Indian oil in the market. In 1908-09, however, the proportion of foreign oil consumed was a little higher than that of Burma oil as a result of a contraction in her shipments concurrently with a large increase in imports from foreign countries, but from 1909-10 Burma oil has regained its position.

Chromite.—The exploitation of the chromite deposits in Baluchistan, which were discovered by the Geological Survey of India in 1901, was begun in 1903. In 1906 the output amounted to 4,375 tons, which rose in 1907 to 7,274 tons, valued at R1,45,485, the highest on record, but fell to 2,161 tons, valued at R32,415, in 1915. At present the ore is raised entirely for export. The opening up of the Mysore chromite deposit commenced in 1907 with an initial output of 11,029 tons, valued at R2,20,580. The production in 1909 was 4,925 tons, valued at R29,550, but nothing was produced from 1910 to 1912 owing to the continuance of low prices. In 1913 the production was 1,414 tons, valued at R12,326, rising in 1914 to 2,330 tons, valued at R18,870, but falling again in 1915 to 1,041 tons, valued at R16,324. The year 1913 showed for the first time in the Singhbhum district (Bihar and Orissa), an output of 848 tons of chromite, valued at R6,784, but the output fell to 565 tons, valued at R4,223, in 1915.

Diamonds.—Diamonds are produced in the mines of the Vindhyan belt, which stretches through the Central Indian States of Panna, Charkhari, Ajaigarh, and Bijawar. The production in this field was 44 carats, valued at R7,133, in 1911, falling considerably in 1912 to 9 carats, valued at R5,997. In 1913 it showed an increase to 79 carats, valued at R26,536, but fell again in 1915 to 36 carats, valued at R9,044. In 1909, 111 carats were obtained from Banganapalli, Madras, but the production in 1911 was insignificant.

being 9 carats only. In 1913, 37 carats were obtained from the Karnul district, but in the following two years no output was recorded in the Madras Presidency.

Graphite.—Graphite occurs in the Travancore State under geological conditions similar to those of the richer deposits worked in Ceylon. The production in 1911 was 3,993 tons, the highest on record. Owing to the difficulties of working, the mine has been shut down since 1912. Some 54 tons of the mineral were obtained from the Vizagapatam mine in Madras in 1911, but no output has been recorded since 1912. Since the closing down of the Travancore mines attention has been paid to the graphite deposits in Bihar and Orissa and in Rajputana. At present the industry is only in its infancy, the total output of the year 1915 being 55 tons in Merwara (Rajputana) and 16 tons in Kalahandi (Bihar and Orissa).

Iron-ore.—The production of the Tata Iron and Steel Co.'s mines in Maurbhanj (Orissa) appeared in the statistics for the first time in 1911, the amount being 300,000 tons, valued at R3,06,000. The output rose in 1912 to 471,232 tons, valued at R4,71,232, but fell to 240,269 tons, valued at R2,40,268, in 1915. The Bengal Iron and Steel Works obtain their ores from Bengal and Chota Nagpur, the major portion of the output now coming from Singhbhum in Chota Nagpur. Elsewhere in India, namely, in the Central Provinces, the United Provinces, Madras, Central India, Hyderabad, Mysore, Rajputana, Burma, and the Punjab, operations are carried on, on a very small scale, for use in the small native furnaces. The value reported for the ore raised in Orissa, Chota Nagpur, and Bengal works out to an average of R1·1 per ton. Elsewhere the reported values are higher, about R4 per ton.

Jadestone.—The substance which passes as jadestone is mainly the mineral jadeite, which occurs in an altered igneous dyke in serpentine in the Myitkyina district of Upper Burma and also in the form of boulders in a tertiary conglomerate and in alluvium. It is worked in an unadministered tract, and there are no reliable figures of production. The figures given in the tables are those of the exports by sea from Rangoon, together with the exports overland to China.

Lead and Silver.—The smelting of lead slags and lead ore at Bawdwin by the Burma Mines, Ld., resulted in a production in 1910 of 12,896 tons of lead and 49,680 ounces of silver worth R24,23,137 and R74,520, respectively. The output during 1915 amounted to 13,522 tons of lead and 284,875 ounces of silver, valued at R47,41,155 and R4,66,483, respectively. 512 ounces of silver were obtained in 1915 as a by-product in the extraction of gold at Anantapur in Madras by the Jibutil Gold Mines of Anantapur, Ld.

Magnesite.—This mineral is worked in the Chalk Hills near Salem in the Madras Presidency. The output in 1913 was 14,086 tons, as against 15,379 tons in 1912. In the year 1913, this mineral is reported to have been worked also in Mysore with an output of 2,112 tons. In 1914 there was a very marked fall in the outturn in the Chalk Hills to 399 tons and in the Mysore State to 1,281 tons; there was, however, a considerable increase in the production of this mineral in the Salem district during 1915, the outturn being 7,450 tons, but nothing was produced in Mysore.

Manganese ore.—This industry commenced over twenty years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizagapatam mines. Since 1904, when the total output was 150,190 tons, the progress of the industry has been remarkable owing to the high prices prevailing. In 1905 the production reached 247,427 tons; in the following year it was more than doubled (571,495 tons), and in 1907 the figures again rose to 902,291 tons. In 1909, on account of the fall in prices the output contracted to 644,660 tons, but it almost regained its former position in 1910 when the production rose to 800,907 tons. It fell again from 670,290 tons in 1911 to 633,080 tons in 1912, showing a rise again to 815,047 tons in 1913, which is the largest on record since 1908. The manganese-ore industry suffered from severe depression during the years 1914 and 1915, the output having fallen from 815,047 tons, valued at R1,81,65,515, in 1913, to 682,898 tons, valued at R1,31,58,965, in 1914, and 450,416 tons, valued at R1,39,43 187, in 1915, the apparent increase in value in 1915 being due to the abnormal conditions of the manganese market caused by the war.

The ore raised in the Central Provinces is of a very high grade, ranging from 49 to 54 per cent of the metal, and in consequence of its high quality is able to pay the heavy tax of freight over 500 miles of railway, besides the shipment charges to Europe and America, for the whole of the ore is exported to be used principally in steel manufacture in the United Kingdom, France, Italy, and the United States. The largest proportion of ore is raised in the Balaghat and the Nagpur districts, the Bhandara and the Chhindwara districts ranking next. Mining operations are also in progress in the Jhabua State in Central India, in the Panch Mahals in Bombay, in the Vizagapatam district in Madras, in the Mysore State, and in the Singhbhum district in Bihar and Orissa.

Mica.—The chief centres of production are the Nellore district in Madras, the Hazaribagh and Gaya districts of Bihar and Orissa, and certain States in Rajputana. Prospecting has been carried on in various districts of Madras, the Central Provinces, Upper Burma, and Assam, and in the Kishangarh State. The quantity of mica produced in 1915 was 27,140 cwts, as against 40,506 cwts in 1914. The mica industry has also been affected by the war.

Monazite.—This mineral has now taken an important place in the list of minerals of economic value produced in India. At present it is worked in Travancore by the London Cosmopolitan Mining Co. The output, which amounted in 1911 to 832 tons, valued at R3,60,660, rose to 1,235 tons, valued at R6,30,180, in 1913, but decreased to 1,108 tons, valued at R4,98,570, in 1915.

Platinum.—Eighteen ounces of this mineral valued at R1,493 were won in 1915, during the course of the gold dredging operations at Myitkyina in Burma, as against 37 ounces, valued at R3,195, in 1914.

Rubies.—The figures in the tables represent the quantity and value of the rubies raised by the Burma Ruby Mines, Ld., in the Ruby Mines district of Upper Burma. There are no statistics available of the quantity and value of rubies raised by Indian miners in the district. Rubies are also found in the Mandalay and Myitkyina districts, but the production is on a very small scale. The large decrease in output and value in 1908 was

due to a slump in the ruby market, but there was a slight recovery from 1909 to 1912. In 1915 the output of this mineral decreased again and amounted to 251,449 carats, valued at R5,44,477.

Saltpetre (Nitrate of Potash).—This article is largely produced for export. It is largely produced in the United Provinces and Bihar, whence the article is sent to Calcutta for export after refinement. The production of saltpetre was 369,113 cwts in 1915, as against 316,211 cwts in 1914. The demand for saltpetre for the manufacture of explosives has given a considerable impetus to the industry.

Tin-ore.—Tin-washing is carried on in the Tenasserim Peninsula, and also in the Bawlake State of Karenni, chiefly by Chinese immigrants in an uncertain and unsystematic way. The production of tin-ore in 1911 was 1,943 cwts, rising to 8,629 cwts in 1915.

Wolfram (Tungsten ore).—The great activity displayed in prospecting for wolfram in Tavoy and to a lesser extent in Mergui in Burma resulted in the output of 396 tons in 1910, rising to 2,645 tons, valued at R44,51,592, in 1915. The demand for the manufacture of high-speed steel gave an impetus to the wolfram industry of Tavoy towards the latter part of 1915.

Zinc-ore.—The ore is found in association with galena in the Bawdwin mines in Burma, large ore-bodies being composed of the latter mineral and zinc-blende. In 1914, 8,553 tons of zinc-ore, valued at R1,61,430, were produced, as against 3,871 tons, valued at R73,065, in 1913. In 1915 the output fell considerably to only 87 tons, valued at R2,610.

COAL MINES

[FOR TABLES, SEE PAGES 88 TO 94]

All returns of production in the case of mines under the Indian Mines Act, VIII of 1901, are sent direct by the Managing Agents of mines to the Chief Inspector of Mines, who forwards them to this Department. The Director, Geological Survey of India, supplements them by the returns sent to him by Local Governments and Political Agents for non-Act and Native States mines. Information regarding the imports and exports of coal has been taken from the Seaborne and Railborne Trade Returns published by this Department. As regards consumption of coal, estimates have been made from data furnished by the Railway Board, the Steamer Companies, the Port Trusts, mills and factory owners.

Production

The quantity of coal produced in each province in India from 1878 to 1915 is stated in table No. 29. Although coal-mining has been now practised in India for more than a century and although production and consumption have shown a steady increase, which has been especially notable in the last decade, the development of the coal resources of the country is as yet very incomplete.

The total production in 1915 amounted to 17,104,000 tons or about 3·9 per cent more than was produced in the previous year. To this may be added some 342,000 tons estimated to have been taken out from the mines by miners for their own use. The total production in 1915 would thus come to some 17,446,000 tons, but for purposes of comparison the figure (17,104,000 tons) first stated should be adopted.

The year was remarkably one of large increase or decrease as far as the coal-fields of Bengal and of Bihar and Orissa are concerned. The output of the larger firms and of those working the best seams increased, while those of the smaller owners and of those working inferior coals decreased. In the Raniganj field, which almost entirely accounted for the total increase, the increase was over 800,000 tons and the decrease over 300,000 tons, resulting in a net increase of over half a million tons. The total output of the Jherria field was stationary, but the increase and decrease, which practically balanced each other, were each over a million tons. In the year under review the increase of output kept pace with the demand. Reduction in finance facilities, the closing down of much internal industry, and the restriction of commerce forced a good deal of extra coal on the market early in the year and brought down prices. This reacted on the industry generally throughout the year and affected especially the small owners and those working inferior coals.

Coal fields

The coal-fields which have been worked in recent years are classified below, with the quantity produced in 1915, according as they belong geologically to the Gondwana system of strata, chiefly composed of sandstones and shales deposited in fresh water and by rivers, or to Tertiary (or Cretaceous) beds :—

GONDWANA COAL-FIELDS—	1915 tons	Per cent of total
Bengal and Bihar and Orissa—		
Daltonganj	85,800	·50
Giridih	872,600	5·10
Jherria	9,140,800	53·44
Jainty	40,700	·24
Ramgarh-Bokaro	10,200	·06
Raniganj	5,484,600	32·07
Sambalpur	58,800	·34
Central India—		
Umaria (Rewah)	139,700	·82
Central Provinces—		
Mohpani	55,100	·32
Pench Valley	103,200	·60
Wardha Valley (Ballarpur, Chanda)	94,900	·56
Hyderabad—		
Singareni	586,800	3·43
TOTAL	16,673,200	97·48

TERTIARY COAL-FIELDS—	1915 tons	Per cent of total
Baluchistan—		
Khost	35,800	·21
Sor Range, Mach, etc.	7,800	·05
Assam—		
Makum, etc.	311,300	1·82
Burma—		
Bhamo	*25*	..
North-West Frontier Province—		
Hazara	100	..
Punjab (Salt Range)—		
Jhelum District	51,600	·34
Mianwali District	2,000	
Shahpur District	4,300	
Rajputana—		
Bikaner	17,800	·10
TOTAL	430,700	2·52

About 97·5 per cent of the coal supplies of India is obtained from the Gondwana coal-fields and 2·5 per cent from Tertiary beds.

The Raniganj field and the Jherria field are in the Damuda Valley and produce 85·5 per cent of the total output. The Raniganj field (where the first Indian coal mine was opened in 1820) held the first place as regards production up to 1905, but now stands second, its yield in 1915 having been 5,485,000 tons or 32 per cent of the year's total production. It covers an area of about 500 square miles, mostly within the district of Burdwan (Bengal), but stretching also across the boundaries into Bankura (Bengal), Manbhum, and the Santhal Parganas (Bihar and Orissa). The Jherria field in Bihar and Orissa, which was opened in 1893, went ahead of the Raniganj field in 1906, and it has succeeded in maintaining the lead since that date, the output in 1915 being 9,141,000 tons (that is, 53 per cent of the total production). Of the remaining fields in Bihar and Orissa, the Giridih field, a small isolated patch to the north of the Damuda Valley, produced, in 1915, 873,000 tons or 5 per cent of the total. The Daltonganj field, further west in the Palamau district, was opened in 1901; it yielded, in 1915, 86,000 tons. The quantity so far obtained from the remaining three fields has been limited. In the Rajmahal coal-field, work has been discontinued, but a new field has recently been opened at Jainty, near Giridih, which produced 40,700 tons in 1915. In the Ramgarh-Bokaro field, lying immediately to the west of Jherria in the Damuda Valley, mining was begun in 1908, and its yield in 1910 was 2,200 tons, rising to 10,000 tons in the year under review. The Sambalpur field was opened for the first time in 1909, and its production rose from 800 tons in 1911 to 59,000 tons in 1915. These seven coal-fields accounted for 91·8per cent of the coal raised in India in 1915. Owing to the wide extent of these fields, the fair quality of coal which they contain, and their comparative nearness to the sea-coast, this proportion is not likely to decrease materially in the near future.

Outside Bengal and Bihar and Orissa, the most important mine is the Singareni near Yellunda in the Nizam's dominions. Work was begun at Singareni in 1887, and progress has been more rapid than in any other place outside Bengal and Bihar and Orissa, the average annual production during the last ten years having been some 496,000 tons. Its output in 1915 was 587,000 tons. The Umaria mine in the Rewah State in Central India was started in 1884. Its progress was steady up to the year 1903, when the maximum production of 193,300 tons was reached; since then there has been a retrogression and the output in 1915 was 139,700 tons. In the Central Provinces, the Ballarpur mine in the Chanda district was opened in 1904 to take the place of the Warora Colliery, which was closed down in 1906, and the work of extracting coal began seriously in 1908. The output that year was 45,000 tons; in 1915 it rose to 94,000 tons. The Mohpani and Pench Valley fields lie respectively at the northern and southern fringes of the Satpura range. The former is situated in the Narsingpur district in the south of the Nerbudda alluvial valley. The old mine was opened in 1860 and was abandoned in 1902 after all the available coal—some 460,000 tons in the aggregate—had been raised from it. The new Mohpani mine has been worked by the Great Indian Peninsula Railway Company since 1904, and its output was, in 1915, 55,000 tons. The Pench Valley field in the Chhindwara district was opened in 1905; its yield rose from 1,100 tons in 1905 to 103,000 tons in 1915.

Next with reference to Tertiary or cretaceous coal-beds. The most important of these are in north-east Assam, where the Makum coal-fields have been worked since 1882, and the coal obtained therefrom has a remarkably low percentage of ash and a high calorific value. The output was 311,000 tons in 1915. Next in rank of importance come the Salt Range mines of the Punjab and the Khost mines on the Sind-Pishin Railway in Baluchistan; both have been worked now for twenty-nine years, but their production in 1915 was only 57,900 tons and 35,800 tons, respectively. The coal produced at Palana in the Bikaner State is really a dark brown lignite, and its production during recent years has been restricted in consequence of special precautions necessary to prevent underground fires. Its production in 1915 was 17,800 tons in comparison with 17,200 tons in the previous year.

Value of coal at the pit's mouth

The value of the coal produced in India is reported annually by mine-owners. It represents the actual or estimated wholesale price of coal at the pit's mouth and is necessarily dependent upon the relation between local supply and demand, not indicative of the actual value of the fuel: Bengal coal, for instance, which is all-round the best quality worked in India, is returned as having a lower value than the coal worked in other provinces, where higher prices can be safely demanded by the miner. The average value, as thus defined, of all the coal produced in each province in India in each of the last fifteen years is given in table No. 30. In 1915 the average value was R3-5 per ton. The lowest value, namely, R2-8 per ton, was that of 1905 and the highest (R3-15) that in the boom of 1908, when demand kept ahead of supply.

AVERAGE VALUE OF COAL

	Declared export value per ton	Value at the pit's mouth per ton
	R a.	R a.
1911	8 7	2 15
1912	10 1	3 6
1913	9 13	3 8
1914	8 13	3 9
1915	9 3	3 5

The marginal table compares the average value at the pit's mouth of Indian coal with the declared export value per ton in each of the last five years. The declared export value is more than 2½ times the value at the pit's mouth. The total estimated value of the output in 1915 was R5,67 lakhs as against R5,86 lakhs in 1914.

With the above average value may be compared the values at the pit's mouth of coal in foreign countries as shown in the margin (the figures represent the average of the five years ending 1913, later quotations not being available). In comparing the average value of the coal raised in different countries, it must be remembered that this value is affected by many circumstances, such as the quality of the coal, its accessibility, the machinery in use, nearness to the surface, etc., besides the differences in the cost of labour and transport. In India, the coal now being worked is comparatively near the surface, and labour may be said to be cheap. Indian coal

	R a. p.
France	9 6 11(a)
Germany	7 12 4(a)
United Kingdom	6 8 7
Japan	5 2 10
Australia	5 9 7
United States of America	4 7 2
South Africa	4 3 2
India	3 4 5

(a) Average of the five years ending 1912, later quotations not being available

therefore, has a lower value at the pit's mouth than the coal of any other country. After India, the value is lowest in South Africa and in the United States. Of the principal coal-producing countries in Europe, the United Kingdom has the lowest average value at the pit's mouth; and South Africa has the lowest average value of all places in the British Empire except India.

The cost per ton of production in India varies considerably in the different coal-fields. The variation in the Raniganj field is from R1-14 to R2-8 and in the Jherria field from R1-8 to R2. In the Giridih field the cost per ton is stated to be about R2-4 per ton. In the fields of Central India and the Central Provinces the rate varies from R2-8 to R5-10 per ton, whilst in the Punjab very much higher rates prevail.

Prices

The comparative average prices per ton of Bengal coal at Calcutta and of Indian and Welsh coal at Bombay and Karachi since 1901 are shown in table No. 31. The figures are taken in the case of Bombay from the *Bombay Market Report* and in the case of Calcutta and Karachi from the *Prices Current* of the respective Chambers of Commerce. In 1913 there was a general rise in prices of both Indian and Welsh coal at all the three ports mentioned above. In 1914 prices of Indian coal rose further at Calcutta, but those at Bombay and Karachi for both Indian and Welsh coal fell. In 1915 and in the first six months of 1916, the prices of Indian coal at Calcutta fell, while those at Bombay and Karachi for both Indian and Welsh coal rose considerably.

Freights

In order to get an idea of the comparative prices of Bengal coal in the principal centres of industry in India, the freight has to be added to the f.o.r. prices. The marginal table shows the freight per ton of coal by rail for full wagon loads at owners' risk (owners to load and unload) from the Raniganj and Jherria fields in 1915. It is interesting to note that the transport of coal forms an important item in the earnings of the Railway Companies, especially the East Indian and the Bengal-Nagpur systems, which serve the Raniganj, Jherria, Giridih, and Daltonganj fields.

	From Raniganj			From Jherria		
	R	a.	p.	R	a.	p.
To Calcutta	2	4	0	3	2	0
„ Cawnpore	6	4	0	5	15	0

„ Lahore	10	1	0	9	13	0
„ Bombay	11	4	0	11	4	0
„ Karachi	12	14	0	12	10	0

The average freight per ton of coal by sea from Calcutta during 1915 was as stated in the margin. The rates were much higher than in 1914. The year was a phenomenal one owing to the war, and a shortage of tonnage was acute. A considerable business was done to Rangoon, although freight rates to Rangoon rose from R4 in January to R9-8 in March and April.

„ Madras	6	10	0
„ Rangoon	6	12	0

Labour

Table No. 32 shows the total number of men, women, and children employed in coal mines in India during each of the last fifteen years. This number represents the "average daily attendance" throughout the year, and is obtained by dividing the total number of attendances by the number of working days in each year. Coal-mining employs more labour than any other mining industry, and will probably continue to do so for many years. In 1915, 160,086 persons were employed as against 151,376 in 1914, or an increase of 8,710 persons or 6 per cent. Details for the provinces are given below :—

	Men	Women	Children	Total	Per cent of total
Bihar and Orissa	57,857	35,382	2,053	95,292	59·5
Bengal	26,692	14,796	605	42,093	26·3
Hyderabad	8,977	2,325	..	11,302	7·1
Central Provinces	2,344	768	72	3,184	2
Assam	2,331	530	48	2,909	1·8
Central India	2,384	500	..	2,884	1·8
Baluchistan	943	..	20	963	·6
Punjab	1,241	1	31	1,273	·8
Rajputana (Bikaner)	145	16	..	161	·1
North-West Frontier Province	9	..	..	9	..
Burma	16	..	..	16	..
TOTAL	102,939	54,318	2,829	160,086	100

Of the increase in the year under review, the coal-fields of Bihar and Orissa accounted for 4,437 persons. The labour supply in the Raniganj field was reported to be unusually plentiful, owing chiefly to a bad harvest in the previous year. In the Bankura district the scarcity amounted to a famine and labour flocked to the coal mines in large numbers. There were, however, in this coal-field outlying mines, where more labour would have been welcomed. In the Jherria field also, the year was considered to be a good one generally.

The great proportion of those employed are the aboriginal Dravidians from the mountainous country of Chota Nagpur and the Central Provinces, but a large number of other castes is also employed, particularly in the outlying fields. The majority of the workmen follow the vocation of agriculture as well as mining, and return

to their homes during the periods of sowing and reaping, the result being that, at such times, the output of many of the mines is greatly restricted. At the Makum collieries of the Assam Railway and Trading Co., where the labour question continues to be a very difficult one, nearly a third of the total labour force are Mekranis, Chinese, and Nepalese. The Chinese have proved unsatisfactory and it is not proposed to recruit any more of them.

The output of coal in India in 1915 per person employed is compared in the marginal statement with the results of the immediately preceding four years. The Indian miner is still to some extent a miner by caprice, and, as stated above, in a year of agricultural prosperity the scarcity of labour is much felt. Epidemics of cholera and other diseases are not infrequent and cause a shortage of labour. As the workings get deeper, the need of a mining population, which specialises in mining, will become greater. There has been a great advance in the use of electricity in the coal mines of Bengal and Bihar for haulage, pumping, lighting, and ventilation. There is, however, little or no coal-cutting by machinery. During the time of high prices which prevailed round and about 1908, owners strove to put out more and more coal, even at an increased cost. The labour supply was found soon to be inadequate, and a number of owners put down and carried on successfully coal-cutting plants, although at a somewhat high cost. As prices dropped and labour conditions became easier, the cost of production by the machines became relatively too high, and they were discarded. Occasionally a plant is put down for the purpose of making long connections underground rapidly. As long as labour conditions remain as they are, there will not be much headway in the introduction of mechanical coal-cutters.

	Above and below ground Tons	Below ground only Tons
1911	109·5	166·7
1912	110·9	170·4

1914	108·7	166·7
1915	106·8	160·2

Imports

The quantities of foreign coal imported into British India from the principal countries during the last twenty-five years are given in table No. 33. For the first fifteen years quinquennial averages only have been given. The figures represent private merchandise only and do not include Government stores, the imports of which amounted to 12,400 tons in 1915, as against 54,700 tons in 1914, 212,900 tons in 1913, and 50,900 tons in 1912. The greatest quantity imported in any one year of the series was some 820,000 tons, valued at ₹1,47,00,000, in the year 1894. The statistics for succeeding years are marked by considerable fluctuations. The largest quantity imported in recent years was in 1913, when 645,000 tons, valued at ₹1,22,00,000, were imported. In 1914 the imports declined by 226,000 tons or 35 per cent to 419,000 tons. In 1915 they fell to 191,000 tons, or a decrease of 54 per cent as compared with the previous year. Owing to the difficulty of bringing out coal on account of the war and the consequent abnormal prices, the year under review recorded the lowest import since 1904. Bombay has naturally been the largest importer and Burma the second. The United Kingdom has always supplied by far the greatest part of the imported coal, but in 1915 the coal industry in that country was most adversely affected by the war and the largest quantity came from the Portuguese East Africa. On the average of the twenty-five years of the series, Australia holds the second place and Japan the third with shares of 25,000 tons and 21,000 tons, respectively. The United Kingdom sent to India 47,000 tons in 1915 as against 167,000 tons in the previous year. The arrivals from Japan were very small this year, namely 18,100 tons, as against 32,200 tons in the previous year. The imports from Natal were insignificant until 1907, the largest quantity imported being 136,700 tons in 1913. Natal's share in 1915 was 15,300 tons. The imports from Australia, which in 1912 amounted to 92,000 tons, declined to 28,100 tons in 1915. The other countries from which coal is now imported into India in considerable quantities are the Portuguese East Africa and the Transvaal. In 1915 the imports from the Portuguese East Africa amounted to 52,300 tons and from the Transvaal to 26,400 tons, as against 58,700 tons and 40,400 tons, respectively, in 1914.

The provincial share of imported coal was Bombay (78 per cent), Burma (16 per cent), Madras (5 per cent), and Sind (1 per cent). A very small quantity (220 tons) was imported into Bengal.

Export

The total quantity of Indian coal exported from British India during the last twenty-five years and the share taken by each of the principal importing countries are shown in table No. 34. As in the case of statistics of imports, quinquennial averages only are given for the first fifteen years. Bunker coal is not included in this statement, which relates only to coal shipped as private merchandise to foreign ports. The exports rose in proportion to the expansion in production up to the year 1906 ; since then there was a progressive decline in the ratio up to 1909. This decline was arrested in 1910, but there was again a contraction in the following four years. On the average of the seven years 1900 to 1906, the exports were 8 per cent of the total production of Indian coal, as against 6 per cent on the average of the succeeding seven years 1907 to 1913. In 1914 the ratio was 3·5 per cent and in 1915 4·4 per cent. That is to say, exports in 1915 were in the proportion of one ton only to about 23 tons produced. The bulk of the production is thus consumed in the country. Almost all the coal shipped as private merchandise from India is sent from Calcutta. Ceylon and the Straits Settlements are the two principal markets for Indian coal, and of the total quantity shipped in 1915, 73·7 per cent was declared for Ceylon and 13·2 per cent for the Straits. Sumatra takes more coal from India than formerly and is now India's third best customer (8·5 per cent). From 1902 to 1906 the total exports abroad increased rapidly till they reached 1,003,000 tons in 1906. In 1907 there was a decline to 658,000 tons, which was ascribed to increased industrial activity in India itself ; and the shipments in subsequent years were marked by fluctuations until 1910, when there was a sharp rise to 988,000 tons, the increase being one of 424,000 tons or 75 per cent. In 1914 the shipments fell to 580,000 tons, but in 1915 they rose to 753,000 tons, or by 30 per cent. On the whole, the exports from 1907 have not shown that expansion which might have been anticipated, owing to the uncertain quality of the coal exported, high freights, and the primitive methods of shipment at the Calcutta docks, resulting in heavy depreciation of coal. In 1914 and 1915 the exports were especially handicapped by high ocean freight rates consequent on the very great shortage of tonnage due to the war.

Owing to the war Indian coal is being used in and outside India in place of British and other imported fuel. There is accordingly a good opportunity for permanently displacing this competition by supplying good coal according to description. This would in time doubtless greatly increase the exports to Colombo, the Straits, Sumatra, and other consuming markets outside India.

Distribution

In table No. 35 is shown the total available supply of coal in India, which is arrived at by adding imports to the total production and subtracting exports therefrom; in 1915 the figure stood at 16,541,000 tons, as compared with 16,303,000 tons in 1914 and 12,172,000 tons five years ago. From this figure the consumption of coal per head of population comes to ·051 ton or about one cwt a year.

Tables Nos. 36 and 37 give the distribution of coal production in the country and coal imported from abroad, and of the agencies by which it is distributed. Calcutta uses Bengal and Bihar and Orissa coal almost exclusively. The province of Bihar and Orissa is self-supporting, although it takes a small quantity of Bengal coal. Bombay city derives its supplies by sea from Bengal and from foreign countries in the proportion of 2 to 1, partly for its own consumption and partly for diffusion throughout the Bombay Presidency, which also receives considerable quantities by rail from Bengal, Bihar and Orissa, and Hyderabad. Sind and Madras import most of their coal coastwise from Bengal, but also draw part of their supply from Bihar and Orissa and Hyderabad. Assam, the United Provinces, the Punjab, the Central Provinces, Rajputana, and Central India import the bulk of the coal they require by rail and river from Bihar and Orissa and Bengal. Most of the coal consumed in Mysore comes mainly from the Hyderabad and Bihar and Orissa mines. Burma gets its supply almost wholly from Bengal and Bihar and Orissa.

Consumption

The supply available in the cities of Calcutta and Bombay and in each province is given in table No. 38. The quantity available in Calcutta in the year under review was 2¼ million tons, while that in the city of Bombay was only 980,000 tons.

The statement in the margin gives an estimate of the coal consumed during 1915 in the various industries, etc., but the figures can only be regarded as approximate, and in the case of some of the heads they represent a very rough estimate. Roughly one-third of the total quantity of coal produced in India is consumed by railways (including railway workshops).

	Estimated consumption Tons	Per cent of total
Railways (including railway workshops)	5,187,000(*a*)	31·4
Port Trusts	160,000	1·0
Bunker coal	868,000	5·2
Inland steamers	619,000	3·7
Jute mills	886,000	5·4
Cotton mills	1,121,000	6·8
Iron and brass foundries	1,332,000	8·1
Tea gardens	165,000	1·0
Brick and tile manufacture	1,197,000	7·2
Consumption at collieries and wastage	1,710,000	10·3
Other forms of industrial and domestic consumption	3,296,000	19·9
TOTAL	16,541,000	100

Consumption on railways.—Table No. 39 shows the total quantity of Indian and foreign coal and of wood consumed on all the railways in India in each of the last twenty-six years. At the beginning of this period the total consumption of coal was about 858,000 tons, of which foreign coal constituted nearly one-fourth. Ten years later the total consumption was 1⅓ million tons, and Indian coal represented nearly 95 per cent, thus marking a rapid and vigorous displacement of foreign coal. In 1915-16 the total consumption was over 5 million tons and Indian coal represented 99 per cent. The railway consumption of Indian coal averaged 33 per cent of the total quantity of coal produced in India in the ten years ending 1899, 30 per cent in the ten years ending 1909, 29 per cent in 1913-14, and 30 per cent in 1914-15 and in 1915-16. The consumption of wood as fuel on railways has not decreased to such an extent as might have been expected during this period, still the decrease has been fairly progressive. In 1915-16, however, the quantity used was 112,700 tons as compared with 95,600 tons in 1914-15. This amount may be regarded as equivalent to 45,100 tons of coal, reckoning 2½ tons of wood as equal to 1 ton of coal. Wood is still used largely on the Madras and Southern Mahratta, the Burma, the North-Western, and the South Indian Railways. The consumption of coal in relation to the total mileage of Indian railways is compared with that of certain foreign countries in the marginal statement.

	Total mileage of railways	Total consumption in tons	Consumption per mile in tons
India (*a*)	35,833	5,186,705	145
United Kingdom (*b*)	23,441	12,636,173	539
Russia in Europe (*d*)	34,700	5,348,000(*c*)	154
Japan (*e*)	7,078	1,871,422	264

*Bunker coal.**—The shipments of bunker coal from Calcutta for use in steamers are, as is to be expected, far in excess of those of any other port. They increased steadily up to 1908, but in 1909 there was a set-back, the figures being 888,500 tons as against 1,058,300 tons in the preceding year. In 1910 the shipments amounted to 904,700 tons, but in 1911 they fell to 883,000 tons, rising again to 964,000 tons in 1912 and to 1,019,000 tons in 1914, but fell to 768,000 tons in 1915. For the other ports exact figures have not been recorded. Indian coal is consumed on steamers of almost all the lines that touch at Indian ports. In some cases it is mixed with Welsh coal, but more often it is used unmixed.

Inland steamers.—The total reported figure comes to about 569,000 tons a year; but there are many smaller companies and steamers in Bengal, Assam, and Burma, as well as in other parts of India, whose consumption it has not been possible to ascertain.

(*a*) Figures are for the official year 1915-16
(*b*) Statistics are for 1912, later figures not being available
(*c*) Excluding coke
(*d*) Statistics are for 1908, later figures not being available
(*e*) Figures are for 1914
* Bunker coal is not included in the figures of export (*vide* footnote to table No. 34)

Cotton mills.—In the case of cotton mills, only 60 out of 261 mills have sent in reports. In the case of mills which have furnished no returns, estimates have been made on the basis of the number of looms and spindles at work.

Tea gardens.—On many tea estates wood is the only or chief fuel employed.

Brick and Tile manufacture.—It is probable that from 7 to 10 per cent of the total amount of raisings is used in the brick and tile industry, but no complete statistics of this industry are available.

Other forms of industrial and domestic consumption.—There are no means at present of framing an estimate of how the balance of 3·3 million tons is consumed. Cotton presses and jute presses doubtless account for a considerable proportion. Excluding indigo factories and premises used solely for the purposes of tea and coffee plantations, there are, in addition, many other factories worked by steam and a considerable number of other concerns too small to be included in the factories return. Many of these use fuel other than coal, wholly or in part, but it may be assumed that the greater portion of the balance of 3·3 million tons of coal must be debited to industrial consumption and only a small part to domestic consumption.

Capital employed

The growth of the coal-mining industry may be roughly gauged from the marginal table, showing the number of Joint Stock Coal Companies and their total paid-up capital. The total amount of capital employed in the coal-mining industry cannot be stated, as reports relating to capital are received from Joint Stock Companies only, and the capital employed by private individuals and syndicates is not known. There were 142 Joint Stock Companies at work in Bengal and 2 in Bihar and Orissa on the 31st March, 1916. The Companies accounted for 77 per cent of the total output of the Bengal and Bihar and Orissa coal-fields in 1915. Outside Bengal and Bihar and Orissa, there were only six Joint-Stock Companies at work during the year. Only seven of the Coal Companies at work on the 31st March, 1916, have each a paid-up capital (exclusive of debentures) of R15,00,000 (£100,000) or more, as shown in the margin. There are twenty-one others, each of which has a paid-up capital of R7,50,000 (£50,000) but less than R15,00,000.

	Number	R (lakhs)
1906-07	66	260
1907-08	115	432
1908-09	125	658
1909-10	128	731
1910-11	129	721
1911-12	128	722
1912-13	139	716
1913-14	142	725
1914-15	145	747
1915-16	150	752

	R
Hyderabad (Deccan) Company (*a*) (*b*)	1,00,80,000
Bengal Coal Company	30,00,000
Burrakur Coal Company	26,25,000
Equitable Coal Company	24,00,000
East Indian Coal Company (*a*)	18,00,000
Bokaro and Ramgur	16,00,000
Saltore Coal Company	15,00,000

India and Japan

The production, exports, imports, and the balance left for consumption of coal in India and Japan from 1891 are compared in table No. 40. In the first quinquennium, the production of coal in Japan was about a million tons more than that of India. Since then the production of Japan has gone ahead, and in 1914 exceeded that of India by nearly 5,361,000 tons. As regards the foreign import trade, India, as already noted, diminished her imports from abroad steadily till 1905 when a revival took place, but in 1915 the imports again declined. Imports into Japan, under normal conditions, were inconsiderable in comparison with India until 1908; since then there has been a steady increase, and the imports are now nearly 610,000 tons. Production in Japan has always exceeded the requirements of internal consumption, leaving a considerable surplus for export; India's net exports are 562,000 tons. The quantity left for internal consumption was about the same (nearly 11 million tons) in both the countries in 1907. In 1908 India retained about two-thirds of a million tons more than did Japan, but from 1909 the quantity retained for consumption in Japan has always exceeded that in India, the excess in 1914 amounting to about 3 million tons. The marginal table shows the estimated internal consumption of coal in Japan in the three years 1912 to 1914. The figures exclude bunker coal. These figures may be compared with estimates of the consumption of coal in India given on the preceding page. The freight per mile for coal carried by Indian railways to the places mentioned on page xii is about 2 pies per ton per mile, except in the case of Howrah (in close proximity to Calcutta) where the rate comes to 3½ pies per mile. The average rate of freight for coal on Japanese railways is 9½ pies per ton per mile.

	1912 tons	1913 tons	1914 tons
Railways	1,553,398	1,755,103	1,871,422
Production of salt	779,163	785,396	793,877
Factories	6,511,308	7,491,458	8,183,680
Other forms of consumption	(Not known)	(Not known)	(Not known)

British Empire and Foreign countries

Table No. 41 gives comparative statistics of the average value of coal in the coal-mining industry in the different parts of the British Empire and in the principal foreign countries for a series of years so far as available.

JOINT STOCK COMPANIES

[For Tables, see pages 95 to 119]

Source of statistics

The statistics are compiled from reports and returns prepared by the Registrars of Joint Stock Companies in British provinces under the Indian Companies Act, IV of 1882 (repealed by Act VII of 1913, which came into force on 1st April, 1914), the Indian Life Assurance Companies Act, VI of 1912, and the Provident Insurance Societies Act, V of 1912, and in the Native State of Mysore under the Mysore Companies Regulation, III of 1895.

Companies limited by shares incorporated in India

The total number of companies limited by shares which have been incorporated in India up to 1915-16 under the laws relating to the registration of companies amounts to 7,130. Of these, 2,476 companies were

(*a*) The Company was registered in the United Kingdom
(*b*) The Company is also engaged in gold, diamond, etc., mining operations

working at the end of the year 1915-16, most of the remainder having been either wound up, or otherwise discontinued or never having commenced business, so that about 65 per cent of the companies registered have ceased working. Some companies have also been taken off the Indian register to be reconstructed as companies under the English law with their head office in London. All the Companies registered in India have a rupee capital with the exception of the Hongkong and Shanghai Banking Corporation, which was registered in Calcutta in 1869 with a capital in Hongkong dollars of which the rupee equivalent is stated. The number of companies at work and the capital invested in them stood as follows at the end of each of the last three years :—

	1913-14	1914-15	1915-16
Number of Companies	2,744	2,545	2,476
Authorised Capital, ₹ (1,000)	2,33,33,61	2,30,09,47	1,84,20,90
Paid-up Capital, ₹ (1,000)	76,56,18	80,78,81	85,02,45

There was thus a decrease in the year 1915-16 of 69 in the number of companies, as against the previous year or 2·7 per cent, and of ₹45,88,57,000 in the authorised capital, or 20 per cent; the paid-up capital, however, showed an increase of ₹4,23,64,000 or 5·2 per cent.

Changes during the year

The changes made in the year, which produced the results shown above, were :

(1) 201 companies with an authorised capital of ₹55,67,00,000 and a paid-up capital of ₹1,66,23,000 ceased to do business ;

(2) 131 new companies with an authorised capital of ₹7,20,49,000 and a paid-up capital of ₹66,82,000 were registered during the year ; and one company under liquidation with an authorised capital of ₹2,88,000 and a paid-up capital of ₹2,69,000 was restored to the list of working companies during the year ;

(3) the authorised capital of 46 companies was increased by ₹2,77,84,000, while that of six companies was reduced by ₹22,78,000 ;

(4) the paid-up capital of 665 companies was increased by ₹5,66,56,000, while that of 80 companies was reduced by ₹46,20,000.

Distribution according to provinces

The following statement shows the number of companies at work, and the amount of paid-up capital, in each of the provinces at the end of the last two years :—

Province	Number of Companies		Paid-up Capital		Increase+ or decrease — per cent in Capital in 1915-16	Provincial proportion of paid-up Capital to total paid-up Capital in 1915-16
	1915-16	1914-15	1915-16	1914-15		
			₹(1,000)	₹(1,000)	per cent	per cent
Bengal	1,023	970	33,31,31	30,76,33	+8·3	39·18
Bombay	540	589	32,53,08	31,51,78	+3·2	38·26
Madras	343	360	5,91,07	5,59,13	+5·7	6·95
United Provinces	147	161	4,61,60	3,81,46	+21·0	5·43
Burma	106	114	5,38,08	5,77,61	—6·8	6·33
Punjab and Delhi	100	117	1,72,79	1,75,84	—1·7	2·03
Assam	60	65	21,26	18,63	+14·1	·25
Bihar and Orissa	39	49	13,35	9,17	+45·6	·16
Central Provinces and Berar	27	27	45,40	45,16	+·5	·53
Ajmer-Merwara	15	15	18,46	18,44	+·1	·22
Bangalore (Civil and Military Station)	8	10	7,80	8,19	—4·8	·09
North-West Frontier Province	2	2	2,21	2,20	+·5	·03
Coorg	1	1	24	24	..	..
Mysore State	65	65	45,80	54,63	—16·2	·54
Total	2,476	2,545	85,02,45	80,78,81	+5·2	100

The total net increase in paid-up capital was ₹4,23,64,000 : in Bengal ₹2,54,98,000; in Bombay ₹1,01,30,000; and in Madras ₹31,94,000. Bengal and Bombay between them have about 77 per cent of the whole paid-up capital of jointstock companies in British India and Mysore.

The number of companies registered in Bengal is over two-fifths of the total number registered throughout India, but the average paid-up capital per company is highest in Bombay, and in this respect Burma occupies the second place, and Bengal the third, as will be seen from the subjoined table showing the average paid-up capital of a company in each province in the last two years :— Average capital per company

	Average Capital of a Company	
	1915-16	1914-15
	R	R
Bombay	6,02,000	5,35,000
Burma	5,08,000	5,07,000
Bengal	3,26,000	3,17,000
United Provinces	3,14,000	2,37,000
Punjab and Delhi	1,73,000	1,50,000
Madras	1,72,000	1,55,000
Central Provinces and Berar	1,63,000	1,68,000
Ajmer-Merwara	1,23,000	1,22,000
North-West Frontier Province	1,10,000	1,10,000
Bangalore (Civil and Military Station)	97,000	82,000
Mysore State	70,000	84,000
Assam	35,000	29,000
Bihar and Orissa	34,000	19,000
Coorg	24,000	24,000

The comparatively low place of Madras in respect of the average capital, in spite of its occupying the third place in respect of the number of companies, is to be found in the extremely large application of the Companies Act to the business of small money-lenders ; for no less than 184 out of the 460 " banking and loan " companies in all India have been registered in Madras with a paid-up capital of R2,12 lakhs.

The statement below shows the distribution of the aggregate capital in the principal classes of joint stock enterprise at the end of 1915-16 as compared with that at the end of the preceding year :— Classification of companies

Class of Companies	Number		Authorised Capital		Paid-up Capital	
	1915-16	1914-15	1915-16	1914-15	1915-16	1914-15
			R(1,000)	R(1,000)	R(1,000)	R(1,000)
Banking and loan	460	475	55,79,17	56,92,76	8,34,04	7,98,51
Insurance	168	183	16,33,31	16,64,47	50,22	50,84
Navigation	22	24	4,03,50	3,68,10	1,33,16	1,28,78
Railways and tramways	54	46	15,89,40	13,25,40	10,24,73	8,36,47
Other trading companies	718	767	21,28,8	70,47,03	12,27,20	11,42,29
Cotton mills	196	205	21,14,04	21,96,91	16,42,15	16,70,71
Jute mills	37	34	9,03,21	8,02,21	7,79,71	7,61,10
Mills for wool, silk, hemp, etc.	15	14	3,55,75	2,26,50	1,99,71	1,32,42
Cotton and jute screws and presses	137	139	3,60,95	3,62,25	2,67,73	2,70,21
Rice mills	27	28	1,35,50	1,39,47	79,31	81,08
Flour mills	30	30	1,11,55	1,12,85	80,29	80,58
Other mills and presses	42	45	2,10,70	1,40,40	92,64	90,17
Tea planting	220	208	6,47,41	6,03,44	4,60,83	4,31,90
Other planting companies	32	30	1,05,86	99,10	46,07	42,41
Coal mining	144	140	7,73,35	7,76,77	6,12,03	6,09,49
Gold mining	8	8	46,58	50,07	37,91	33,32
Other mining and quarrying	58	59	7,36,98	8,28,18	5,33,21	5,85,45
Land and building	38	34	3,78,50	3,43,80	2,73,96	2,17,76
Sugar manufacture	18	22	1,14,38	1,35,88	80,89	80,75
Other companies	52	54	91,94	93,88	46,66	34,57
Total	2,476	2,545	1,84,20,90	2,30 09,47	85,02,45	80,78,81

The total amount of paid-up capital invested in banking, loan, and insurance companies is R8,84,26,000, of which 36 per cent is shared by companies registered in Bengal and 24 per cent by those in Madras. There is a striking contrast between the authorised and the paid-up capital of insurance companies. Most of these are the so-called provident or mutual aid societies registered in Bengal, where no less than 125 out of 168 insurance companies are registered. Banking, loan, and insurance

Trading companies account for a paid-up capital of R23,85,10,000, of which over a third (R10,24,73,000 or nearly 42 per cent) is invested in railways and tramways. Bombay represents about R6,28,10,000 or 61 per cent of the total capital invested in railways and tramways and Bengal R3,78,91,000 or 37 per cent. Trading

About three-eighths (R31,41,54,000) of the aggregate paid-up capital are invested in mills and presses, chiefly for working or pressing cotton, jute, wool, and silk. A great number of the mills and presses are registered in Bombay, that presidency representing about 50 per cent (R15,02,81,000) of this sum, and most of it being invested in cotton mills and presses. Mills and presses (mainly jute) registered in Bengal represent about two-thirds (R10,17,02,000) of the capital invested in mills and presses in Bombay. Mills and presses

In tea, coffee, and other plantations, R5,06,90,000 of the paid-up capital are invested, of which R4,34,74,000 are held in Bengal, the majority of the tea companies owning gardens in north-eastern India being registered in Calcutta. Planting

Railway programme

The question how best to provide funds for a wider development of the railway system was considered and sanction was given in 1896-97 to an expenditure of nearly R30 crores spread over 3 years, but this programme could not be carried out owing to many adverse circumstances affecting the revenues of Government. Since 1896 the expenditure incurred not only by the State railways but by those guaranteed by the State has been included in the railway programme ; and in 1901 it was decided to adopt the principle of regarding the needs of open lines for rolling stock, stations, goods sheds, permanent way, etc., as a first charge upon the funds available, thereafter the completion of lines in progress, and lastly the claims of new lines, and the money was proposed to be obtained by borrowing in London and India, by appropriations from the Famine Insurance grant, and by utilisation of surplus revenues and Savings Bank deposits.

Private enterprise

Though the amount made available for capital expenditure on Railways has been increased over a series of years, the balance available for Imperial funds for the construction of new lines has tended to diminish. Since 1909, when the Imperial funds devoted to new construction reached a low figure, increasing efforts have been made to augment the supply of funds from other sources. In June, 1910, more liberal terms than those previously conceded were offered, and under these terms private enterprise had two alternative forms of assistance, namely, (1) a rebate paid by parent lines from its net earnings from traffic brought to it by the feeder railway, sufficient to make up 5 per cent on the *capital outlay*, thus limiting the liability of the main line railway, but holding out a fair prospect of a 5 per cent return, and (2) a firm guarantee from Government of $3\frac{1}{2}$ per cent on capital outlay. But it has been patent that the capital raised by a company may at times be considerably more than that for the time being expended and that even under the second alternative shareholders in branch line companies were not assured of any definite return. For this reason, in November, 1913, revised terms were offered and they differed from those of 1910 mainly in the substitution of *paid-up capital* for *capital outlay*. The guarantee terms, however, offer one very distinct advantage in so far as the shares of these companies are available for the investment of trust funds. In order to encourage investments of this class one of the modifications introduced in 1913 was a clause in the terms which rendered it possible for companies to be floated partly on the rebate and partly on the guarantee terms.

District Boards

Another agency for financing feeder railways has been found in the District Boards. These local bodies have become fully alive to the advance in the general welfare of a district which is to be anticipated from the improvement of communications. Since 1884 District Boards in Madras have been empowered to levy a special Railway cess not exceeding 3 pies per rupee of land revenue ; and it has since been decided that all local Governments who may wish to do so, may legislate for the levy of a similar cess by which means, it is hoped, much encouragement may be given to the construction of local feeder railways at the cost of local funds.

Administration and control

Up to 1905 the administration of the railways in India was controlled by the Public Works Department of the Government of India. In that year the control was transferred to an expert Railway Board, consisting of a Chairman and two members. The duties assigned to the Board were of two kinds. (1) Its deliberative functions included the preparation of the railway programme of expenditure and the discussion of the greater questions of railway policy and finance affecting all lines. As regards such questions, the ultimate decision necessarily continued to rest with the Government of India and the Secretary of State in Council. (2) Its administrative duties included the construction of new lines by State Agency, the carrying out of new works on open lines, the improvement generally of railway management, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines. The final authority in regard to these duties was delegated, subject to restrictions, to the Railway Board. In 1907 a Committee on Indian Railway Finance and Administration was appointed by the Secretary of State for India. The Committee came to the conclusion that the system under which the Railway Board worked was not satisfactory, and suggested improvements. After consideration of their recommendations, it was decided to introduce in 1908 certain changes, the Chairman of the Board becoming President with enhanced powers, and the Board being made independent of the Commerce and Industry Department Secretariat.

Sources of statistics

The tables in this volume are compiled from the statistics given in the Report on the Administration of Railways in India issued by the Railway Board, except table No. 97 (Revenue account of the railways in respect of which Government is financially responsible) which is compiled from the Finance and Revenue Accounts of the Government of India. The Administration Reports published up to 1912 had reference to the working of each calendar year. Owing to the adoption, by the principal railway administrations, of the Government financial year (1st April to 31st March) for all accounts and statistical purposes, the Administration Reports have, with effect from 1st April, 1913, been published for the financial year.

Open mileage

The number of miles of all railways open for traffic at the end of 1915-16 was 35,833 as compared with 29,303 in 1906-07, the increase in the decade being thus 6,530 miles or 22 per cent. Of this, 18,060 miles were of the standard-gauge ($5\frac{1}{2}'$), 14,671 miles of the metre-gauge ($3'\ 3\frac{3}{8}''$), and 3,102 miles of other gauges ($2\frac{1}{2}'$ and $2'$). Of the standard-gauge 15,577 miles, of the metre gauge 9,442 miles, and of other gauges 1,242 miles were owned by Government.

Capital outlay

Up to the close of the year 1915-16 the capital outlay on all railway lines open for traffic amounted to R5,29,98 lakhs as compared with R3,71,27 lakhs at the end of 1906, the increase in the decade being 43 per cent. Of this total capital outlay of R5,29,98 lakhs, the outlay on State railways amounted to R4,69,22 lakhs. The outlay incurred during 1915-16 on lines in which the State is financially interested amounted to R6,74 lakhs.

Results of working : earnings

The gross earnings of all Indian railways during the year 1915-16 amounted in round figures to R64,66 lakhs, compared with R60,42 lakhs in 1914-15, or an increase of R4,24 lakhs or 7 per cent. This total amount of R64,66 lakhs of gross earnings consisted of goods traffic R38,76 lakhs, coaching traffic R24,14

lakhs, electric telegraph R10 lakhs, steam boat R23 lakhs, and sundries R1,43 lakhs. The working expenses were R32,92 lakhs as against R32,74 lakhs in 1914-15. The net earnings thus amounted to R31,74 lakhs against R27.68 lakhs in 1914-15, or an increase of R4,06 lakhs or about 15 per cent. These net earnings yielded a return on the capital outlay (R5,29,98 lakhs) on open lines, *i.e.*, on mileage earning revenue, of 5·99 per cent, as compared with 5·33 per cent in 1914-15 and 6·19 per cent in 1913-14. Details of the results of working in 1915-16 of each railway system, which includes branch lines and lines under the same management, are shown in table No. 99.

Financial results of working of State railways

Up to the end of 1898-99 the railways in respect of which Government was financially interested worked at a loss to the State, owing partly to the yearly additions of new and undeveloped lines and partly to the increased payments to certain guaranteed companies necessitated by the fall of exchange; but with the termination of the guarantee of the Great Indian Peninsula Railway and the development of traffic, the revenue has, excepting the single set-back in 1908-09, a famine year in North-Western India, exceeded the expenditure. The deficit in 1908-09 was ascribed to a fall in gross receipts combined with an increase in working expenses. The net gain to the State in 1915-16 was R6,11 lakhs as against R3,24 lakhs in 1914-15. This surplus gives a net profit to Government (after paying all charges including interest) of 1·3 per cent on the capital outlay on State railways; but, as already stated above, the net earnings of all railways yielded a return to the railways of 6 per cent on the total capital outlay.

Passenger traffic

The total number of passengers carried by Indian railways in 1915-16 was in round numbers 464 millions as against 451 millions in the preceding year, or an increase of 3 per cent. This total comprised 729,000 first class passengers, 3,791,000 second class, 13,648,000 intermediate class, 413,254,000 third class passengers, and 32,959,000 for trips which the holders of season and vendors' tickets are assumed to have made on the prices paid for their tickets. The total earnings from passenger traffic amounted to R20,99 lakhs, or an increase of 3 per cent over the preceding year. The increase in the passenger traffic during the year under review as compared with that of 1914-15 was chiefly due to the revival of traffic, after the outbreak of war, to the opening of new lines, to the movement of troops, and to fairs, pilgrimages, and marriage parties.

Goods traffic

The total quantity of goods carried during the year 1915-16 was 82,499,000 tons, which is greater than that of the preceding year by 2 per cent; and the total earnings from goods traffic increased from R35,09 lakhs in 1914-15 to R38,76 lakhs in 1915-16, *i.e.*, by 10 per cent. The better results of the year are attributable to the recovery of trade, as in the case of the coaching traffic, to the opening of new lines, and to the movement of military stores. The diversion of coal traffic to Bombay, from the sea to the rail route, owing to the abnormal shortage of shipping, was also largely accountable for the increase. The average rates charged per mile per passenger of each class and per ton of goods carried during the year 1915-16 are stated in the margin as compared with those ten years ago.

		1905	1915-16
		Pies	Pies
Passengers	First class	13·16	13·68
	Second class	5·74	5·50
	Intermediate class	3·06	3·16
	Third class	2·29	2·29
	Season and vendors' ticket holders	1·38	1·42
Goods (per ton)		5·42	4·34

Rolling-stock

The total number of locomotives at the end of 1915-16 numbered 8,674, of which 1,982 were employed exclusively on passenger working, 2,695 on goods working, and 3,997 on mixed working. The number of coaching stock was 23,375 and that of goods stock 188,719.

Train mileage and earnings per train mile

The total train-mileage (including miscellaneous train miles) was 159,038,000 in 1915-16 as against 157,142,000 in the preceding year. Of this, coaching train miles numbered 56,364,000 and goods train miles numbered 62,766,000. The gross earnings per train mile worked out to R4·07, the working expenses R2·07, and the net earnings per train mile R2·00.

Railway staff

The total number of servants in railway employ at the close of the year 1915-16 was 626,580 as against 600,483 in the preceding year. Of this number, 7,273 were Europeans, 10,412 Anglo-Indians, and 608,895 Indians. Of the Europeans and Anglo-Indians 15,449 were enrolled as volunteers. At the close of 1915-16 there were 11,232 children and 10,474 apprentices and workmen attending the railway schools.

Railway accidents

The total number of persons killed by railway accidents during the year 1915-16 was 2,418, as against 2,367 in the preceding year. Of this number, 247 were passengers, 433 railway servants, and 1,738 other persons. The total number of persons injured in 1915-16 was 2,153, of whom 821 were passengers, 796 railway servants, and 536 other persons.

IRRIGATION

[For Tables, see pages 204 to 219]

Irrigation has been resorted to in India from time immemorial as a means of supplementing the natural rainfall and of storing water for use at critical periods. In general it may be said that the security of the harvest depends on the existence of some form of irrigation in almost all parts of India, except in tracts such as Eastern Bengal, Assam, Lower Burma, and the Malabar Coast where the average rainfall is not less than 70 inches in the year.

Types of irrigation works

Irrigation works are of three great types—lift, storage, and river works—which are represented by wells, tanks or reservoirs, and canals. About 25 per cent of the irrigated area, or 12,000,000 acres, are irrigated from wells; the average area irrigated by tanks is about 7,000,000 acres, and over 20,000,000 acres are irrigated by canals. The wells and smaller tanks are often the property of private individuals, but the larger tanks and

A full report of the trade of each year will be found in the *Review of the Trade of India* which has been published annually for the past forty-three years.

The statement below shows the details of the total sea-borne trade, both private and Government, during the five years ending 1915-16

	1911-12	1912-13	1913-14	1914-15	1915-16
	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)
Imports of Merchandise	144,05,54	166,62,97	191,30,80	144,93,07	138,16,93
„ Treasure	53,47,09	61,83,17	43,43,96	21,80,83	12,94,62
TOTAL IMPORTS	197,52,63	228,46,14	234,74,76	166,73,90	150,11,55
Exports of Merchandise	227,98,98	246,21,83	249,00,75	182,17,60	199,48,04
„ Treasure	10,37,39	10,63,18	7,08,29	5,28,95	8,22,58
TOTAL EXPORTS	238,36,37	256,85,01	256,09,04	187,46,55	207,70,62
TOTAL SEA-BORNE TRADE	435,89,00	485,31,15	490,83,80	354,20,45	357,82,17
Net Imports of Treasure	43,09,70	51,19,99	36,35,67	16,51,88	3,72,04
Net Exports of Merchandise	83,93,44	79,58,86	57,69,95	37,24,53	61,31,11
Excess of Exports over imports	40,83,74	28,38,87	21,34,28	20,72,65	57,59,07

During the year 1915-16, the seasonal conditions of India were, on the whole, favourable and the prosperity of the world's trade in spite of some adverse circumstances reacted on the Indian trade. The imports of merchandise fell by R6·76 crores to R138·17 crores, while the total exports, including re-exports, advanced by R17·3 crores to R199·48 crores. The ratio of increase is shown below, by taking the figures for 1915-16 as equal to 100 :

	1913-14	1914-15	1915-16
Exports of merchandise	124·8	91·3	100
Imports „ „	138·5	104·8	100
Total	130·4	96·9	100

Imports

The decrease under imports in 1915-16 was chiefly due to reduced shipments from the United Kingdom (—R16·02 crores), from Germany (—R4·19 crores), from Austria-Hungary (—R1·29 crores), and from Belgium (— R 1·4 crores). Bengal shared the largest decrease of R4·24 crores, and Bombay and Sind came next with R2·02 crores.

The principal articles showing marked variations are shown in the table below :

		Quantity (000 omitted)		Value (000 omitted)		Increase + or Decrease — per cent compared with 1914-15

Under exports the United Kingdom accounted for an increase of R18⅓ crores, the United States of America of R4 crores, Japan of R2¾ crores, Italy of R2 crores, while the exports to Germany, Belgium, and Austria-Hungary were *nil* as against R10 crores, R5¼ crores, and R4½ crores, respectively, in the preceding year. The share of Bengal in the export trade advanced by R17½ crores, and of Madras by R3 crores, while Bombay and Sind's share fell by nearly R2 crores, and Burma's by R1⅓ crores. The principal articles which showed marked variations are shown in the appended table : Exports

The trade of the principal ports of India is detailed in table No. 64. Calcutta shows an increase of R12·7 crores, and Madras of R1·6 crores, while Bombay accounts for a decrease of R3·6 crores, Karachi of R34 lakhs, and Rangoon of R53 lakhs. Trade of ports

In 1915-16 the imports of treasure decreased by R9·86 crores, gold showing a decrease of R5·42 crores and silver of R4·44 crores. Exports of treasure increased by R2·93 crores, gold showing an increase of R3·33 crores but silver a decrease of R40 lakhs. Treasure

A summary table of the imports and exports of gold and silver is given below :

	1911-12	1912-13	1913-14	1914-15	1915-16
	R (000 omitted)	R (000 omitted)	R (000 omitted)	R (000 omitted)	R (000 omitted)
Imports of gold	41,49,36	41,29,08	28,22,64	10,70,38	5,28,17
Exports of gold	3,73,38	7,28,96	4,90,26	3,05,64	6,39,08

Shipping

The number and tonnage of steamers and sailing vessels with cargoes and in ballast which entered from and cleared to all countries during 1915-16 were 8,634 and 12·15 million tons, as detailed below, as compared with the previous four years :—

		1911-12	1912-13	1913-14	1914-15	1915-16
Entered	Vessels	4,481	4,408	4,294	3,937	4,212
	Tons (000 omitted)	8,355	8,728	8,624	6,313	6,038
Cleared	Vessels	4,387	4,341	4,323	4,023	4,422
	Tons (000 omitted)	8,262	8,757	8,762	6,545	6,114

In 1915-16 the number of vessels under the principal flags were British and British Indian 5,606, Japanese 283, Norwegian 177, Dutch 141, Italian 91, Russian 51, and native 2,185.

WRECKS

[FOR TABLE, SEE PAGE 157]

This table exhibits the number of British, British Indian, and native vessels which were totally lost in Indian waters (from Suez to Penang), the total tonnage of vessels wrecked, and the number of lives lost, in the past twenty-five years.

The number and tonnage of each class of vessels annually lost from 1877 and the proportion which the number and tonnage bear to the total number and tonnage of vessels that cleared from Indian ports, are approximately as follows :—

	BRITISH								BRITISH INDIAN				NATIVE CRAFT			
	STEAM				SAILING				SAILING							
	Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to

30 vessels were totally lost in 1915, of which 5 were British, 21 British Indian, and 4 native craft, excluding one vessel of foreign nationality. There were 2 collisions, 11 founderings, 15 strandings and 2 miscellaneous cases amongst the wrecks. In a total of 30 wrecks, 19 lives were reported to have been lost during the year.

The causes of exceptional loss of life in certain years are stated below—

1876. 400 pilgrims perished in the *Hydari*, bound from Calcutta to Jeddah.
1879. Continuous bad weather, and a cyclone, on the west coast of India in May.
1885. The *Speke Hall* foundered (58 lives lost) in the Gulf of Aden; and three vessels were wrecked (239 lives lost) in cyclones in the Bay of Bengal and on the east coast of Arabia.
1887. The *Sir John Lawrence* foundered (750 lives lost) at the mouth of the Hooghly in a cyclone.
1888. The *Vitarna* (800 lives lost) wrecked off the Káthiawár coast in a cyclone.
1891. Four vessels were wrecked in a cyclone in the Bay of Bengal.
1892. The *Deccan* foundered (214 lives lost) in the Indian Ocean.
1896. The *Luna* was wrecked (75 lives lost) in the Gulf of Aden.
1902. The *Camorta* was wrecked (781 lives lost) on the Burma Coast.
1905. The *Hashemi* foundered (74 lives lost) off the south Orissa coast in a cyclone.
1911. The *Fifeshire* was wrecked (24 lives lost) in the Gulf of Aden.
1912. The *Chinho* foundered (100 lives lost) in the Hlaing river near Tantabin (Burma).
1913. Two vessels (*Aungzeya* and *Mombai Salamat*) capsized, the former near Onbinzeik, Attaran river (Burma), and the latter in the Gulf of Cambay, the total number of lives lost being 89.

MERCHANDISE MARKS

[FOR TABLE, SEE PAGE 158]

The Indian Merchandise Marks Act (IV of 1889) was passed in 1889, but its operation in the earlier years was restricted, especially in Calcutta, in consequence of the lack of adequate Customs machinery for the examination of goods. In 1894, with the introduction of the present tariff, the Customs staff was strengthened for the examination of goods for assessment to duty, and this increase enabled examination to be made at the same time for the purposes of the Merchandise Marks Act.

The Act was intended originally to prevent the fraudulent sale of goods bearing false trade marks or false trade descriptions (as of origin, quality, weight, or quantity). While the Act was before the Legislature, a provision was added to require that all piece goods should be stamped with their length in yards. In this respect these goods are an exception, for the Act does not require that other descriptions of goods should be stamped or marked, though it requires that when goods are marked the marks must be a correct description.

In 1915-16 the total number of infringements of the Act were 2,190, as against 1,199 in 1914-15. Of this Bengal reported 638, Bombay 1,100, Burma 223, Madras 130, and Sind 99 cases. The increase mainly occurred in Bombay, and is mainly due "to the fact that owing to the war the place of German and Austrian goods is being taken by manufactures of other countries, the shippers failing to comply with the requirements as to marking." The majority of the infringements (1,705 out of 2,190) were cases of false trade description as to the country of origin. In many of these cases it was reported that "goods not manufactured in the United Kingdom or British India bore names of British Indian dealers or were described in such a manner as to suggest British or British Indian origin," or "goods made in one foreign country bore descriptions suggestive of origin in another foreign country", or "goods manufactured chiefly in Japan and the United States of America bore descriptions suggestive of British origin." Usually detained goods are released with a fine. In 1915-16, however, this procedure was followed in 1,045 cases; and in 1,143 cases the detained goods were released without the infliction of a fine, but with a warning to the importers or with orders insisting on the correction of the offending marks. Detention is but rarely followed by confiscation, and there were only 2 such cases during 1915-16.

The average number of detentions under the Act during the twenty years ending 1915-16 has been as stated in the margin. In this period of twenty years, 39 per cent of the detentions were on account of the application of false trade marks or false trade descriptions. In 42 per cent of the cases detention was ordered because the country of origin was either not stated or was falsely stated, and in 19 per cent because the provisions of the Act for the stamping of piece goods had been infringed.

POST OFFICE

[FOR TABLES, SEE PAGES 159 to 192]

The main business of the post office is the conveyance and delivery of letters, postcards, newspapers, parcels, and book-packets. The total length of mail lines over which its work is carried on is 157,657 miles. Railway and steamer services now extend over 54,809 miles of this length, and the other 102,848 miles are worked by boats, mail-carts, horses, camels, and runners. Many carriage and cart lines are, however, subsidised for the carriage of mails. The number of post offices is 19,328, of letter-boxes 49,684 (excluding those at post offices), and of village postmen 8,225. The actual number of registered articles of the letter mail and of parcels posted, added to the estimated number of unregistered articles of the letter mail given out for delivery, in 1915-16 amounted to more than 1,051 millions. Letters and other articles carried

In 1899 the Indian Post Office joined the International Parcel Post Union; and parcels are now exchanged by post between India and almost every country in the world. International Parcel post

In 1877 the post office undertook to collect from the addressee the declared value of a parcel or registered article and to transmit the money to the sender. The extent to which this system is used by traders and their customers is indicated by the fact that in 1915-16—38 years after its introduction—the number of value-payable articles carried was 9,653,000 and the value declared for realisation was ₹12,92,59,000. Value-payable parcels

In December, 1898, the limit to the sum for which an article could be insured was raised for registered letters and value-payable registered letters and registered parcels to ₹2,000, and the procedure in connection with the insurance of articles was simplified, the sender of an insured article being no longer required to declare its contents. The insurance fee was at first fixed at one-half per cent, but shortly afterwards it was reduced to one-quarter per cent, and in July, 1905, it was further reduced to one-eighth per cent. The gross sum for which articles were insured by the post office in 1915-16 was nearly ₹74,00,00,000. Insurance of letters and parcels

In 1880 the Government of India transferred from the treasuries to the post office the business of the issue and payment of money orders, with the result that within a few months the number of orders issued was quadrupled. The value of inland money orders issued has increased from ₹4,57,09,000 in 1880-81 to ₹54,26,52,000 in 1915-16. Special arrangements have been made to adapt the money order system to remittances of revenue, rent, and miscellaneous Government dues, and in several provinces the system is largely used for these purposes. The commission on inland money orders is 4 annas for each complete sum of ₹25, with lower rates of 1 anna, 2 annas, and 3 annas, respectively, for any sums or remainders not exceeding ₹5, ₹10, Money orde

and R15. Foreign money orders are also exchanged with the principal countries of the world, the maximum limit of a rupee order being R600 and that of a sterling order £40, except in a few cases in which the maximum limit is either £10 or £20.

British Postal orders

In 1884 the Indian Post Office undertook the sale of British postal orders. Such orders, ranging in value from 6*d.* to 21*s.*, can now be exchanged with the greater part of the British Empire and are also used for inland remittances.

Savings banks*

In 1870 Government savings banks* were established in connection with district treasuries. In 1882 sanction was given for the opening of savings banks at post offices, and three years later the closure of the treasury savings banks was ordered. In 1882-83 the number of depositors in the postal savings banks was 39,000 and the sum at their credit R27,97,000. By the end of 1915-16 the number of depositors increased to 1,669,000 and the sum at their credit amounted to R15,32,13,000. The post office undertakes on behalf of depositors the purchase and sale of Government promissory notes and the transfer of such notes to the Accountant-General, Post Office and Telegraphs, for custody on behalf of the purchaser.

Postal telegrams

In 1883 many post offices were made receiving offices for the transmission of inland telegrams by post to the nearest telegraph office; and telegraph work was also undertaken by the post office in a certain number of offices. The number of telegraph offices has thus been largely increased, and out of 3,484 state (non-railway) telegraph offices on the 31st March, 1916, 3,288 were postal telegraph offices. In 1915-16 the number of messages transmitted by receiving offices was 79,000 and the number of messages signalled by postal telegraph offices was 10,620,000 excluding free messages.

Postal life insurance

In 1884 sanction was given to a scheme of life insurance, whereby an officer of the postal service is enabled to obtain a policy for a sum not exceeding R4,000 on the security of Government. In 1888 the scheme was extended to the Telegraph Department. In February 1898 the scheme was extended generally to all Government servants, who are subject to civil rules, and a system of endowment assurances was added to the scheme. By the end of 1915-16, nearly 35,000 lives had been insured for the aggregate sum of R4,69,26,000.

Payment of military pensioners

In 1890 the post office undertook the payment of military pensioners in the Punjab at the post offices nearest their homes. The number of pensioners thus paid in 1915-16 was about 55,000 and the aggregate sum paid to them R34,78,000.

Rates of postage, inland and foreign

Letters and postcards.—With effect from the 1st October, 1907, the weights of letters allowed for ½ anna and 1 anna were raised from ¾ to 1 tola and from 1½ to 10 tolas, respectively. Embossed envelopes bearing a half anna coloured impressed stamp and sold at the face value of the stamp without any charge for the envelopes were introduced in 1873. Formerly an additional charge was made for re-direction, equal to the postage paid when the letter was posted, but the additional charge was discontinued in 1877. The introduction of the inland postcard in 1879 gave a still lower rate of postage than that given by the rate of half an anna per half tola with an envelope supplied without charge. The inland postcard has from its introduction been priced at one pice (three pies) per single card and half an anna per reply card, the price in each case covering the cost of the card as well as postage.

Newspapers and packets.—A new system of "registering" publications as newspapers was introduced in January, 1897, under which a "registered newspaper" of weight not exceeding twenty tolas is carried by the inland post for half an anna. From the 1st January, 1904, the maximum weight for a registered newspaper admissible for transmission through the post for one-quarter of an anna postage was raised from 4 to 6 tolas. This weight has been further raised, since the 1st October, 1908, from 6 to 8 tolas, concurrently with an increase from 20 to 40 tolas in the maximum weight admissible for half an anna postage.

The postage on packets other than newspapers was one anna for 10 tolas until 1877, when the rate was reduced to one anna per 10 tolas for book packets and two annas per 40 tolas for book packets and patterns. In 1878 the packet rate was lowered to half an anna per 10 tolas.

Parcels.—The present rates of postage, which came into force on the 1st October, 1907, and which are applicable to all classes of parcels, are (1) in the case of parcels not exceeding 440 tolas in weight, 2 annas for every 40 tolas or part of that weight; and (2) in the case of parcels exceeding 440 tolas in weight, R3 for a parcel not exceeding 480 tolas in weight, and 4 annas for every additional 40 tolas.

Registration fees.—From the 1st July, 1901, the fee for the registration of a parcel was fixed at a uniform charge of 2 annas.

Official papers.—With effect from the 1st October, 1907, the postage rates for official letters, packets, and parcels are the ordinary rates for those articles.

Foreign postage.—The rates now are—for letters, 2½ annas for the first ounce and 1½ annas for every additional ounce; for post cards, single, 1 anna each; reply, 2 annas; for printed papers, half an anna per two ounces; for business papers entirely or partly in manuscript, 2½ annas for the first 10 ounces and half an anna for every 2 ounces additional; for samples, 1 anna for the first 4 ounces and half an anna for every 2 ounces additional. Since the 1st October, 1907, the rate for letters sent from British India to the United Kingdom and almost all British Possessions, as also to Egypt (including the Soudan), has been fixed at one anna for every ounce or fraction thereof.

* For detailed information regarding Post Office Savings Banks, see Vol. II of the Financial Statistics of British India

	TOTAL	12,31,482

For the lines of postal communication under contract with the Peninsular and Oriental Company an annual subsidy of £305,000 is paid by His Majesty's Government for the combined Eastern and Australian mail services. The Indian share of this subsidy has not yet been assessed.

TELEGRAPHS

[For Tables, see pages 193 to 196]

Departmental changes

The experimental amalgamation of posts and telegraphs in the Bombay and Central Circles in 1910 continued till 31st March, 1914, and the complete fusion of the two departments took effect from the 1st April, 1914.

Inland tariff

On the 1st January, 1909, a revised inland tariff was introduced, and it is being continued, the rates are (1) Express—one rupee for 12 words and 2 annas for each additional word, and (2) Ordinary—six annas* for 12 words and half an anna for each additional word, the address being charged for.

Tariff between India and Europe

On the 1st May, 1914, the rates for cablegrams between India and Europe were reduced from R1-8 per word *viâ* Indo or Eastern to R1-4 per word. A system of deferred telegrams in plain language at half the usual rates for private telegrams was introduced between the United Kingdom, Germany, France, Algeria, Tunis, Portugal, and the United States of America, with effect from the 1st January, 1912, and was subsequently extended to practically all European administrations, besides a number of administrations in the extra European regime. The rates between Australia on the one hand and India, Burma, and Ceylon on the other, were reduced to a uniform rate of R1-4 per word with effect from the 1st June, 1903. From the 1st May, 1914, a system of week-end cable telegrams at one-fourth the rate for ordinary telegrams, with a minimum of 20 words per telegram, was introduced between India and the principal British Possessions, Portugal, and Germany, but this was discontinued in August, 1914, on the outbreak of the European war. It was reintroduced in January, 1915, but without the minimum charge and restricted to telegrams of a social character exchanged with soldiers, sailors, and nurses serving with the Allied forces in different parts of the world.

Tariff between India and Mesopotamia

With effect from the 1st December, 1915, a reduction of twelve annas a word was made in the rate for telegrams exchanged between India and Mesopotamia and of two annas a word in the rates for telegrams between India on the one side and Persia and the Persian Gulf on the other. From the 15th December, 1915, a new rate of three annas a word was introduced for the exchange of Press telegrams between India and Mesopotamia.

Telegraph laws

Act XIII of 1885, as amended by Act XI of 1888 and Act VII of 1914, repealing all earlier Acts (the first being XXXIV of 1854), deals with the privileges and powers of Government in respect to telegraphs, their authority to grant licenses for the establishment of telegraphs, and the regulations under which telegraphs are to be worked. They also provide and regulate the powers of the Department to place telegraph lines and posts on public and private lands, and declare the penalties for infringements of licenses, and for all other offences connected with telegraph lines, and with the transmission of telegrams. Rules and regulations for the acceptance, transmission, and custody of telegrams are published from time to time in the *Gazette of India* by the Governor-General in Council, and have the force of law.

Progress of revenue and expenditure and of messages

The revenue and expenditure of the Department and the number of messages sent, during the five years ending 1915-16, are entered in the table below :—

	Revenue R	Expenditure R	Surplus + or Deficit — R	Number of messages: Inland State	Inland Private	Inland Total	Foreign State	Foreign Private	Foreign Total
1911-12 . .	1,42,74,275	1,23,24,356	+19,49,919	1,207,810	11,928,575	13,136,385	19,541	1.515,893	1,535,434
1912-13 . .	1,52,79,958	1,28,21,644	+24,58,314	1,179,353	12,663,569	13,842,922	13,144	1.593.005	1,606,149
1913-14 . .	1,55,50,430	1,37,01,971	+18,48,459	1,328,413	13,609,988	14,938,401	13,593	1,644,703	1,658,296
1914-15 .	1,70,59,934	1,40,66,947	+29,92,987	1,732,490	13,186,529	14,919,019	35,688	1.235.659	1,271,347
1915-16 . .	1,85,77,748	1,42,26,782	+43,50,966	1,888,269	14,189,039	16,077,308	62,307	1,403,273	1,465,580

The total receipts of the Telegraph Department in 1915-16 amounted to R1,86 lakhs and the working revenue charges to R1,42 lakhs, as against R1,70½ lakhs and R1,40½ lakhs, respectively, in the preceding year. Thus the gross revenue increased by 8·9 per cent and the expenditure by 1·1 per cent. The surplus amounted to R43½ lakhs as against nearly R30 lakhs in 1914-15. The increase in revenue is mainly due to additional "Fees on Telegrams" consequent on the restriction on the use of telegraph codes. The revenue charges during the year increased but slightly, due partly to the absence of a certain number of employés on field service and to the postponing of revenue works. The chief items of receipts were fees on telegrams (over R1,37 lakhs), claims from railways and canals (R29¾ lakhs), rent for telephone connections (R10¼ lakhs), claims from guarantors and royalties from telephone companies (R1 lakh each).

Expenditure debitable to capital account incurred during the year 1915-16 was R18 lakhs, bringing the grand total of such expenditure to the end of the year to R12,72½ lakhs.

The telegraph system was extended by 1,943 miles of line and 7,687 miles of wire and cable, and consisted on the 31st March, 1916, of 86,067 miles of line and 337,720 miles of wire and cable, of which 104,315 miles of wire and cable were used by railways, 10,744 for canals, 30,361 for telephone exchanges and private lines, and 192,300 for departmental purposes.

* On the 1st December, 1916, the rate for ordinary telegrams was raised from six annas to eight annas for 12 words.

The total number of inland telegrams was 16,077,308, of which 1,888,269 were State telegrams and 14,189,039 private telegrams, showing an increase of 9 per cent and of 8 per cent, respectively. The revenue derived from them amounted to over R24 lakhs and R81 lakhs, showing a decrease of ·4 per cent and an increase of 8 per cent, respectively. Number of telegrams

Foreign telegrams were 1,465,580 in number, realising R30½ lakhs, showing an increase of 15 per cent in number, and 18 per cent in value. State foreign telegrams, numbering 62,307, with a revenue of nearly R5 lakhs, showed a large increase of 75 per cent in number and 85 per cent in value. Private foreign telegrams on the other hand advanced by 14 per cent in number and 10 per cent in value.

Table No. 95 shows the general statistics of the Indo-European Telegraph Department. The total number of words telegraphed in 1915-16 was 4,201,629 and the revenue derived from messages amounted to £170,843. The total receipts of the Department amounted to £173,057 and the working revenue charges to £93,764. The expenditure, debitable to capital account at the end of the year 1915-16 was £1,027,869. [These statistics have no connection whatever with those of the Indian Telegraph Department dealt with in the preceding paragraphs.] Indo-European Telegraph Department

RAILWAYS

[FOR TABLES, SEE PAGES 197 TO 203]

Railway construction began in India about the year 1850, and was for a number of years carried out through the agency of joint-stock companies under contract with the State. The companies were given a guarantee of 5 per cent on their capital outlay, with half the surplus profits in addition after the guaranteed interest for the half-year had been met at the rate of exchange of 22*d.* to the rupee. The companies were required to sell their railways to Government after 25 years at a rate specified. No capital expenditure beyond that involved by the grant of free land was entailed on the State, but the general revenues had to meet the amount by which the net receipts fell short of the guaranteed interest. The railways which were constructed on these terms have played an important part in the development of the country. Although British capital was attracted into India, without which these great works could hardly at that time have been constructed, yet for many years these railways imposed a considerable burden on Indian revenues as all expectations in regard to profits were not realised, owing to the heavy outlay incurred in the construction of the lines on a gauge of 5 feet 6 inches, to the alterations in the routes after work had been commenced, and to the outbreak of the mutiny in 1857. The increasing demands for guaranteed interest proved too much and the whole guarantee system was discontinued in 1869. All the old guaranteed companies have now been purchased by Government under their contracts. Guaranteed companies

In 1870 Government began to borrow money for railway developments by direct State Agency, but expenditure was to be met by the receipts from the guaranteed railways, and no increased charge was to be thrown on the revenues. In 1879 this system ceased, and the capital outlay was limited to what Government could borrow in India without unduly pressing the market or could spare from revenue. These restrictions would, however, have hampered the work of construction, and economic progress would have been severely checked, had not Government in 1880-81 decided again to evoke the aid of private capital under a guarantee. The system now adopted was distinguished from the old guarantee and the State Railway system; and the lines promoted were called "State lines worked by companies," but practically the only difference between these and the old guaranteed companies was that the terms were easier for Government. From that time onwards a number of companies have assisted in the development of Indian railways. The main points of difference between the systems of 1870, 1879, and 1880 are:—Prior to 1870 railway construction was carried out by companies with private capital, the companies being given by Government a guarantee of a minimum return of 5 per cent on their capital outlay coupled with the free grant of land required. Under the system of 1870, railway developments were to be made by direct State Agency from borrowed capital, instead of seeking the aid of private capital; the system of 1879, while upholding this policy, put certain restrictions on the extent of borrowings; but the system of 1880 again evoked the aid of private capital, under a guarantee, although the terms were easier for Government than in the old system of guaranteed companies in vogue prior to 1870. Direct State Agency. Assisted companies

By 1883, however, the finances of the country had considerably improved. The limit of borrowing was raised from R2 crores to R3½ crores annually, of which about R3 crores were assigned to railways. Railways were to be made as required but were, as a rule, to have a good prospect of repaying their interest charge, those for famine purposes being paid for, with irrigation works, from the Famine Insurance grant. Since 1885, when the first programme under the new conditions was introduced, the annual expenditure on railways has constantly increased. In 1890 the whole available balance of the Famine Insurance grant was devoted to railway construction and in 1892 half a crore was being especially added to capital expenditure to enable companies to undertake new lines of railway and extensions with sums borrowed by Government. As the exchange continued to fall and affect seriously the finances of India, another attempt was made in 1893 to work through companies. As the guarantee involved a gold liability, a subsidy was offered instead. This took the form of a rebate or payment from the gross earnings of the main line from traffic interchanged with the company's lines, so that the total profits of the company should yield a dividend of 4 per cent. The rebate was, however, limited to 10 per cent of the gross earnings from such traffic. These conditions were not found sufficiently attractive and the terms were again revised in 1896. Companies were now offered either an absolute guarantee of 3 per cent with a share of surplus profits, or a rebate up to the full extent of the main line's net earnings in supplement of their own net earnings, the total being limited to 3½ per cent on the capital outlay. As regards railways passing through Native States, the money has in some cases been found from the revenues of the States, in others it has been lent to the States by Government, and in others again Government has guaranteed loans made to a State by a company. Policy of advance. Native States

Railway programme

The question how best to provide funds for a wider development of the railway system was considered and sanction was given in 1896-97 to an expenditure of nearly R30 crores spread over 3 years, but this programme could not be carried out owing to many adverse circumstances affecting the revenues of Government. Since 1896 the expenditure incurred not only by the State railways but by those guaranteed by the State has been included in the railway programme ; and in 1901 it was decided to adopt the principle of regarding the needs of open lines for rolling stock, stations, goods sheds, permanent way, etc., as a first charge upon the funds available, thereafter the completion of lines in progress, and lastly the claims of new lines, and the money was proposed to be obtained by borrowing in London and India, by appropriations from the Famine Insurance grant, and by utilisation of surplus revenues and Savings Bank deposits.

Private enterprise

Though the amount made available for capital expenditure on Railways has been increased over a series of years, the balance available for Imperial funds for the construction of new lines has tended to diminish. Since 1909, when the Imperial funds devoted to new construction reached a low figure, increasing efforts have been made to augment the supply of funds from other sources. In June, 1910, more liberal terms than those previously conceded were offered, and under these terms private enterprise had two alternative forms of assistance, namely, (1) a rebate paid by parent lines from its net earnings from traffic brought to it by the feeder railway, sufficient to make up 5 per cent on the *capital outlay*, thus limiting the liability of the main line railway, but holding out a fair prospect of a 5 per cent return, and (2) a firm guarantee from Government of $3\frac{1}{2}$ per cent on capital outlay. But it has been patent that the capital raised by a company may at times be considerably more than that for the time being expended and that even under the second alternative shareholders in branch line companies were not assured of any definite return. For this reason, in November, 1913, revised terms were offered and they differed from those of 1910 mainly in the substitution of *paid-up capital* for *capital outlay*. The guarantee terms, however, offer one very distinct advantage in so far as the shares of these companies are available for the investment of trust funds. In order to encourage investments of this class one of the modifications introduced in 1913 was a clause in the terms which rendered it possible for companies to be floated partly on the rebate and partly on the guarantee terms.

District Boards

Another agency for financing feeder railways has been found in the District Boards. These local bodies have become fully alive to the advance in the general welfare of a district which is to be anticipated from the improvement of communications. Since 1884 District Boards in Madras have been empowered to levy a special Railway cess not exceeding 3 pies per rupee of land revenue ; and it has since been decided that all local Governments who may wish to do so, may legislate for the levy of a similar cess by which means, it is hoped, much encouragement may be given to the construction of local feeder railways at the cost of local funds.

Administration and control

Up to 1905 the administration of the railways in India was controlled by the Public Works Department of the Government of India. In that year the control was transferred to an expert Railway Board, consisting of a Chairman and two members. The duties assigned to the Board were of two kinds. (1) Its deliberative functions included the preparation of the railway programme of expenditure and the discussion of the greater questions of railway policy and finance affecting all lines. As regards such questions, the ultimate decision necessarily continued to rest with the Government of India and the Secretary of State in Council. (2) Its administrative duties included the construction of new lines by State Agency, the carrying out of new works on open lines, the improvement generally of railway management, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines. The final authority in regard to these duties was delegated, subject to restrictions, to the Railway Board. In 1907 a Committee on Indian Railway Finance and Administration was appointed by the Secretary of State for India. The Committee came to the conclusion that the system under which the Railway Board worked was not satisfactory, and suggested improvements. After consideration of their recommendations, it was decided to introduce in 1908 certain changes, the Chairman of the Board becoming President with enhanced powers, and the Board being made independent of the Commerce and Industry Department Secretariat.

Sources of statistics

The tables in this volume are compiled from the statistics given in the Report on the Administration of Railways in India issued by the Railway Board, except table No. 97 (Revenue account of the railways in respect of which Government is financially responsible) which is compiled from the Finance and Revenue Accounts of the Government of India. The Administration Reports published up to 1912 had reference to the working of each calendar year. Owing to the adoption, by the principal railway administrations, of the Government financial year (1st April to 31st March) for all accounts and statistical purposes, the Administration Reports have, with effect from 1st April, 1913, been published for the financial year.

Open mileage

The number of miles of all railways open for traffic at the end of 1915-16 was 35,833 as compared with 29,303 in 1906-07, the increase in the decade being thus 6,530 miles or 22 per cent. Of this, 18,060 miles were of the standard-gauge ($5\frac{1}{2}'$), 14,671 miles of the metre-gauge ($3'\ 3\frac{3}{8}''$), and 3,102 miles of other gauges ($2\frac{1}{2}'$ and $2'$). Of the standard-gauge 15,577 miles, of the metre gauge 9,442 miles, and of other gauges 1,242 miles were owned by Government.

Capital outlay

Up to the close of the year 1915-16 the capital outlay on all railway lines open for traffic amounted to R5,29,98 lakhs as compared with R3,71,27 lakhs at the end of 1906, the increase in the decade being 43 per cent. Of this total capital outlay of R5,29,98 lakhs, the outlay on State railways amounted to R4,69,22 lakhs. The outlay incurred during 1915-16 on lines in which the State is financially interested amounted to R6,74 lakhs.

Results of working : earnings

The gross earnings of all Indian railways during the year 1915-16 amounted in round figures to R64,66 lakhs, compared with R60,42 lakhs in 1914-15, or an increase of R4,24 lakhs or 7 per cent. This total amount of R64,66 lakhs of gross earnings consisted of goods traffic R38,76 lakhs, coaching traffic R24,14

lakhs, electric telegraph R10 lakhs, steam boat R23 lakhs, and sundries R1,43 lakhs. The working expenses were R32,92 lakhs as against R32,74 lakhs in 1914-15. The net earnings thus amounted to R31,74 lakhs against R27,68 lakhs in 1914-15, or an increase of R4,06 lakhs or about 15 per cent. These net earnings yielded a return on the capital outlay (R5,29,98 lakhs) on open lines, *i.e.*, on mileage earning revenue, of 5·99 per cent, as compared with 5·33 per cent in 1914-15 and 6·19 per cent in 1913-14. Details of the results of working in 1915-16 of each railway system, which includes branch lines and lines under the same management, are shown in table No. 99.

Financial results of working of State railways

Up to the end of 1898-99 the railways in respect of which Government was financially interested worked at a loss to the State, owing partly to the yearly additions of new and undeveloped lines and partly to the increased payments to certain guaranteed companies necessitated by the fall of exchange; but with the termination of the guarantee of the Great Indian Peninsula Railway and the development of traffic, the revenue has, excepting the single set-back in 1908-09, a famine year in North-Western India, exceeded the expenditure. The deficit in 1908-09 was ascribed to a fall in gross receipts combined with an increase in working expenses. The net gain to the State in 1915-16 was R6,11 lakhs as against R3,24 lakhs in 1914-15. This surplus gives a net profit to Government (after paying all charges including interest) of 1·3 per cent on the capital outlay on State railways; but, as already stated above, the net earnings of all railways yielded a return to the railways of 6 per cent on the total capital outlay.

Passenger traffic

The total number of passengers carried by Indian railways in 1915-16 was in round numbers 464 millions as against 451 millions in the preceding year, or an increase of 3 per cent. This total comprised 729,000 first class passengers, 3,791,000 second class, 13,648,000 intermediate class, 413,254,000 third class passengers, and 32,959,000 for trips which the holders of season and vendors' tickets are assumed to have made on the prices paid for their tickets. The total earnings from passenger traffic amounted to R20,99 lakhs, or an increase of 3 per cent over the preceding year. The increase in the passenger traffic during the year under review as compared with that of 1914-15 was chiefly due to the revival of traffic, after the outbreak of war, to the opening of new lines, to the movement of troops, and to fairs, pilgrimages, and marriage parties.

Goods traffic

The total quantity of goods carried during the year 1915-16 was 82,499,000 tons, which is greater than that of the preceding year by 2 per cent; and the total earnings from goods traffic increased from R35,09 lakhs in 1914-15 to R38,76 lakhs in 1915-16, *i.e.*, by 10 per cent. The better results of the year are attributable to the recovery of trade, as in the case of the coaching traffic, to the opening of new lines, and to the movement of military stores. The diversion of coal traffic to Bombay, from the sea to the rail route, owing to the abnormal shortage of shipping, was also largely accountable for the increase. The average rates charged per mile per passenger of each class and per ton of goods carried during the year 1915-16 are stated in the margin as compared with those ten years ago.

		1905	1915-16
		Pies	Pies
Passengers	First class	13·16	13·68
	Second class	5·74	5·50
	Intermediate class	3·06	3·16
	Third class	2·29	2·29
	Season and vendors' ticket holders	1·38	1·42
Goods (per ton)		5·42	4·34

Rolling-stock

The total number of locomotives at the end of 1915-16 numbered 8,674, of which 1,982 were employed exclusively on passenger working, 2,695 on goods working, and 3,997 on mixed working. The number of coaching stock was 23,375 and that of goods stock 188,719.

Train mileage and earnings per train mile

The total train-mileage (including miscellaneous train miles) was 159,038,000 in 1915-16 as against 157,142,000 in the preceding year. Of this, coaching train miles numbered 56,364,000 and goods train miles numbered 62,766,000. The gross earnings per train mile worked out to R4·07, the working expenses R2·07, and the net earnings per train mile R2·00.

Railway staff

The total number of servants in railway employ at the close of the year 1915-16 was 626,580 as against 600,483 in the preceding year. Of this number, 7,273 were Europeans, 10,412 Anglo-Indians, and 608,895 Indians. Of the Europeans and Anglo-Indians 15,449 were enrolled as volunteers. At the close of 1915-16 there were 11,232 children and 10,474 apprentices and workmen attending the railway schools.

Railway accidents

The total number of persons killed by railway accidents during the year 1915-16 was 2,418, as against 2,367 in the preceding year. Of this number, 247 were passengers, 433 railway servants, and 1,738 other persons. The total number of persons injured in 1915-16 was 2,153, of whom 821 were passengers, 796 railway servants, and 536 other persons.

IRRIGATION

[For Tables, see pages 204 to 219]

Irrigation has been resorted to in India from time immemorial as a means of supplementing the natural rainfall and of storing water for use at critical periods. In general it may be said that the security of the harvest depends on the existence of some form of irrigation in almost all parts of India, except in tracts such as Eastern Bengal, Assam, Lower Burma, and the Malabar Coast where the average rainfall is not less than 70 inches in the year.

Types of irrigation works

Irrigation works are of three great types—lift, storage, and river works—which are represented by wells, tanks or reservoirs, and canals. About 25 per cent of the irrigated area, or 12,000,000 acres, are irrigated from wells; the average area irrigated by tanks is about 7,000,000 acres, and over 20,000,000 acres are irrigated by canals. The wells and smaller tanks are often the property of private individuals, but the larger tanks and

the canals are generally undertaken by Government. The statistics given in this volume relate only to works constructed or maintained by Government.

Irrigation canals are not always suitable for navigation, and many canals have been constructed for navigation which do not irrigate a single acre. Not one navigable canal is directly remunerative, and in many cases the navigation receipts do not cover the working expenses. The great rivers are navigable by steamers all the year round, and there are innumerable small rivers, tributaries, creeks, and backwaters, which are fully utilized by small craft.

Classes

Financially considered, irrigation works are classed as "major" and "minor," the former being subdivided into (1) Productive, and 2) Protective, works. The most important irrigation works in India are those

Productive

classed as "Productive works" or works the capital cost of which has been wholly or mainly provided from borrowed money in the expectation that they will prove directly remunerative and that the net revenue derived from them will fully cover all charges for interest within a reasonable time (10 years) after their completion.

Protective

"Protective" irrigation works are those which have been sanctioned in consideration of their value in protection against famine, but without any expectation of their becoming directly remunerative. The cost of their construction has been met from the grant under Famine Relief and Insurance. Capital and revenue

Major works

accounts are kept for all major works, and the revenue due to them, whether directly in the form of water-rates and miscellaneous receipts or indirectly on account of enhancements of land revenue due to irrigation,

Minor works

is shewn in the Finance Accounts. Minor works are constructed from funds provided from the current revenues of India, and, broadly speaking, consist of irrigation systems which are not sufficiently important to treat as major works. Some of them are old works constructed by the former rulers of this country, and extended or restored by the British Government; some are works which have been constructed by the British Government; others, again, are village works originally provided by private or communal effort, the control of which the State has been obliged to assume owing to disputes between the parties interested or their inability to maintain the efficiency of the works. Minor works are of three classes, namely:—(1) Works for which capital and revenue accounts are kept. All expenditure incurred in the construction and development of minor irrigation works of this class is met from the ordinary revenue. There were 119 works so classed in 1915-16, the majority of which are in Bombay and Madras. (2) Minor works for which only revenue accounts are kept, either because the works are too small or because they have not been constructed by Government, which has simply undertaken their improvement or maintenance. They are credited with a share of the land revenue depending on their maintenance and are debited with all expenditure incurred on construction, extension, improvements, and maintenance. (3) There is a third class of minor works, chiefly existing in the Madras Presidency, for which neither capital nor revenue accounts are kept. These minor works in Madras include some 37,000 tanks and irrigation channels, the improvements and repairs of which are executed by the Public Works Department, or in the case of smaller works, by civil officers.

Results of working

Table No. 106 shows the principal results of the operations for the year 1915-16, while table No. 107 shows the mileage of canals in operation and the area irrigated. Table No. 108 gives the financial results of the works at the end of each year from 1896-97 to 1915-16. The chief features of these tables are given in the margin. At the end of 1915-16 the total mileage of major works was 47,403 and of minor works 4,833 as against 46,550 and 5,043, respectively, at the end of the previous year. The area irrigated during the year 1915-16 was 17,341,000 acres, of which productive major irrigation works covered 15,228,000 acres, minor irrigation works 1,726,000 acres, and protective major irrigation works 386,000 acres. The capital outlay to the end of the year 1915-16 was about R73 crores, divided between the last mentioned classes in the proportion of 77 per cent, 9 per cent, and 13 per cent respectively. The net revenue realised during the same year amounted to R4,87 lakhs, namely, R4,54 lakhs from productive major irrigation works, R29 lakhs from minor irrigation works, and R4½ lakhs from protective irrigation works. In the last ten years the net revenue from irrigation and navigation works has increased by 26 per cent—from R3,85 lakhs in 1906-07 to R4,87 lakhs in 1915-16.

Mileage

Area irrigated

	Mileage	Area irrigated	Capital outlay to the end of 1915-16	Net revenue during 1915-16	Percentage on capital outlay

Capital outlay

Revenue

Table No. 109 shows for each province the mileage of different main canals in operation and the area irrigated at the end of each year from 1911-12 to 1915-16. The details for 1915-16 are given in the margin. Madras and the Punjab account for about 12,000 and 14,000 miles of productive major irrigation works with an area of 2 million and 7 million acres, respectively. The United Provinces come next with

	Productive			Protective		Minor irrigation		Navigation
	Number of works	Mileage	Area	Mileage	Area	Mileage	Area	Mileage
Bengal	1	325	83,649	..	..	..	..	29
Madras	16	12,113	2,151,403	231	50,415	1,186	144,568	304
Bombay	15	3,347	1,304,657	589	83,546	2,385	862,100	...
United Provinces	7	9,755	2,922,251	1,460	164,459	555	151,283	..
Bihar and Orissa	2	3,216	815,947	265	60,782	23	..	..
Punjab	11	13,815	7,366,402	..	..	216	48,765	..
Burma	4	696	266,016	..	..	..	496,105	..
Central Provinces	3	194	10,482	614	27,059	56	1,825	..
North-West Frontier	4	754	307,145	..	..	..	..	..
British Baluchistan	..	..	..	..	..	108	21,774	..

nearly 10,000 miles and an area of about 3 and million acres, and Bombay, and Bihar and Orissa each about 3,000 miles with 1,300,000 and 816,000 acres, respectively. The protective major irrigation works are the largest in the United Provinces with 1,460 miles and about 200,000 acres, Bombay and the Central Provinces accounting for about 600 miles each with 83,000 and 27,000 acres, respectively. Under minor irrigation works Bombay stands foremost with 2,300 miles and 862,000 acres.

The Ganges Canal, the Lower Ganges Canal, and the Eastern Jumna Canal are the most remunerative works in the United Provinces. In the Punjab the greatest amount of net revenue is obtained on the Lower Chenab Canal, which promises developments due to recent extension. The Upper Bari Doab Canal, the Lower Jhelum Canal, the Western Jumna Canal, and the Sirhind Canal are also very remunerative. The Godavari, the Kistna, and the Cauvery Delta Systems are the most remunerative works in Madras.

Table No. 110 gives the details of irrigation and navigation in each province in each year from 1911-12 to 1915-16. The details for 1915-16 are summarised in the marginal table. Of the total irrigated area the Punjab contains 8·5 million acres, Madras nearly 4 million acres, the United Provinces 3·8 million acres, Bombay 2·4 million acres, Bihar and Orissa nearly a million acre, and Burma 765,000 acres. The average water rate per acre is Rs. 7 in British Baluchistan, about Rs. 4 in Madras, the Punjab, Ajmer-Merwara, and Burma; nearly Rs. 3 in Bombay, the United Provinces, Bihar and Orissa, and the North-West Frontier Province; and about Rs. 2 in Bengal and the Central Provinces.

	Area irrigated	Water rate per acre	Navigation		
			Open mileage	Cargo	Passengers

(a) Figures for 1896-97, prior to which they were not obtained
(b) Figures represent exports in each official year
(c) At 4 per ton (value at the pit's mouth)
(d) The figures previous to 1910 represent exports in each official year
(e) Figures from 1905 relate to official years, and the value calculated on the wholesale price of saltpetre at Calcutta
(f) For February and March 1896

INDUSTRIAL CENSUS*

No. 2.—STATEMENT showing the MAIN RESULTS of the INDUSTRIAL CENSUS in INDIA taken in 1911*

Description of Factory, etc.	Number of factories	NUMBER OF PERSONS EMPLOYED					Number of females employed per 100 males	Province or State, where chiefly found, with percentage of number of persons there employed to total number in India
		Direction, supervision and Clerical Work		Workmen		Total		
		Europeans and Anglo-Indians	Indians	Skilled	Unskilled			
Growing of Special products	1,687	1,627	10,346	18,446	779,988	810,407	84	
Coffee plantations	482	249	1,300	1,997	54,077	57,623	79	Madras (37); Mysore (43); Coorg (19).
Indigo plantations	121	98	2,076	2,486	26,135	30,795	16	Bihar and Orissa (100).
Tea plantations	1,002	1,150	6,543	12,074	683,818	703,585	91	Assam (70); Bengal (27).
II. Mines	562	1,164	4,911	71,695	146,317	224,087	38	
Collieries	353	326	3,846	57,068	81,637	142,977	43	Bengal (26); Bihar and Orissa (61).
Gold Mines	12	577	157	6,381	21,477	28,592	8	Mysore (88).
III. Quarries of hard rocks	53	22	289	1,218	10,744	12,273	29	
Stone and Marble Quarries	50	21	257	1,147	10,441	11,866	29	Bombay (32)
IV. Textile Industries	1,487	1,426	18,597	250,580	286,986	557,589	25	
Cotton	1,127	573	12,585	167,191	127,841	308,190	29	Bombay (62)
Jute, hemp, etc.	223	734	4,744	66,065	150,776	222,319	21	Bengal (97).
V. Leather Industries	158	105	829	5,742	6,936	13,612	9	
Tanneries	122	41	589	3,814	4,955	9,399	7	Madras (47); Bombay (17).
VI. Wood, etc., Industries	168	185	1,955	11,506	15,421	29,067	3	
Saw mills	106	120	1,535	2,869	7,966	12,490	6	Burma (79).
Timber yards	27	17	227	5,650	5,551	11,445	..	Bihar and Orissa (83).
VII. Metal Industries	372	1,243	3,886	34,115	31,801	71,045	4	
Machinery and Engineering Workshops.	93	413	1,375	12,661	8,698	23,147	2	Bengal (51); Bombay (23).
VIII. Glass and earthenware industries.	453	67	1,423	10,532	37,444	49,466	24	
Brick and tile factories	411	56	1,197	9,120	35,783	46,156	23	Bengal (48).
IX. Industries connected with Chemical products.	455	586	2,747	12,023	34,002	49,358	13	
Oil mills	208	45	978	1,959	6,763	9,745	20	Bengal 44); Madras (21).
Petroleum refineries	9	212	240	2,942	7,464	10,858	..	Burma (99).
X. Food industries	720	486	4,869	11,243	57,803	74,401	16	
Flour and rice mills	403	201	2,757	5,690	33,726	42,374	12	Burma (70).
XI. Industries of dress	90	209	663	7,263	2,054	10,189	4	
Boot and shoe factories	23	70	240	4,054	799	5,163	3	United Provinces (64); Bombay (15).
XII. Furniture industries	50	30	235	2,102	1,005	3,372	2	
Furniture factories	46	27	219	1,897	967	3,110	2	Bengal (29); Bombay (16).
XIII. Industries connected with buildings.	163	82	638	3,292	18,156	22,168	30	
Lime works and kilns	53	17	230	359	7,024	7,630	39	Bombay (51); Central Provinces and Berar (23).
Stone, marble and cement works.	57	55	214	1,445	5,891	7,605	34	Bihar and Orissa (37); United Provinces (31).
XIV. Industries connected with transport.	242	1,302	4,155	80,805	38,855	125,117	1	
Railway workshops	118	834	3,064	65,460	29,365	98,723	1	Bengal (23); Bombay (16).
XV. Production and Transmission of physical forces.	64	262	414	4,351	3,142	8,169	16	
Gas works	14	122	176	3,165	1,217	4,680	..	Bengal (73); Bombay (23).
XVI. Industries of luxury	389	641	4,837	29,865	10,161	45,504	1	
Printing presses.	341	500	4,416	27,588	9,094	41,598	1	Bengal (30); Bombay (21). Madras (16).
Total, India	7,113	9,437	60,794	554,778	1,480,815	2,105,824	38	
Factories in which Mechanical power is used.	4,569	8,369	50,597	492,576	1,252,450	1,803,992	38	
Factories in which Mechanical Power is not used.	2,544	1,068	10,197	62,202	228,365	301,832	41	

* Compiled from the Census of India, 1911

LARGE INDUSTRIAL ESTABLISHMENTS*

* Compiled from special official returns

(*a*) No brewing done (*b*) Production for 3 months ending 31st March, since closed

‡ From 1st January, 1908, the contracts with Indian breweries for the supply of malt liquor to British troops have been discontinued; each British regiment being left free to make its own arrangements to obtain the necessary supply; as a result, the figures of Army consumption are no longer readily available

† The quantity (in gallons) of imported beer is as follows :—

1913	4,634,000
1914	4,213,000
1915	2,818,000

* Compiled from special official returns

(*a*) Capital of five mills only. The increase in 1914 is due to the New Egerton Mill having increased its authorised capital from R12 lakhs to R1 crore

(*b*) Capital of four mills, [see also footnote (*a*)]

(*c*) Capital of three mills only, [See also footnote (*h*)]

(*d*) The quantity produced by one of the mills was not reported

(*e*) Excluding 42,000 blankets for which the weight has not been given

(*f*) „ 150,000 „ „ „

(*g*) One of the mills in the Punjab was closed

(*h*) Capital of four mills. The increase in 1915 is due to the Cawnpore mill having increased its authorised capital from R75 lakhs to R150 lakhs.

NOTE.—For figures for earlier years, see the sixth issue of the Statistics of British India, Part I

* Compiled from the annual report of the Port Officer and Registrar of Wrecks, Calcutta
‡ Incomplete, the tonnage of some vessels not being known
§ The unusually large number of British vessels lost in 1914 is due to the depredations of German cruisers in Indian waters after the outbreak of war

MERCHANDISE MARKS*

No. 74.—DETENTIONS under the INDIAN MERCHANDISE MARKS ACT in each official year from 1896-97 to 1915-16

NOTE.—The figures for letters, postcards, newspapers, and packets are estimated from the actual figures for 14 days of the year, but for parcels they represent the actual number posted during the year

(a) For earlier figures, see the 13th issue of Financial and Commercial Statistics of British India and the 1st and 6th issues of "Statistics of British India", Part III

(b) From 1899-1900 includes registered newspapers only, other newspapers being counted as packets

No. 83.—NUMBER of PAID, UNPAID, REGISTERED, INSURED, VALUE-PAYABLE, SERVICE PRIVILEGED in each CIRCLE,

(a) Included in the Punjab
(b) Abolished from the 1st July, 1907, and incorporated with the Punjab and Bombay circles
(c) Abolished and incorporated with the "Central circle" created in 1909
(d) Figures up to 1900-01 relate to the old circle "Assam" and those from 1905-06 to 1913-14 relate to the old circle "Eastern Bengal and Assam"
(e) Figures up to 1913-14 relate to the old circle "Bengal"

* The figures from 1870-71 to 1880-81 include those of Ceylon Telegraphs and those from 1882-83 to 1891-92 include Provincial Telegraphs

† The large increase in the number of free telegrams is due to a new and more correct method of numbering multiple telegrams

(a) Inclusive of 80,560 State press telegrams, value R44,699

(b) Inclusive of 150,368 State press telegrams, value R75,652

* Excludes lines for which information regarding "capital outlay," "gross earnings," etc., is not available
† Capital outlay on lines open, *i.e.*, on mileage earning revenue
(*a*) Estimated
(*b*) The decrease is due to the revision of the capital outlay in consequence of the substitution of the actual expenditure incurred on the construction of lines purchased by the State from Guaranteed Railway Companies as shown in rupees in the accounts of these Railways at date of purchase for the total purchase price converted at £1=₹10, which was erroneously taken in stating the Capital expenditure in previous Railway Administration Reports

Note.—From 1913-14, financial years, 1st April to 31st March, have been adopted for reasons explained in the Introductory note.

and TRAFFIC of ALL RAILWAYS, from 1853 to 1915-16

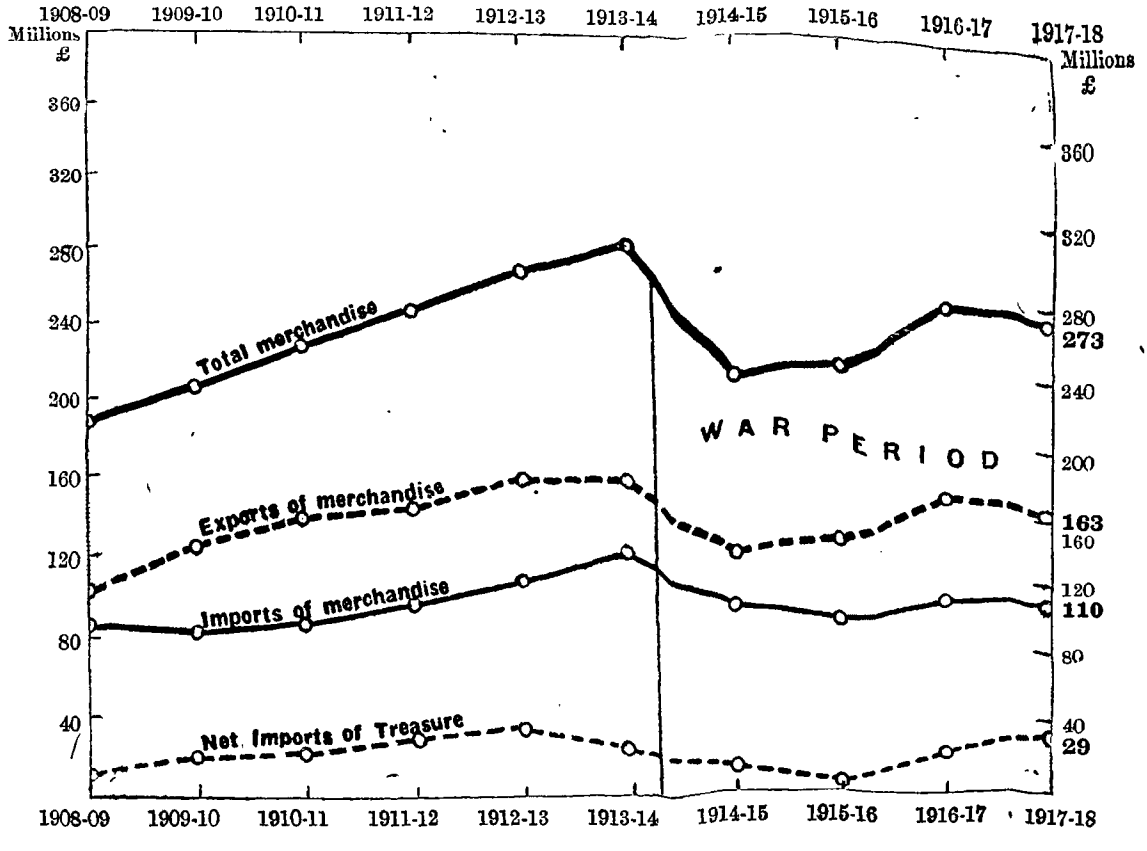
CALCUTTA : PRINTED BY SUPDT. GOVT. PRINTING, INDIA, 8, HASTINGS STREET.

I. THE FOREIGN SEA-BORNE TRADE OF INDIA

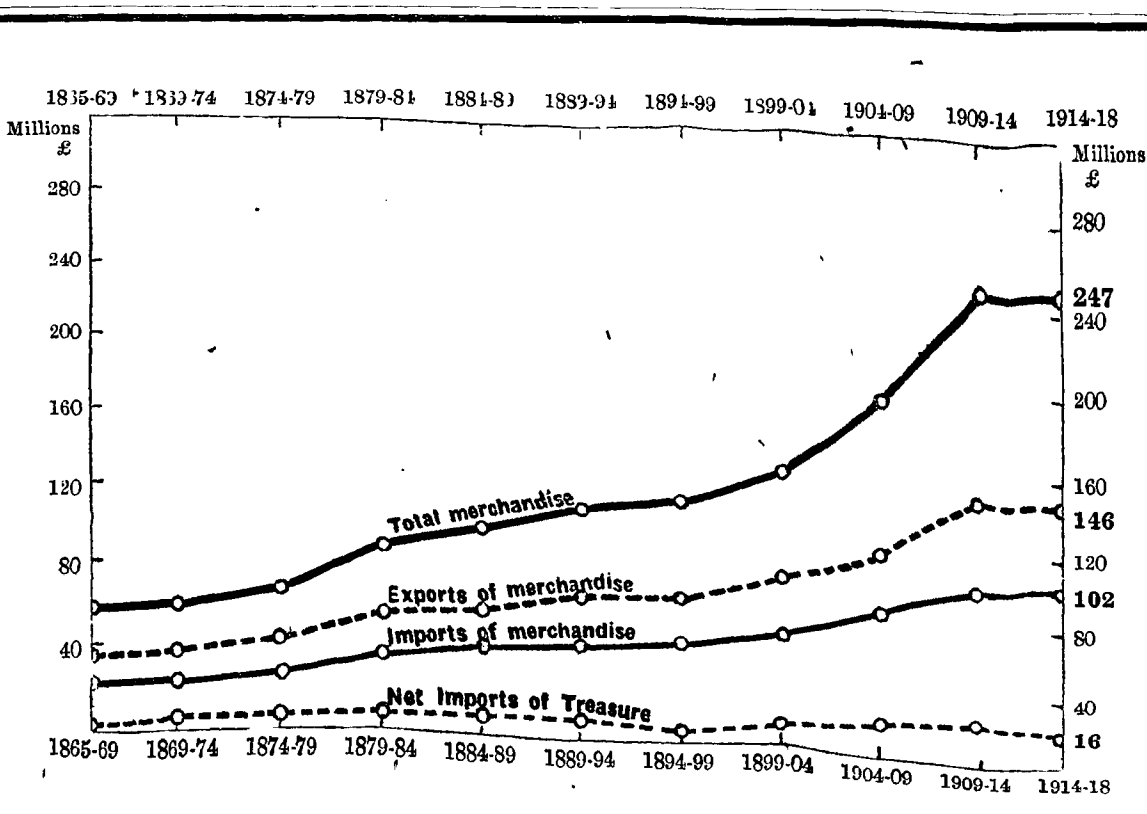
(*a*) IN A DECADE (1908-09 TO 1917-18)

(PRIVATE AND GOVERNMENT)



NOTE.—Imports and Exports include both private and Government (See footnotes.)

(*b*) DURING HALF A CENTURY (1865-66 TO 1917-18)



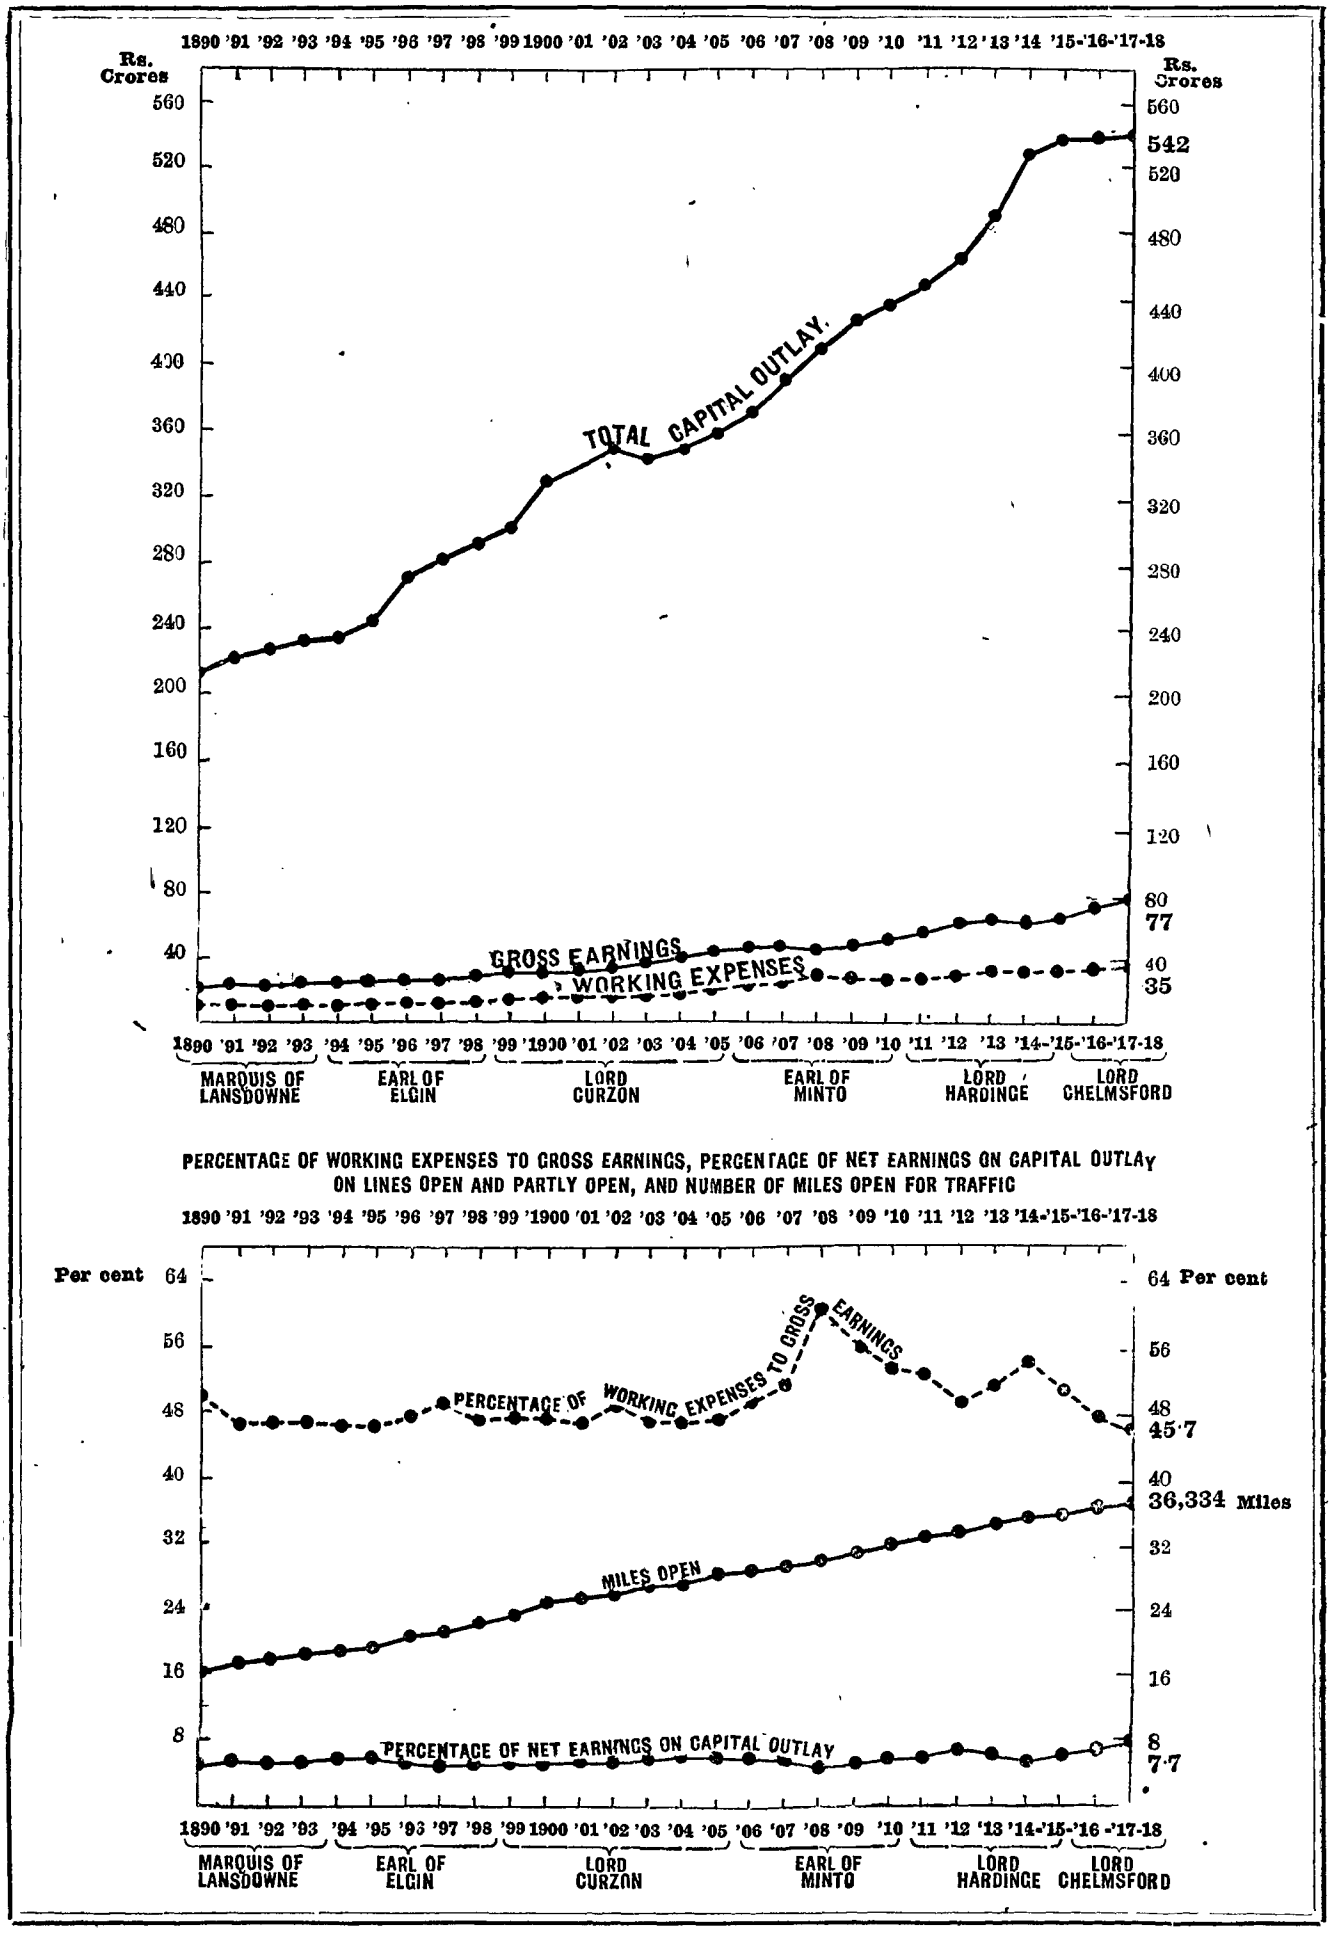
NOTE.—Imports and Exports include both private and Government (See footnotes.)

NOTE.—1. In chart 1(*b*) the curves for 1865-69 and 1914-18 are based on averages for four years, the remaining curves are based on averages for five years.

2. Total merchandise includes Imports and Exports, both private and Government.
3. Imports of merchandise are inclusive of Government stores.
4. Exports of merchandise are inclusive of re-exports and Government stores.
5. *Net* imports of treasure are the imports *minus* the exports of gold and silver, both private and Government. The exports of treasure are ordinarily very much less than the imports.

2. CAPITAL OUTLAY, GROSS EARNINGS, AND WORKING EXPENSES OF INDIAN RAILWAYS

(27 years—1890 to 1917-18.)



PERCENTAGE OF WORKING EXPENSES TO GROSS EARNINGS, PERCENTAGE OF NET EARNINGS ON CAPITAL OUTLAY ON LINES OPEN AND PARTLY OPEN, AND NUMBER OF MILES OPEN FOR TRAFFIC

Note.—The "Total Capital Outlay" is that on all Indian Railways, *viz.*, (i) open, (ii) partly or wholly under construction, and (iii) on miscellaneous items; while for the purposes of the "percentages on net earnings on capital outlay" the item (i) open lines only is reckoned.

3. ANNUAL GROSS EARNINGS, AND WORKING EXPENSES ON THE PRINCIPAL SYSTEMS OF RAILWAYS IN INDIA FROM 1908 TO 1917-18.

Statistics of British India

Vol. I.—Commercial Statistics

INTRODUCTORY NOTE

The statistical tables in this volume deal with industries, mills, mines, joint-stock companies, foreign trade and shipping, post office, telegraphs, railways, and irrigation. Special steps were taken to bring the tables more up to date, and the statistics are therefore brought up to the period ending 31st March, 1918. Three charts showing (*i*) the growth of the Foreign Seaborne Trade of India, (*ii*) capital outlay, gross earnings, and working expenses of Indian Railways, and (*iii*) gross earnings and working expenses on the principal systems of Railways in India, have been added, with also an index for easy reference.

SUMMARY TABLE

Table No. 1 gives the salient features of each section of the Commercial Statistics included in this volume.

INDUSTRIAL CENSUS

[For Table, see page 5]
